WALKING IN THE RAIN.

A Form of Open Air Exercise That Has Certain Attractions of Its Own.
"What am I going to do?" repeated the returned exile. "Why, I'm going to take a walk in the rain. It's a trick I learned in England, dear boy, and it's one of the most charming forms of exercise on top of this green earth. You see my costume—well, it's the dead copy of that in which a Cornish squire of my acquaintance used to walk in rainy weather over the downs that make up most of his estate. My laced shoes, my heavy cork soles and have just been treated to a good rubbing in of cold cream. I have stent woolen stockings and knickerbockers on, so as to avoid the flapping and contact of the wet trousers, and this cape mackintosh comes down pretty near to my heels. My underclothing is thick, but not heavy, and my clothes are of rough tweed that wouldn't be damaged if you let 'em lie in a stream for a week. Instead of a collar, I wear a light silk scarf around my neck, over which I turn my coat collar and button it up so. This hat is a waterproof fore and after.

LOOK OUT FOR BREAKERS AHEAD

when pimples, eruptions, boils, and like manifestations of impure blood appear. They show you what you need—a good blood-purifier; that's what you get when you take Dr. Pierce's Golden Medical Discovery.

SCROFULOUS ABSCESSSES.

Mrs. Belle Sweeney, of Flat Top, Mercer Co., W. Va., writes: "About four years ago I took scrofulous abscesses and did everything that doctors and others prescribed, but only got worse. Several abscesses formed about my neck and breast, discharging a quantity of matter. I got so weak I could scarcely walk about the house. I read all the medical works I could get hold of, and among the rest, read some of your works. You described my case, and recommended Dr. Pierce's Golden Medical Discovery with his Pleasant Pellets. I prepared some and commenced using them and soon began to mend. In six months my abscesses were all healed up. I am forty-five years old and believe I am as stout as I ever was in my life. I used some of your Golden Medical Discovery with the Pleasant Pellets, and used nothing else, and I began using your medicine."

It Went Off.

A story is told of a certain showman who combined with the ordinary circus performance a display of fireworks. At one town he advertised the "Battle of Trafalgar," with burning ships, blazing oceans and other magnificent effects. He drew such a vivid picture of that great naval encounter that the people from the entire countryside were attracted to see it. When the time arrived, the showman brought his guiding hand to bear on the set piece, applied the match in the usual manner and retired to await results. Several minutes passed, but no battle ensued. The showman then stepped forward and addressed the crowd.
"It has not went off," he remarked and proceeded to investigate.
Again the same result followed, and again.
"It has not went off, ladies and gentlemen," continued the showman. "I will now show you the great earthquake of Lisbon." He gathered the fireworks together and filled a barrel with them. He poured turpentine over them and sprinkled the lot freely with gunpowder. Once more he applied the torch, with astonishing results. There was an explosion, and when all was over he gave a parting address.
"It has went off, ladies and gentlemen, and so has three fingers of my hand. Good evening, and many thanks. The earthquake will not be repeated."
—Pittsburg Dispatch.
Ethel's Choice.
Amy has very beautiful hair, which curls in lovely fashion. Her next door playmate, Ethel, has straight hair and is envious of Amy's curls.
The other morning Ethel had been very naughty, and her mother, who was born in Boston, was obliged to say: "Ethel, go directly into the other room. I am going to punish you right straight off."
Ethel whimpered, "Mamma, can't you punish me the curly way?"
"What do you mean?" demanded the mother in astonishment.
"I heard Amy's papa tell her this morning that he was going to give her a whipping that would make her hair curl, and if—if it's just the same to you I'd rather have that kind."
—Chicago Post.
Rocks That Float in Water.
A geologist who is well up in his business can name a dozen or twenty different specimens of rocks and minerals that have less specific gravity than water, and which will, if tossed into that element, float on the surface. Hubbleite is one of the best known representatives of that class. The common pumice stone is another example. The rock with the very least specific gravity known is "damari," a substance found in an extinct volcano in Samaraland. Its atomic weight is .5, or exactly one-half that of hydrogen.—St. Louis Republic.
RAILROAD JOTTINGS.
Berlin is to have an elevated railroad like New York, with the difference that electricity is to be used as the motive power.
The Lake Shore Electric Railway company has been incorporated, with a capital of \$10,000,000. The new line will run from Chicago to Milwaukee.
The Monterey and Mexican Gulf Railroad company has arranged with the Mexican government to extend the road from Trevino to Sierra Mojada, and thence to Mazatlan, on the Pacific coast.
All the employees of the Lehigh Traction company at Hazleton, Pa., are insured by the company. This is done in order to protect the men in case of any injury, or perhaps death, that they might sustain in an accident.
To Cure the Law's Delay.
The chief justice of Georgia is in favor of the admission of women to the bench. If this were done, it is quite probable that there would be less of the law's delay. The faculty woman enjoys for getting at the truth of things quickly should make her a very desirable judge.—Memphis Appeal-Avalanche.
