Gun Boats Planned.

If Japan carries out the plans she has made, she will have a flotilla of gunboats that can steam 40 knots an hour. The vessels are to be driven and lighted by electricity, and the twin screw propellers placed a little above amidships. The boats are to be wholly or partly submergeable, and to make this process easy they will be little more than mere hulls, devoid of court. These were taken before signed entirely as an attempt to embody the principles which have been advocated by so many naval experts of putting into a small compass with Salem, is the administrator of the extraordinary speed fighting power estate.
