REV. GEO. P. RUDOLPH.

Andience.

An Immense audience turned out Wednesday night to hear a lecture on Romanism. As the flag was- draped over the table a burst of applause went up from the crowded house. The speaker, Ex-Priest Rudolph, was introduced and received with more applause, as one who would address them on "Romanism, the great foe of American Institutions." He charged that a foreign potentate was seeking to subvert this government and set up the papal power to rule over American liberty.

up, by a number.

Peter was the disciple who set in motion the great machine of popery. In 325 Constantine set up the first state church. He was a politician and wanted the holp of the church to put down his enemies. Four centuries later Pepin, King of France; granted lands to the Pope Stephen. Charlemagne went to Rome in 800 A. D. and was crowned emperor of all Christendom. He ridiculed the holy spikes, that were used in the Saylor's cross, all over the world-enough to build a railroad from New York to San Francisco He attacked the dogmas of the church and claimed that the church taught that all who did not accept the doctrines of the Holy church would be exterminated as heretics. Heretics are to be condemned and to be turned over to the secular powers to be executed. Laymen were to be exiled and their property to be confiscated, He read from the fourth council of Lateran, canou law of the fourth century. All who were present were excommunicated. Any Catholics who attended these meetings was thereby excommunicated. Having been a priest once he was a priest now and forever. He had been a priest twelve years and ten months and had all the power he ever had.

The holy council of Trent condemned all the teachings of Protestantism. The doctrine of exterminating heretics was as old as the church and still in force, The Popes had taught that it was no crime to kill an excommunicated per-One of the later Popes had de-800. miet at Grange hall to organize their clared that the murder of a Protestant would atone for killing a Catholic.
