The above table of figures, compiled from the official government statistics, shows that for three years of Democratic rule and five years of rebellion from 1860 to 1865 inclusive there was a deficit in the national treasury. From 1866 to 1873 inclusive there was a Republican surplus to apply to wiping out the national debt. Cleveland went in March 4, 1893, and for that year the surplus nearly disappeared. In 1894 and 1895 the deficit due to Democratic mismanagement of revenues and finances ran up to over \$112,000,000. Draw your own conclusions.

In using corrosive sublimate to prevent scab on potatoes, farmers should be very careful, as it is a deadly poison. Never allow the solution to stand in metallic vessels or where any live stock could have access to it.

A hen will yield in solid matter about four times her own weight in one year. A cow would yield about two tons of butter or cheese at the same rate of product as the hen. While a hen will raise a dozen chicks and the cow will rear but one calf.

The sooner farmers quit raising the more bulky material which goes to pay the large dividends on watered railroad stock the better. More mutton, wool, butter, eggs, poultry, beef and pork means less freight and bigger profits to the farmer.

Fruit men should not neglect to attend the fruit growers' convention to be held at Salem on the 25th of this month. It is of great importance to fruit growers to attend, as there will be methods and wages and means discussed of properly marketing green fruits of all kinds, which will be of pecuniary interest to all.

Messrs. Catterlin & Kent, of Salem, were up to Scio last week and signed a five year lease for a building to be used for a creamery. They stated that the machinery was already for shipment and they expect to fit the building up with the latest improved machinery and expect to have the plant in running order sometime next month. In the meantime the farmers will rustle up a large cow list and before they know it they will live in the midst of a prosperous dairy district.

There is more money made from the well groomed cow, and no attention returns a handsomer profit -than the frequent use of the comb and brush upon the dairy cow. Right here is where a check can be put upon twothirds of the imparities we drink in milk. For a perfection dairy every cow should be well groomed before she is milked. The difference in the amount of milk alone will pay for the trouble. The perfect health of the absolute cleanliness. She will keep with less feed and make higher grade
