GENERAL YELL.—Who was so hungry last evening that he could have eaten a mile, would be satisfied with a 16 cent meal at the N. Y. Kitchen. You get your money's worth there every time.

LAST NIGHT'S SHOW.

Home Talent Excellently Entertains a Large Audience.

The Capital Minstrels derived their name from their excellence no less than from their geographical extraction; and they seem determined to live up to their reputation. Last night's entertainment was as good a minstrel show as one will see in a "coon's age," and vastly better than the average "aggregation of Ethiopian eccentric delineators," which periodically inflict themselves on an unoffending community. The very fact that the Capital artists are amateurs adds the element of marvel to the applause and commendations which greet their performances; and all these are enhanced by the fact that the most of the program is entirely original, as well as infinitely amusing.

At Reed's last evening there was an audience which packed and jammed every edger, and pot-standing room at a premium, and everybody, contributor and dead-head, went away satisfied. The latter class is generally the most cynical and difficult to please; and to head it off from carping criticism betokens great merit in presentation. The first part followed the conventional bones, tambo and interludes, with interspersed solos and concertos "by the troupe." Part Second introduced some very clever work in song and dance, instrumental vagaries, and specialties of various kinds and variety style.

Part Third took the character of a political satire—"extravaganza"—would have better described the situation. But by either name it was capital conceived and written; and capital mounted and acted.

It was the production of Mr. Charles Burggraf, who gave testimony to his reliance in its merits by playing the title role of "Col. Corker of Cow County, a member of the legislature," sustained in his comedy efforts by "Abraham Crack-a-Jack, a colored statesman, Minister to Timbuctoo, (under a Democratic administration)," "Billy Dogoo," I. M. Innit, Corker's private secretary, Ed Hall, "Brason Gall, member of the Third House, (presumably in the sitting senator's interest) C. W. McLyman, an Investigating Committee, very humorously indifferent to the specific subject to be investigated; "Dolly Sweet (The Sweetest Girl in Oregon) by name, at any rate, C. D. Ford," and several minor parts all equally well done.

In brief, it was an night of fun and worth the expenditure of the money of the ticket-holder and the economies of the complimentary.

SALEM'S CITY HALL.

What the City Dads Did at Their Meeting Tuesday Evening

At the regular session of the council last evening all were present except Aldermen Murphy, Kay and Holman. Aside from the usual salary claims the following bills were paid: Salem Gas Light Co. \$2 10 D. H. Richards 3 00 Street laborers 42 00 J. A. Bernard 9 50 Salem Gas Co. 29 20

The petition for an electric light at the crossing of Capital and Marion streets, was rejected. A sidewalk was ordered on Mission street, as prayed for by Wm. Sargeant and others. Petitions for sidewalks in Capital park addition were duly referred, and an ordinance reported covering same. The petition for a light at the M. E. church was referred to the committee on fire and water. Instructions were also given that committee for a redistricting of the city's lights.

The "house numbering" ordinance received a favorable report. Wash Stimpson, Mel Hamilton and F. P. Tinkington applied for a renewal of saloon licenses. Referred. The city engineer was instructed to enforce a cleaner condition of gutters.

F. B. Southwick appealed to the council for a more prompt payment of the claims of his firm for work on the city hall. He explained that they needed the money to pay off hands, and that unless it was forthcoming soon work would have to stop. Duncan moved that the council adjourn to Thursday evening of this week to consider the matter, which was done. Alderman Albert suggested that the city hall committee investigate to devise some plan for modifying the requirements of the contract to such a way as to temporarily reduce and finish the building, but nothing was done in that end.

The Eaglet reached Salem this morning and after unloading ten tons of coal, left for Eugene. Her power not being sufficient to enable her to get over the Clackamas rapids, just below Oregon City, she resorted to her captain and line and crossed without trouble. TOO LOW WAGES.

Other Reasons Why We Get Discouraged.

Labor's tiresome sameness Wears Body and Brain.

Depressed System is Often Badly Nourished.

Paine's Celery Compound a Perfect Remedy.

Better Even Than Rest and Change for the Weary.

The more minutely all kinds of work becomes subdivided, the more sameness and monotony creep into each man's labor. Day after day, day after day, in the same rut till little interest remains in the work, and the mind and body are gradually robbed of energy and healthy elasticity. Unless something is done the prolonged strain is likely to result in health failure, nervous symptoms appear, cares that were once lightly cast off now stick like turs, slight physical exertion tires, and the end is complete prostration and breaking down of some vital organ.

Business men feel this, public officials, wage-earners, housekeepers, every man and woman whose work allows of little or no rest and change. At the first small beginnings of nervousness, or when languid feelings do not disappear after a sound night's sleep, the prudent person should know that he or she must check this decline in health by the use of that genuine nerve food and blood renewer, Paine's celery compound.

The family physician knows its power over diseases of exhaustion and debility when he orders it, as so many careful practitioners are now doing in every city and small town throughout the United States.

As soon as one has fairly begun to use Paine's celery compound, every day will be a firm step toward assured health. Nervous, unhappy, and feeble persons find their flesh becomes more solid, a more healthy color takes the place of the waxey, sallow look, and there comes a clear increase of the volume of blood and an increased normal appetite because of this rapid feeding of the entire system. Work becomes easier.

This searching tonic goes at once to the very causes of nervous disaster and breakdown. It is invaluable in all wasting diseases, in all cases where natural demands are made on the system. Especially is it true in the case of mothers and invalids recovering from sickness.

Paine's celery compound has saved thousands from mournful years of feebleness, from the weariness of pain and from bodily weakness. It means health and happiness.
