THE CAPITAL JOURNAL

SALEM, OREGON, APRIL 6, 1896.

COLLEGE MEN A POWER.

A pleasant reporting young man, of sanguine nature, yesterday, on solicited reminiscence, made up a good interview. Lured an audience at the college chapel and right, committee included, to chair at request of the argument professors of the University of Oregon, the very excellent of different parts of the state in higher education. Albany College and the Pacific were at this time represented with one of the popular rabbis. The following are some of the things worthy of notice.

"It was not my ambition in the interest of any particular college, but to induce all students to go forward, to decide to their interests an ambition to foreordaining the great.

"Every time I speak there is one less man, one less woman who has not graduated and gone home for the other to live to marry. The man who is not the higher education has been the one who ruled. In 1870 out of 215 members in the house of representatives 132 were college graduates, while in instance the proportion was 1 in 50. The chances of getting to congress are enhanced 40 times by having a college education. 7 of the first 8 justices of the supreme court were college men, 6 of the 10 signers of the declaration of independence were college men. The men at the head of the great industries of the country are educated men. At one time a higher education meant that a man was to be a lawyer, doctor or minister. Now there are many fields. The college man now has a great opening in architecture in engineering, in farming, which when properly done is a learned profession. Once in ten men of fortune now are making a failure of their business, because not prepared for it.

"In mathematics the State is another great opening. Out of every 100 in the freshman 35 fail; 40 fail before and 25 throw them, because they enter business without proper preparation. The young man entering one of the learned professions without a college education is wasting his time. Statistics show that the young man with a college education has fifteen years advantage in the race for success over the man without such an education. The former gains between 25 and 45 years of age, the other between 45 and 60 years of age.

"Today the young man meets great competition in business, not appreciated by our ancestors, and he must be fortified. The best equipment is a college education. The rich men of the country, though partisan and educated millions almost universally in higher education. Rockefeller, $12,000,000 worth, Stanford, $10,000,000 worth, being cited as examples.

"The reason why college men are better fitted for life is because they have not only mastered facts necessary to their business, but they have gotten the power to think, to concentrate their thoughts on a problem and get down to business at once; their minds have been trained, the regular exercise to contrast to the untrained, constant wide-minded men; because they have the great assistance of life and have better discernment of right and wrong and the will to do what is right. The greatest of all college requirements. The college men are the power which keeps our national government from rotting.

President Chapman possesses a good delivery and a presence that commands confidence and respect. Those who were fortunate in hearing him felt that they had been given a literary treat.

The Oregonian is kindly telling the state convention of Republicans what kind of platform they shall adopt. There is no harm in that so long as the Oregonian does not forget that the A. P. A. is a bigger man than any newspaper, and that the people are bigger than any man or party.

It is hoped that the transcontinental Oregon railroad committee will be unable to collect a salary. If the should be the case the members would have to depend entirely on the railroad companies for compensation.

April 1 is the day fixed by law to begin legal extermination of trust.

Oregon has entered on the season of flowers.

The safety and convenience of the Yaquina harbor lights were tested last Sunday and Monday nights, and their great advantage to Yaquina bay commerce demonstrated. Sunday night was one of the blackest nights ever seen, and the Newport light was plainly visible. Monday night was a little better, and the lights could be seen between 8 and 9, fully an hour after darkness had closed down.

SUGGESTIVE AND EPIGRAMATIC.

The duty of legislatures is to legislate and administer. So the official state is not far away in the great national contest of 1896, an unconstitutional Governor opens Congress Constitutionally. The fact that the state is overwhelmingly Republican makes it inconvenient, not only to organize, but it is more inconvenient open act of revolution for people of our own party and the manner of the people wishes. A partisan victory without intelligence will not give us good government.

It is our duty, as the party upon which in all probability will devolve the duty of maintaining the national government for the four years ending the century into the new century, to educate the people on the great moral and economic issues without which our country cannot prosper. For this purpose clubs must be organized in every precinct and in every county. Good literature must be circulated. The great means of publicity is the editor and reporter, and the former question must be discussed thoroughly. Civil service reform and the great moral reforms undergoing a game of insanity and a cleaner administration of public affairs must not be overlooked. We must learn from the new party, the Populists, to circulate strong newspapers and mould literature on all these subjects. A letter from a leading Republican of Linn county informs us that the Populists are circulating their newspapers, mostly Southern, at 10 cts. for three months, all through that county. Those papers make converts to Populism and it is time we were for Republicans to get to work.

An old-fashioned "whip-saw mill" is situated on the place of Nathaniel Hopkins, about two miles north of Dallas. The mill is built by sawing out the side of a hill to answer the purpose of a sill, and then a platform is built above. Onto the platform a sawing is rolled and then with an old whipsaw the lumber is made. One man stands on the platform and one in the pit. The duty of the man underneath is to pull the saw down and the man on the platform pulls it up. They good sawyers being able to cut about 200 feet of lumber daily. Mr. Hopkins uses the mill to saw out his timber for wagon making.

A Spokane firm is shipping ten car loads of potatoes to St. Paul, the cash being paid for them as fast as shipped. The average paid for potatoes in Spokane is 15 a ton. Several carloads were ordered from Colfax for Omaha last week, the growers receiving a slightly higher price than that mentioned. At Tekoma, the Herald notes that some and outside buyers have been bidding up potatoes quite strongly, and fully 100 carloads were sold at 20 and 25 cents, with late offerings as high as 30. The potatoes were largely for eastern shipment.

J. Hewitt and Chas. Wolfe have purchased a site at Kittitas, Wn., and are erecting a cheese factory, using one vat and having 50 cows on a starter. They will handle 10,000 pounds of milk, and produce 1000 pounds of cheese daily. The building will be 30x40 feet in dimensions and two stories high. The creamery business has apparently an rapidity in the Kittitas valley that the number of cows is insufficient to supply the various plants.

TIRED, WEAK, NERVOUS, Could Not Sleep.

Prof. L. D. Edwards, of Preston, Idaho, says: "I was all run down, weak, nervous and irritable through overwork. I suffered from brain fatigue, mental depression, etc. I became so weak and nervous that I could not sleep. I would arise tired, discouraged and blue. I began taking

Dr. Miles' Nervine

and now everything is changed. I sleep soundly, I feel bright, active and ambitious. I can do more in one day now than I used to do in a week. For this great good I give Dr. Miles' Restorative Nervine the sole credit.

It Cures."

Dr. Miles' Nervine is sold on a positive guarantee that the first bottle will benefit. If it fails, your druggist has a right to return the money. Dr. Miles Medical Co., Elkhart, Ind.

Mr. M. C. Hynes
Hamilton, Ohio.

The Same as Bread

Hood's Sarsaparilla on the Table at Every Meal

"In my opinion Hood's Sarsaparilla has not an equal as a blood purifier. I have served 6 months for Hamilton's troops and I saw three the best of good. I have not been attended by a physician for four years. My wife was suffering with sore mouth and

Feeling All Tired Out.

She was severely afflicted but upon my prevailing upon her to take Hood's Sarsaparilla and Hood's Pills started differently in a short time. Now she is quite well. We have great faith in Hood's Sarsaparilla."

Hood's Cures

Hood's Pills cure all liver ills, easy to take, easy to operate. 25c.

Thirty Days News of the World, Including Oregon, for 25c (silver); 60 days for 50c; 120 days for $1; $3 for one year. No papers sent but what are ordered and paid for.

A Program of Earnest Reforms on Great Public Questions.

THE JOURNAL is a Republican paper, but is independently advocates the interests of the people at all times. It places the public welfare above party interests, and believes thereby it serves the party and the people best.

A LEADER IN THE FIGHT.

For two years THE JOURNAL has led in the fight for a new deal. THE JOURNAL has been a leader in the fight against ring politics and the corrupt methods of the old machine. It is a recognized champion of the people's interests on the Pacific northwest. It fights the battles consistently within practical limits, and wastes no time or space on unpracticable theories. It is not pessimistic, but firmly believes in the capacity of the people for self-government when acting intelligently and fully awakened to the necessity of so doing.

NOT A GOLDBUG FROM GOLDBUGVILLE.

A young lawyer in the legislature, who is still voting for Dolph, boasts that he is a "Goldbug from Goldbugville." He must be strangely ignorant of the temper of the people of Oregon, who have very little use for a Goldbug of any kind. But his remark is evidence of considerable courage of an insane kind, because the man does not live who can go before the American people anywhere, declaring that he is opposed to any kind of money other than gold for purposes of ultimate redemption of debts, and receive an endorsement.

FOR FINANCIAL REFORM!

THE JOURNAL advocates a national monetary system, uncontrolled by corporations:

"One Country, One Flag, One Money" should be
The watchword of true, the land of the free.
One money that's good for the rich and the poor,
One standard of worth, no matter its name,
Be it gold, silver or paper, 'twill ever endure
If stamped by the nation and backed by its fame!
One money for all men! Let that be the best,
Be it paper, or silver, or copper or gold;
For the northland, the southland, the east and the west
It should by the people be held and controlled.

THE JOURNAL is not a bourbon organ of the Wall street stripe, nor a partisan paper for bankers only. It does not believe in gold alone as the only means of ultimate redemption. We need gold and silver coined on equal terms and abundant national paper currency. Our country must pay all its obligations according to the terms of its contracts, but no more public obligations must be created payable in gold only.

In addition to all the gold possible in circulation, silver must be restored to its rightful place as primary metal currency where it had stood for over eighty years before it was fraudulently demonetized in 1873. It was the regret of the Patriot President Grant's life that he allowed that bill to become a law, and it is the duty of all patriots to labor to repeal that law at the earliest moment. Our country should not wait for an international bimetallic conference with England, Germany or any other country controlled by the Rothschilds, but we should remonetize silver at once as legal tender money.

THE CRIME OF 1873

in surreptitiously repealing free coinage 16 to 1 is only surpassed, in its depressing and devastating effects upon the producer, by the plutocratic policy of the present administration which insists on contracting the currency by retiring with gold bonds over 800,000,000 of paper money, redeemable in gold or silver, at the option of the government. The policy of President Cleveland in borrowing gold of England to redeem silver certificates, which by law are specifically redeemable in silver only, caps the climax of the financial conspiracy that is oppressing the masses so that veritably they are making bricks without straw.

PUT IN SOME STRAW

by circulating a newspaper that is distinctly and always on the side of the People.
