THINGS TO THINK ABOUT.

Stop the calamity howl and Salem will go ahead.

Quit creating the impression that Salem is about to go into the hands of a receiver. Our town is all right if you will quit crying it down.

If a lot of people would quit getting out and cackling like guinea-hens the town would be just as well off.

They are like General Grant's coyote. When you have rounded them up they number about one.

Speak well of your town. Quit making out that it is next door to the hot place. That is all a lie.

Our beautiful capital city has everything in its favor and everything coming its way. If we will only keep in the middle of the road and quit lying about ourselves and quit sending out the impression that Salem is an awfully bad, wicked, immoral town—no town in Oregon has a better future.

The Americans Are Ready.

When the signal comes for the meeting of the next bi-metallic conference for which Germany has asked and to which Britain has agreed, the United States delegation will be ready. There will be nine delegates in all—three appointed by the President, three by the Senate and three by the House of Representatives. The six latter have already been named. The Senate has selected three out-and-out free silverites—Daniel, of Virginia; Jones, of Arkansas; and Teller, of Colorado. The delegation from the House is not so numerous. Speaker Crisp is its leader, and he will be supported by Messrs. Culberson and Hill. The Speaker is a moderate free silver man; stumped last autumn when Hon. Hoke Smith was taking up the Administration program against him. Mr. Culberson is a silverite and Mr. Hill is not. So the delegation stands thus far, five to one in favor of free silver coinage.

There is a dispute as to what kind of men President Cleveland should choose for his third of the tri-lateral. Should they be representatives of the most conservative eastern feeling so as to offset the extreme silverites named by the Senate; or should they be only conservative bi-metallics, with the accent on the "bi-metallic"? It is contended that the former plan is the only way possible now to send to the Conference a fair representation of the feeling of the whole people; while it is argued on the other hand that it is folly to send men to a bi-metallic conference who are not avowed advocates of bi-metallicism. The time has not come yet, however, for the President to act. That will only become necessary when the call for the Conference is issued.

Congress acted so promptly simply to prevent the possibility of the whole delegation falling into the hands of the President, if the need for such action should come during the recess. It is sure now in any event that the silver side of the case will be strongly presented by the United States representatives.—Montreal Star.

The Law vs. Old Neglected Orchards

ED. JOURNAL.—I notice your neighbor the Post, condemns the law giving power to the State Board of horticulture to remove a nuisance in the shape of neglected orchards.

The spirit of the law is the same as that providing for the sanitation of cities—the same law as applied to sheep and the law providing for the destruction of horses and cattle having contagious diseases, which makes these slaughter the best public economy.

It appears by the report of the state Board of horticulture that 75 per cent of the orchards of the state are being properly cared for. It is amongst the other 25 per cent, largely old orchards, that are planted in South Salem by Gen. H. Jones many years ago, and for many years divided and sold as town property, the old Harris orchard below the city on the west bank of the river.

Orchards of many or few trees, long neglected, that is the chief source of infection to the young plantation of trees recently put out, and which ought to be either cared for or removed. I think it may be so safely said as an orchard infested with the same scale as a bush of sheep infested with wool, that credit comes to the owner of either as long as the disease is allowed to remain. As it is quite as possible to expunge fruits that are diseased as well as wool, so diseased wool is as well as the insects for healthy trees are as important in the case of one product as the other. Well, it seems ought to prevent the propagation of blightful orchards from by means, and they will surely will.

How to control the propagation of a pestiferous insect is a matter of course, with the best intention on the part of the State of the horticultural department. I do not think it is necessary to state.

Arguments Against the Check Rein.

What sort of a man is he who inflicts on his horse for hours what he would not endure on himself for ten minutes? The horse has as clear a right to be happy at his work as the man who drives him.

"The overdraw check is a disgrace to civilization."—Dr. McEachran, F. R. C. Vet. Surgeon.

"The overdraw check should be prohibited by law."—Prof. Norton Smith, the noted trainer.

Check reins cause more stiff shoulders than all other causes combined."—Chief Counselor of Paris Horse Hospital.

"The check rein is extremely cruel—a hindrance to speed and a cause of disease. It causes stumbling, painful breathing, limits the animal's power and shortens his life."—Dr. Fleming, Chief Vet. Surgeon British Army.

John Splann says: "I once thought that a trotting horse should wear an overdraw check. I am convinced that it was a serious mistake."—Life With the Trotters.

Charles Marvin, trainer of Sunol, says: "One horse, unable to trot in 4 minutes when checked, trotted inside 2:40 when unchecked."!!

Henry Merwin says: "I wish the overdraw check had never been invented. It is often an instrument of torture." Round Track and Stable. (A valuable book; buy it.)

Karey, the famous trainer, said: "Colts should not be made to endure the biting bridle over fifteen minutes at a time. To keep it on half a day, as some do, is to inflict one of the worst punishments possible. Some colts are permanently injured by it."

A check rein is 'tight' and painful, which compels a horse to hold his head one inch above its natural position." "The check rein painfully strains the neck, injures the mouth, irritates, tortures. It also causes 'bowed' knees."—Dr. Kitching, Veterinary arthur.

"Man deserves hell were it only for his treatment of horses."—John Boyle O'Reilly.

Dr. Richard, Royal Vet College, says: "The check rein is a great cruelty. It interferes with breathing, injures the mouth, induces paralysis and causes stumbling.

Several hundred veterinary surgeons, in England, have signed a protest against check reins.

Queen Victoria does not permit check reins on the royal horses, and her master of horses, the Duke of Portland, who owns some of the best racers in England, stoutly opposes checks, whips and spurs. His horses win races without either.

The overdraw check destroys the grace and beauty of the neck and head, and imparts a stiff, awkward and distressed appearance.

Tight checks are now discarded by intelligent or humane horsemen and public sentiment condemns them.

Write to I. Z. Merriam, Whitewater, Wis., for circulars of the only sensible check rein. To those who must use a check it is invaluable.

A Letter on Humanity.

EDITOR JOURNAL:—"OUR DEAR ANIMALS" quotes you as saying that some ministers in your vicinity are, in some way, cruel to horses. Quite likely. Did you ever know or hear of a minister preaching against that sort of sin? A horse and a baby are both helplessly dependent upon man, and nothing can be more unmanly or wicked than the evil spirit which leads to the abuse of either.

Christianity means kindness or it is a fraud. All unkindness, then, is sinful. A truly being rank unkindness, is wicked and contrary to the teachings of Christ. Love fulfill the law and kindness is the natural expression of love, and is, therefore, righteousness.

The sin of cruelty is a neglected subject, which in England and parts of this country, is now receiving special attention. Cruelty is the essence of all crime. The sin is in the propensity rather than in its expression.

As to check reins, they are universally condemned by veterinary surgeons and expert horsemen, and they have been greatly modified or abandoned in the Eastern states and England. The rights of animals are now generally conceded; and the fight is in considerable at his work is an undoubted right of the horse, which man but very few men will deny. Respectfully,

L. A. HAMLEN.

The above letter refers to a note sent by the editor of THE JOURNAL from an Oakland city where he spent two weeks, and has no reference to Salem.

Who Did It? The late legislator authorized the printing of 50,000 copies of a revised edition of the world's fair report to our state, also, information concerning the state's resources. This printing would have cost many thousands of dollars, were it not for the fact that the state printer, Dr. H. H. Hester, that, through a mistake of about three hundred dollars, he printed the job in 1894.

With the greatest within the state's financial limit, the job is completed. It is a pity that it is not printed. It is a pity that it is not printed. It is a pity that it is not printed.

How to control the propagation of a pestiferous insect is a matter of course, with the best intention on the part of the State of the horticultural department. I do not think it is necessary to state.

Nervous Prostration

Hood's Sarsaparilla Gave Nerve Strength and Good Health.

"Hood's Sarsaparilla has helped me wonderfully. For three years I have been doctoring but could not get cured. Soon after beginning to take Hood's Sarsaparilla there was a change for the better. In a short time I was feeling splendidly. For several months previous I could not lie down to sleep on account of my heart trouble and nervous prostration. I now rest well and am able to do work of whatever kind. If I had not tried Hood's Sarsaparilla I should have been a cripple."

Hood's Sarsaparilla Cures Sarsaparilla I do not know what would have become of me."

Mrs. S. BRADDOCK, 404 Erie Avenue, Williamsport, Pennsylvania.

Hood's Pills act harmoniously with Hood's Sarsaparilla, 25c.

Recipe For Ham Croquettes. A cupful of finely chopped cooked ham, a cupful of bread crumbs, 2 of hot mashed potatoes, a large tablespoonful of butter, 3 eggs, a speck of cayenne. Beat the ham, cayenne, butter and 2 of the eggs into the potato. Let the mixture cool slightly and shape it like croquettes. Roll in bread crumbs, put in the frying basket and plunge into boiling fat. Drain and serve.

Serving Fruit. Oranges may be served whole or in halves on a bed of leaves, or with peeling cut and rolled down, or peeled and sliced. Polish apples with a cloth and pile in a high dish, yellow and red together. Use two or more kinds of grapes in the same dish if an effective appearance is desired. Bananas ought to be served in a dish with other fruits, as oranges or grapes.

Roaches. Roaches are among the most persistent pests that invade a house. Get equal parts of paris green and borax, and at night set around their haunts in old dishes. They will die like magic. Sometimes they are found in desks, especially in offices. This preparation scattered freely under the bottom will rid the drawers of them.—Household.

Mme. Henry Honore. Mme. Henry of Paris, the superintendent of the Paris Maternity hospital, has had her name added to the list of Lady Knights of the Legion of Honor. This high distinction is awarded to her for the excellent service rendered to the important and useful institution of which she is the guiding spirit.

Safety Riding Skirt. The necessity for a safety riding skirt has brought various kinds to light, but the latest one invented is practically a large apron in the saddle and a complete walking skirt when it is buttoned together. It does away with the disgusting bulge at the knee, and the wearer can walk and ride with equal comfort.—New York Telegram.

Two Savory Supper Dishes. Cheese puffs are made by taking an equal quantity of grated cheese and bread crumbs, writes Elizabeth Robinson Sewell in The Ladies' Home Journal. Soak the bread crumbs in as much milk as they will absorb. To each pint of crumbs allow 2 eggs. Season with salt and nut pepper. Place alternate layers of cheese and bread crumbs in a baking dish, add the eggs and bake about 15 minutes. Serve as soon as the dish is taken from the oven.

Red Topped Hoops. "When I was a boy," said a middle aged man, "everybody, men and boys, too, used to wear tops. Who does not remember the pride and joy of the small boy over his first pair of boots with red tops? What delight of early youth is there now to equal it? The first pair of suspenders is all very well, but what is there like the first pair of red top boots?"—New York Sun.

Have You Done Anything for that Cold? And Rhyme handed him a card in which he said: "I'm taking the advice of every blamed fool that comes along with a remedy. What's yours?"—Chicago Tribune.

Miss Fugate Food. "Living says: 'The use of sprouts is not the same but an effect of purity.' The craving for stimulants in children is shown by the desire for tea and coffee often comes from the same source—that is lack of a sufficient amount of the right kind of food. When a child is bored by his work less than is required to provide the amount of kind of food which is indispensable in order to be able fully to working power, an unobtainable, inexhaustible law of necessity compels him to have recourse to sprouts. He must work, but in consequence of his working power, he is unable to obtain the right kind of food. This is the cause of his nervous prostration. I now rest well and am able to do work of whatever kind. If I had not tried Hood's Sarsaparilla I should have been a cripple."

A Champion Walker. In these days when the severest tests are applied in every department of athletic exercise, walking, running, bicycle riding, tennis, etc., those who share in the contest must provide against emergencies. Harry Brooks, the champion walker, gives the result of twenty years' experience as follows: "Numerous statements relative to the merits of different plasters having been brought to my attention, I take this opportunity to state that I have used ALLEGRA'S POROUS PLASTER for over 20 years and prefer them to any other kind. I would further state that I was very sick with catarrh of the kidneys, and attribute my recovery entirely to ALLEGRA'S POROUS PLASTER."

A Program of Earnest Reforms on Great Public Questions.

THE JOURNAL is a Republican paper, but it independently advocates the interests of the people at all times. It places the public welfare above party interests, and believes thereby it serves its party and the people best.

A LEADER IN THE FIGHT.

For two years THE JOURNAL has led in the fight for a new deal. THE JOURNAL has been a leader in the fight against ring politics and the corrupt methods of the old machine. It is a recognized champion of the people's interests on the Pacific northwest. It fights its battles consistently within practical limits, and wastes no time or space on impracticable theories. It is not pessimistic, but firmly believes in the capacity of the people for self-government when acting intelligently and fully aroused to the necessity of so doing.

NOT A GOLDBUG FROM GOLDBUGVILLE.

A young lawyer in the legislature, who is still voting for Dolph, boasts that he is a "Goldbug from Goldbugville." He must be strangely ignorant of the temper of the people of Oregon, who have very little use for a Goldbug of any kind. But his remark is evidence of considerable courage of an insane kind, because the man does not live who can go before the American people anywhere, declaring that he is opposed to any kind of money other than gold for purposes of ultimate redemption of debts, and receive an endorsement.

FOR FINANCIAL REFORM.

THE JOURNAL advocates a national monetary system, uncontrolled by corporations:

"One Country, One Flag, One Money" should be the watchword of this, the land of the free. One money that's good for the rich and the poor, Be it gold, silver or paper, 'twill ever endure. If stamped by the nation and backed by its fame! One money for all men! Let that be the best, Be it paper, or silver, or copper or gold; For the northland, the southland, the east and the west! It should by the people be held and controlled.

THE JOURNAL is not a bourbon organ of the Wall street stripe, nor a partisan paper for bankers only. It does not believe in gold alone as the only means of ultimate redemption. We need gold and silver coined on equal terms and abundant national paper currency. Our country must pay all its obligations according to the terms of its contracts, but no more public obligations must be created payable in gold only.

In addition to all the gold possible in circulation, silver must be restored to its rightful place as primary metal currency where it had stood for over eighty years before it was fraudulently demonetized in 1873. It was the regret of the Patriot President Grant's life that he allowed that bill to become a law, and it is the duty of all patriots to labor to repeal that law at the earliest moment. Our country should not wait for an international bi-metallic conference with England, Germany or any other country controlled by the Rothschilds, but we should demonetize silver at once as legal tender money.

THE CRIME OF 1873

In surreptitiously repealing free coinage 16 to 1 is only surpassed in its depressing and devastating effects upon the production which insists on extracting the currency by retiring with gold bonds over 200,000,000 of paper money, redeemable in gold or silver, at the option of the government. The policy of President Cleveland in borrowing gold of England to redeem silver certificates, which by law are specifically redeemable in silver only, except the closing of the financial conspiracy that is oppressing the masses so that virtually they are making the
