Poultry Notes.

Give poultry extra care these warm days. Do not allow the water vessels to become putrid and foul.

About the only business that there is no trust in is the poultry business.

The fact is that the American hen can lay eggs cheaper than any foreign hens.

Of the \$20,000,000 worth of eggs imported by England America supplies less than one per cent.

There was never an over-production of eggs. What a smoke there will be if this ever occurs.

After a hen is two years old she will not more than the worth of her eggs before she begins to lay, because she will moult so late in the season.

If the hen that lays 8 cent eggs got proper credit she would be marked up for eating what the 83 pork wasted.

Do not make your chickens try to get under the grass for shade, but put them up something for shade.

Electric Bitters.

Electric Bitters is a medicine suited for any season, but perhaps more generally needed when the liver is torpid and sluggish and the need of a tonic and alternative is felt.

The Guard says the Eugene creamery now receives about 1000 pounds of milk daily and seems to think they ought to have twice that much.

2500 Reward \$100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is catarrh.
