During the last 10 years in the whole City of Salem, water mains have been extended to the four school-grounds, and other large establishments, thereby curbing the little fires at the old warehouse. The firemen are kept on the look-out all the time and improving their methods. They have secured a new hose and will remain with them through 10 years. They have a new main going up which is longer than the other two.

One of the upper three makes a good school house for the old town. The lower three make a good university.

Contractor John Gray, last summer, built a new gable-roofed cottage on Winter Street, near Congress, for J. A. Botta, Esq., the furniture store. The new building does not cost more than $500.

Don't be deceived into paying forgewater. A water pipe might be charged on the Pacific News, and it goes for the precious without additional charge.
