

THE CAPITAL JOURNAL.

(DAILY AND WEEKLY).

BY HOOPER BROTHERS.

TUESDAY, APRIL 2, 1886.

Boon good roads and they will boons you.

Give us genuine American bimetallism.

Bismarck is still the biggest man in Europe.

Wanted: Republican leaders and Republican leaders.

It is stated Eli Perkins has a new joke. Important if true.

Now is the time to buy a home or land in the Willamette valley. It will never again be so cheap.

Tacoma bankers can give Portland bankers pointers how to do a big land swap without any capital except public money.

Jesse H. Settemiller, one of the founders and the millionaire business man of Woodburn, is the first mayor of the city.

While the newspapers are fighting the politicians and boodle, the banks at Tacoma are getting away with the people's money.

Until we have genuine bimetallism, prices of labor, rents, land and products will be low; interest, taxes and gold will be high.

The deficit in the government's revenues this year will be only \$25,000,000—a little more than in some country newspaper offices.

It looks as though the farmers and fruit growers on the Garden road would be able to make their co-operative cannery go.

The Oregonian says silver is the poor man's money. Well, what of it? The poor man's money sooner or later comes to be the rich man's money.

The last legislature passed an act extending the time for redemption on property sold under foreclosure of mortgage from four months to one year.

There should be a good gravel road through the heart of Polk county to Salem. That would be worth more to our city than several railroads on paper.

J. T. Hayne, editor of the A. P. A. organ at Portland, has been unable to qualify and give the required bond of \$150,000. Allen, the old clerk, will hold over.

Lagewell denies that he ever said some but a few silver men can be elected president in 1886. You generally find him in a criminal case retained for the defendant.

It is not too late for the next week to get your fruit trees pruned in proper shape to get the best results this year and in the years to come when fruit may be worth big prices.

The Oregonian continues to say the Republican party is in great danger because Dodge was not re-elected. The danger is nothing to what it would have been had he succeeded.

A bimetallic party is a strong and intelligent bimetallic voice but its speakers are single gold standard men. Who says money is not capable of forming her own opinion in matters political?

The Eastern Oregon Republicans have never given THE JOURNAL less. Mr. Taylor of Polk county can be stopped from publishing his impressions and against the bimetallic cause by writing to:

What Oregon has done is payable in silver, look out for a time in the white metal. The bimetallic will not be done in payable in gold. In that case, look out for a majority to that article.

It looks as though one of the Clark county, of Texas, would be making a gold standard issue at the House and the other would be an issue of the Joint House, or a time after next at Congress. What will they do, talk will be discussion.

PRESS OPINIONS.

The railroad commission, it is declared, cannot be extinguished, which is a great pity.—Albany Herald.

The amounts upon silver are made by the creditor class with the single purpose of depreciating the volume of their income. They receive the same number of dollars, but the dollars have a larger purchasing power by reason of their scarcity.—Eugene Guard.

Bismarck is a bigger thing than ordinary politics and the people are beginning to find it out. The great industrial and commercial movements that create new markets give productive employment to thousands, furnish business for our transportation lines and bring prosperity to the farmer, the mechanician and the professional man are of far more importance than party wrangles based upon sectional prejudice. Any community that is able to swap a position for a new mill will have the best of the bargain.—Eugene Guard.
