LABOR'S SHARE.

PROTECTION CAN GIVE NOTHING TO WORKINGMEN WHILE LABOR IS ON THE FREE LIST.

The Laborer Now Competes With Lowest Responsible Bidder of the World—Low Prices Stimulate Both Consumption and Production—Example of Steel Rail Pool.

One of the best speeches made in the house while the Dingley bill was being discussed was made by John C. Bell of Colorado. With facts which are indisputable and logic which is unanswerable he exposed many of the fallacies of protection. His exposure of the absurd claim that protection helps the workingman is especially good. Here is a part of it:

"But our friends upon the other side say that they levy a tariff for the benefit of the wageworkers. I say to you that any tariff bill, I care not from whom it comes, that does not contain a provision for prohibiting the free inflow of immigration from foreign countries is oblivious of the rights of labor and is opposed to the interest of all wageworkers. [Applause.]

"Protection is always asked in the interest of others. Now, observe how it is asked in behalf of the poor laboring man—just enough to cover the difference between the European scale of wages and our own. What hypocrisy! Who ever heard of the laboring man getting rich manufacturing? The statisticians clearly figured from the census of 1880 that about 6 per cent on our dutiable list would cover the difference between the European wage schedule and ours, or that about 18 per cent ad valorem covered the entire labor cost of our list of 1880. While the manufacturer then asked for the poor laborer his 6 per cent he got for himself at the hands of congress six times 6 per cent.

"Is there any reason why a high tariff affects wages injuriously? Yes; by enabling employers to build up a vicious trust system for the manufacturer and against the laborer. The high tariff makes the manufacturer complete master of the wageworker.

"In the review of R. G. Dun & Co., in their weekly review of trade, dated Feb. 12, it is stated:

"'No other event of the week approaches in importance the disruption of the steel rail pool. In two days,' says the report, 'after it a greater tonnage of rails was probably purchased than the entire production of the last year, reported at 800,000 tons. And instead of $28 in December and $25 in January, $17 is now the price at which works east and west are seeking orders. And further,' says the report, 'the Carnegie company has been selling at $17, Chicago delivery. These sales will employ many thousand hands, with an important decrease in the cost of track laying on renewal of railroads.'

"Now, my friends, let me ask you, was it the rising or lowering price that employed these thousands of men? Our friend Mr. Hopkins of Illinois tells of the benefits of a higher duty on iron and steel. Did the steel rail pool need more tariff?

What is the difference in giving the manufacturer a double profit through a high tariff or through a pool? Do they ever share the profits of the pool with labor? No. Will they ever share the profits of a tariff? Never.

"It takes no political economist to answer these questions. If the United States manufacturers can reap twice the profit under a high tariff by limiting themselves to the home market and running half time, why should they run full time and invade foreign markets? They never will. They will sit down comfortably and sell their limited supply of goods for increased profits, making them more than whole, while the laborer tramps the country in search of work just as he now does under the trust system.

"It is unfortunate that the humdrum of the tariff has been sounded in the ears of the people until many of them really believe that foreign trade is unimportant, if not a curse. Why did the breaking of the steel rail pool put so many men to work? It was because the consequent lowered price for iron and steel brought most liberal orders from abroad as well as at home. Suppose the tariff had been prohibitive and we would have been confined to the home market. Would the manufacturers have made so many goods? No, but they would have doubled their profits on what they did make. The people could not have bought so many because of the increased price. Who would have suffered? First, the workmen, because they would have had fewer goods to make; secondly, the consumer, because he could not have bought so many at a higher price. Who would have been benefited? The manufacturer, because he might have made and handled less goods, made a double profit, and really have gained, as he would have had fewer to handle for the same profit.

"This bill will increase the manufacturer's profits on the individual articles, but will lessen the power of the people to buy or use his wares.

"It is the poverty of the buyer, not the producer, that must be relieved before things will thrive.

"The manufacturer has every facility to produce, but no facility to sell.

"It is the consumption that must first be stimulated, and that will stimulate production.

"There are but a few crumbs in this bill to aid the oppressed farmer of the interior or the laborer, but thousands of things to further oppress him. Higher sugar, higher salt, higher lumber, higher clothing, higher manufactured products and absolutely nothing to raise the price of labor—a high tariff on labor's products, limiting the demand for his labor by narrowing the market, but throwing the ports wide open for the free importation of other laborers from foreign countries to freely compete with his work.

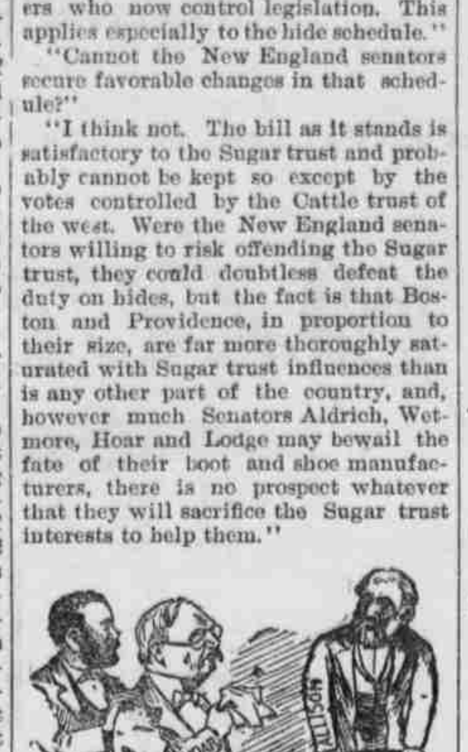
"Consistency, thou art a jewel!"

Swapping Free Hides For Dutiable Sugar.

"The senate tariff bill as a whole," says ex Congressman John De Witt Warner, "is a notice to eastern manufacturers of what they may hereafter expect. Hitherto they have considered protection as a sort of providential arrangement by which they were enabled to feed on the rest of the country. Now, like Polonius in 'Hamlet,' they are invited by 'a certain convocation of politic worms' to a supper 'not where they eat, but where they are eaten.' The manufacturers of New England, New York and Pennsylvania are to take their turn at being mulcted for the benefit of others who now control legislation. This applies especially to the hide schedule."

"Cannot the New England senators secure favorable changes in that schedule?"

"I think not. The bill as it stands is satisfactory to the Sugar trust and probably cannot be kept so except by the votes controlled by the Cattle trust of the west. Were the New England senators willing to risk offending the Sugar trust, they could doubtless defeat the duty on hides, but the fact is that Boston and Providence, in proportion to their size, are far more thoroughly saturated with Sugar trust influences than is any other part of the country, and, however much Senators Aldrich, Wetmore, Hoar and Lodge may bewail the fate of their boot and shoe manufacturers, there is no prospect whatever that they will sacrifice the Sugar trust interests to help them."



Senator Hoar—That (free) hide has been in the family 25 years, and it almost breaks my heart to part with it.

Senator Allison—You needn't snivel. Keep your old hide if you want to, but you don't get any sugar (profits). See?

"Sugar Trust Exists No Longer."

We are assured by The Sugar Trade Journal of May 13—organ of the Sugar trust—that "if ever a monopoly existed in the sugar refining business it exists no longer, and it is not likely that it will ever be renewed." This is delightful news. The Journal was discussing an amendment to the senate bill to have refined sugars pay the same duties as raw sugars in cases where the manufacture is controlled by a monopoly. If this "visionary proposal" should pass the senate, it would jeopardize the tariff bill and the Sugar trust's tens of millions of surplus profits, which are so near at hand that the mouths of Havemeyer and Searles are watering for them. The Sugar trust trembles at the prospect and tries to keep up its courage by having its organ inform the world that "A lot of such visionary proposals will, no doubt, be introduced while the bill is under discussion, but in the end the sound judgment men will control and a tariff bill be passed without very much change from the senate schedule."

The trust may be right. It usually is, for it can predict what will happen to the sugar schedule of the senate bill. It knows what demands will be made by its agents and tools in the senate, and it also knows the power of those who make demands to enforce them. It puts $70,000,000 against the interests of 70,000,000 people, and it knows from experience which has most weight in the senate, where two or three hold the balance of power.

No, there is no sugar trust and never was one.

"When the devil was sick, the devil a saint would be."

GIVES STRENGTH TO MEN.

It is remarkable fact that a man never appreciates the sufferings of others until he himself, has passed through the fire of pain or remorse. Then it is that he looks around for those who are suffering; he wants them to profit by his experience; he gives his time and

money gladly for the benefit and never tires of his zeal. There are plenty of men weak and worn out, struggling with remorse and fear, and the natural outcome of habits that brought incapacity; a sense of lonesomeness and a feeling as if the best side of life had been banished forever. Such men should write to Thomas Slater, Box 390, Kalamazoo, Mich. He will send free of charge by mail, in a plain sealed envelope full particulars about the method he used, and this will enable any man to get a complete cure at home. It is the method Mr. Slater used to cure himself of the troubles that sap the strenght and vigor. The cure was so complete, so satisifying and such a wonderful change from his former condition that he will gladly tell others all about it, sending all particulars. He figures that he doesn't know of a better way to show his appreciation of his own cure and the sufferings of others. There must be generous men in this world to off-set the tide of avarice. Write to Mr. Slater.—it will cost nothing for his description aad method

Samples may be seen at the commissary of the asylum. Goods must be in accordance with samples, and be in original packages, when possible. Other things being equal, articles of Oregon production or manufacture will be given preference. Delivery of supplies will be required within fifteen days' notice of acceptance of bid Each bid must include all the items and totals in full, with the exceptions of flour, meat and fish. Vouchers will not be issued until the bidder has completed his contract, and payment must await appropriations by the legislature. A copy of the advertisement must accompany each bid, and the name of the class of supplies be inscribed on the envelope. Auditing officers are prohibited from confirming accounts of purchase when the advertisement does not contain a full description of the articles to be purchased. Each bidder will be required to furnish with his bid a certified check in an amount equal to ten per cent. of his bid (save that for flour the check is to be for $300, for meat $250, for fish $75), payable to the order of the board, to be returned in case his bid is rejected or his proposal complied with. The right to reject any and all bids is reserved: Bids will be opened at the governor's office at 2:30 o'clock p. m., Tuesday, July 6, 1897.
