

# BREVITIES

## PERSONAL GOSIP.

Archibald Philip Primrose is the name of the new premier, Lord Rosebery. Lord Salisbury habitually dictates official papers into one of Edison's phonographs.

John A. Cockerill of the New York Advertiser bears a striking personal resemblance to the first Napoleon.

Professor Tyndall is said to have been the first man to ever attempt to produce an artificial rainbow—this in 1833.

At 92 Sir Harry Verney, Florence Nightingale's brother-in-law, goes out on horseback to a meet of the hounds.

Mrs. Thomas Wentworth Higginson, who is a niece of Mrs. Longfellow, is younger than her husband, who is 70, by a score of years.

Cardinal Gibbons, at the pope's request, has sent to his holiness large pictures of President Cleveland and ex-President Harrison.

The khedive of Egypt is enjoying a picnic in the desert, accompanied by 50 members of his bodyguard. The party travels by moonlight, resting during the day.

Mrs. Newman of London is a business woman of tact and energy. She has long successfully conducted a large jewelry establishment in the English metropolis.

Dr. Seward Webb, president of the Wagner Palace Car company, has the largest private park in the United States. It comprises 200,000 acres in the Adirondack mountains.

The oldest men in the United States senate are Morrill of Vermont, who is 84; Palmer of Illinois, 77; Harris of Tennessee, 76; Pugh of Alabama, 74, and Sherman of Ohio and Hunton of Virginia, 71.

E. S. Buchanan of Newman, Ga., recently found in an old trunk a \$50 bill issued long before the war by the Georgia Railroad bank of Augusta. He learned that this bank was still in existence and got the bill redeemed.

Largest of all the residents of Bloomington, Ill., is a young man of 25 years and 452 pounds weight who is known as Baby Blues. He wears a 14 collar, a 7 1/2 hat and No. 12 shoes. He is one of the best waltzers in town, and as a foot racer he knows few equals.

## STAGE GLINTS.

Elita Proctor Otis will star next year. Irving and Terry will come back to America in 1895.

Henry Gray Carleton is to write a play for Julia Marlowe.

Mansfield says he will go in heavily for new plays next season.

Alexander Salvini's tour has been extended until late in May.

Thomas W. Keene is preparing "King John" for next season's tour.

Robert Edson will join the New York Empire stock company next season.

Virginia Harned has taken Julia Arthur's place in A. M. Palmer's company.

Engene Ormonde will leave Daniel Frohman's company at the close of the season.

William Gillette and Robert Fraser are working on a new pantomime musical burlesque.

"An Arabian Night" is being played under the exhilarating title of "Brandy and Soda."

Henry Miller and Viola Allen have renewed contracts for next season with the New York Empire theater company.

Ernesto Rossi makes more with "Hamlet" and "Othello" in Italy than with any Italian or French play, ancient or modern.

"His Grace of Grammont," the new play which Otis Skinner will produce next season, deals with the picturesque period of Charles II.

Mrs. Agnes Robertson Bonicault is in the cast of "The Cotton King," a sensational drama recently produced in London at the Adelphi by Charles Warner.

## SILVER NOVELTIES.

The new silver toast racks indicate that toast is in fashion.

Mustard pots of red glass set in perforated silver, with a silver cover, are new.

New letter racks have been produced made of graded circles in raised work mounted on an inclined standard and supported like a photograph frame.

Hammes describes some of the decorations for bodices. One such is made of the dead gold chains strung together with crosspieces. All the points of intersection are fastened by huge pearls.

Worth, the modiste, has introduced a new ornament in jewelry which bids fair to be a favorite. It is a diamond triangle, with a flower or monogram in the center, and may be worn as a brooch, a brooch or a decoration for the hair.

Convenient and pretty receptacles have been brought out for holding the matrimonial orange. They are on a low standard, tip tilted, polished with a raised and broken edge, and have a rack at the back for supporting the pointed spoon.—Jewelers' Circular.

## ODDS AND ENDS.

Every civilized language may be heard in the streets of San Francisco.

In London there is a fur company which was established during the reign of Henry VIII.

The "rock cork" mentioned by Pliny and other ancient writers is thought to have been asbestos.

It was 59 days from the casting of the Lick objective glass before it had cooled sufficiently for safe removal.

The whale fishing industry of the United States was at its height in 1854, when 608 vessels were engaged in it.

## MARRIAGE AND DIVORCE.

Kentucky has 18 legal reasons for divorce.

Forty states and territories forbid marriage between an uncle and niece.

In all countries January, June and July are the favorite months for marriage.

The English marriage ceremonies are of three kinds—by banns, by license or before a register.

In Prussia 18 and 14 are legal ages at which men and women may contract a matrimonial alliance.

A New York wife was granted a divorce because her husband threw the baby at her when she hit him with the coal bucket for spitting on the stove.

A Missouri divorce was once granted because "the defendant goes gadding about, leaving this plaintiff supperless, or if he gets any he has to cook it himself."

The most frequent cause for divorce granted by the Greek church is "disappearance." Over two-thirds of the whole number of divorces are granted for this reason.

In Pennsylvania a henpecked husband was relieved from the yoke of matrimony because "the defendant struck this plaintiff a violent blow with her bustle."

The Scottish marriage law is so loose that if a lady living with John Smith is addressed in the presence of Smith as Mrs. Smith and answers to the name the courts have decided that she is legally his wife.

Gallus divorced his wife because she ran about with her head bare. Vetus got rid of his because he saw her talking with a freed woman; Sophus, because she went to the theater; Amillius Paulus, because he did not like her.—St. Louis Globe-Democrat.

## THE PROPER CAPER.

A new "Russian craze" is in great vogue for fichus, gimpes, berthas and full yokes and vests.

Many of the capes and peleries have shaped stole fronts that generally reach half the length of the dress skirt in front.

Large quantities of light and colored satins are sold in remnant lengths for yoke linings, crush collars, belts and gathered frills laid under those of lace.

The majority of the hats for utility uses are trimmed with moire, satin or shot and dotted faille ribbons, made into albatross bows, thick knots, twisted bandeaux, fan loops and cockade ends.

The short Spanish jacket called the bolero accompanies many of the chic and charming toilets sent over as models for summer gowns. They are very short, not reaching the waist by some inches.

Among the novelties in laces are rich gimpure patterns spangled with steel and Venetian devices, alternating with Spanish flower patterns. Spangled lace is used in great profusion on evening toilets.

Round waists will remain in favor all summer, and not a few of the new shapes are cut with a very slight point front and back, the entire lower edge covered with milliners' folds or a crush belt, with collar around the neck to match.

The very latest model for those who seek the very latest modes is the "Joan d'Arc" sleeve, which is in close coat shape, with one very deep circular cap at the top edged with jet, gimp or piping. At the wrists are wide turnback gauntlet cuffs.—New York Post.

## HINTS FOR HORSEMEN.

A night pasture for work horses will help to cool their blood. Give them their grain ration just the same.

If the colt carries his tail to one side, employ a skilled veterinary surgeon, who will cut the muscle on the opposite side.

Keep the stable clean, and use plenty of plaster to absorb the ammonia, and see that the ventilation is good and that there are no drafts.

Death to lice on horses is easily and quickly effected by dusting buhach or fresh Persian insect powder into the hair as often as the pests appear.

Don't give your horse any food for an hour after a hard drive nor for two hours after particularly exhausting him. Then water 20 minutes before feeding.

If the colt's ankles seem a little tired and weak after driving, bathe them thoroughly with cold salt and water and wrap them in bandages, but do not bandage them tightly.

The owner should see that the horse does not stand in rotten or wet litter, which frequently causes thrush. This disease will so cripple a horse that he can neither gallop nor trot. Pack or stop the feet when occasion requires.

If you have a suspicion of a spavin coming on your horse, employ a good veterinary surgeon. Judicious flogging, strong blistering and perfect rest for at least six weeks or two months and good nursing will in most cases arrest the disease and cure the lameness.—Horseman.

## RAILROAD TIES.

A scheme is now under consideration for connecting Washington and Manassas by an electric railway.

There is a probability that in the near future the St. Louis and Chicago railroad will be incorporated into the Jackson-ville Southern system.

Amos F. Eno has been chosen president and John Jacob Astor vice president of the Toledo, Ann Arbor and North Michigan road by the directors.

The New York, New Haven and Hartford, at a cost of \$30,000, is about to have four bridges built on its main line, the contract for which has been given a bridge works at Springfield, Mass.

The Lehigh Traction company, controlled by Congressman Tom L. Johnson and his brother, A. L. Johnson, has decided to extend its trolley line from Allentown to Easton, a distance of 10 miles.

## THE 'GEOMETRY OF BEAUTY.'

A System of Principles in Formative Art Which Existed in Ancient Greece.

In a recent lecture before the Scientific club of the Pennsylvania state college Professor Osmond showed that all physical beauty is associated with sound, color and form, which, if not the basis of its being, are its vehicle to us. It is a psychological law that the mind is pleased with simple ratios. In their most abstract form these harmonic ratios are pure numbers, obtained from the elements 1, 2 and 3, and 5. It is a fact that in sound, color and form relations governed by ratios constructed from the harmonic numbers or their simple multiples are pleasing. This law or fact of mental constitution is the starting point of the inquiry after the principle common to sound, color and form and constituting in all beauty. The application of these ratios in music has been known from the time of Pythagoras; also in color various harmonious combinations have been lengths in harmonic ratios.

In obtaining beauty of form the harmonic ratios are applied to angular magnitude, not to lengths or surfaces. The eye refers everything to a vertical line and a horizontal line, constituting a right angle. The right angle, 1, is harmonically divided into parts having the ratios to itself that the notes of the octave have to the fundamental note. The lines that so divide the quadrant are the diagonals of harmonic rectangles, and each of these has a curvilinear figure, the ellipse, and three (or six) inscribed triangles, all harmonic. These harmonic rectangles, ellipses and triangles may be put together in combinations of infinite variety and necessarily pleasing effect in decoration and sculpture and architecture. Examples of these are found in "The Parthenon," "The Venus of Milo," "A Portland Vase," etc.—Drawings of sections of the eye show why beauty in form depends on harmonic relations of angles from the very manner in which things are seen.

The value, financially and aesthetically, of a system of principles that will guide those engaged in all the formative arts to the sure production of a true and pure beauty is beyond estimate. Such a system existed in Greece in the three centuries of her glorious sovereignty in art.—Exchange.

## Around the World.

The time required for a traveler to circle the earth has been greatly reduced since the imaginary trip of Jules Verne's Phileas Fogg, who succeeded in getting around the globe in 80 days in spite of storms, shipwrecks, Indians and detectives. The question how long it would take now to go around the earth has recently been discussed in the Antwerp Geographical society.

The answer given by M. E. de Keyser was 67 days, including the loss of a day at New York, the journey being made eastward by way of Yokohama and San Francisco. But in the near future this time is likely to be cut down to 45 days, and perhaps less, through the completion of the railroad across Siberia, which, at the present rate of progress, may be open from Europe to the Pacific in 10 years.

With the average railway speed for long distances doubled, it is predicted that in the coming century a traveler may be able to go around our planet in 24 days.—Youth's Companion.

## Temporarily Blinded by a Flash.

At the Narragansett Electric Lighting company's works in this city there are two men who have been temporarily blinded when throwing a switch. Superintendent Thomas says that this happens in every big electric lighting plant. When a switch is thrown, the circuit is broken. When properly done, another connection is made simultaneously. The intense flash lasts until another connection is made. One of the men of the Narragansett company's works was so nearly blinded that he was at home three days at one time. He was not, however, as is said to have been the case with Caulfield of Brooklyn, unable to see anything at all. He was able to grope about, but could see nothing distinctly. Both the men are remarkably strong specimens of manhood and could not be called hysterical by the widest stretch of the imagination. It is believed here that the cases mentioned are of physical inability solely.—Providence Journal.

## CARTER'S LITTLE LIVER PILLS.

Sick Headache and relieve all the troubles incident to a bilious state of the system, such as Dizziness, Nausea, Drowsiness, Distress after eating, Pain in the Side, Etc. While their most remarkable effect has been shown in curing Headache, yet CARTER'S LITTLE LIVER PILLS are equally valuable in Constipation, curing all forms of this annoying complaint, while they also correct all disorders of the stomach, stimulate the liver and regulate the bowels. Even if they only cure

Headache, yet CARTER'S LITTLE LIVER PILLS are equally valuable in Constipation, curing all forms of this annoying complaint, while they also correct all disorders of the stomach, stimulate the liver and regulate the bowels. Even if they only cure

Both the men are remarkably strong specimens of manhood and could not be called hysterical by the widest stretch of the imagination. It is believed here that the cases mentioned are of physical inability solely.—Providence Journal.

## A Hunt For Parish Stones.

A party of serious and resolute men might have been seen yesterday from 9 in the morning until 4 in the afternoon, in the neighborhood of Finchley, now following the highroad, now leaving the beaten track for the open fields, and anon climbing over hedges and ditches, brick walls and wooden fences.

The leader was not blindfolded, nor did he nervously clutch the hand of the man nearest him—facts which dispelled at once the idea that they were thought readers in search of missing treasure or criminals. They were engaged on an errand of immense local importance, and not until they had hunted out every one of the stones by which the limits of the parish were marked would they return to their homes and families.

In all, some 10 miles were traversed, with the satisfactory result that any difficulty that may have arisen hitherto with regard to the latitude and longitude of any particular property has been removed. At Hampstead the "beaters," as they are called, celebrated the occasion by dining together. It is 14 years since this ceremony was last carried out at Finchley.—London Telegraph.

## The Spring Medicine.

"All run down" from the weakening effects of warm weather, you need a good tonic and blood purifier like Hood's Sarsaparilla. Do not put off taking it. Numerous little ailments, if neglected, will soon break up the system. Hood's Sarsaparilla moves, expels disease and gives you strength and appetite.

Hood's Pills are the best family cathartic and liver medicine. Harmless, reliable, sure.

## TREASURER'S NOTICE.

State of Oregon, SALEM, April 21, 1891. Treasurer: I have been advised that there are outstanding warrants, with the exception of one, for the sum of \$100.00, in favor of the State of Oregon, and that the same have not been paid for some time. It is the duty of the Treasurer to see that the same are paid, and he is hereby notified that if they are not paid by the 1st day of May, 1891, he will be obliged to issue a writ of attachment against the property of the delinquent, and to sell the same to satisfy the said warrants. This notice is given for the purpose of giving the delinquent an opportunity to pay the same before the writ is issued. This notice is given for the purpose of giving the delinquent an opportunity to pay the same before the writ is issued.

W. A. CURRY, Treasurer.

## NOTICE TO TAXPAYERS.

NOTICE IS HEREBY GIVEN TO THE TAXPAYERS OF SALEM, OREGON, that the tax for the year 1891 has now been assessed, and that the same is due and payable on or before the 1st day of May, 1891. It is the duty of every taxpayer to pay the same, and failure to do so will result in the assessment of a penalty, and the same will be collected by the Sheriff, and tax collector of Marion County, Oregon.

W. A. CURRY, Treasurer.

## BALD HEADS!

What is the condition of yours? Is your hair dry, harsh, brittle? Does it split at the ends? Has it a lifeless appearance? Does it fall out when combed or brushed? Is it full of dandruff? Does your scalp itch? Is it dry or in a heated condition? If there are some of your symptoms be warned in time or you will become bald.

### Skookum Root Hair Grower

It is what you need. Its production is not an accident, but the result of scientific knowledge. Knowledge of the diseases of the hair and scalp led to the discovery of how to treat them. "Skookum" cures itching scalp, restores the hair, and keeps it from falling out. It is not a dye, but a delightful cooling and refreshing tonic. It stimulates the follicles, it stops itching, restores the hair, and grows hair on bald spots.

Keep the scalp clean, healthy, and free from irritating eruptions, by the use of Skookum Root Hair Grower. It destroys parasitic insects, which feed on and destroy the hair.

If your doctor cannot supply you send direct to us, and we will forward prepaid, on receipt of price. Grower, \$1.00 per bottle; 1/2 for \$0.50. Soap, 50c per jar; 6 for \$2.50.

THE SKOOKUM ROOT HAIR GROWER CO., 57 South Fifth Avenue, New York, N. Y.
