THE OREGON SENATORSHIP.

The people are anxiously awaiting the outcome of the next Oregon legislature on the senatorial question. In 1895 the friends of the then Senator John H. Mitchell opposed the re-election of the late Hon. Joseph N. Dolph because he was a gold standard advocate.

Geo. W. McBride and his friends in the legislature were ostensibly for the gold standard and were supporting Mr. Dolph, but in the end it appeared that they were really foes of the most dangerous character, because they were inside of the Dolph lines and knew what was going on, and understood how to play the cards, so as to enable Mr. McBride to become a Senator from Oregon.

The McBride and Mitchell factions have since united and were able to make deals to secure the federal patronage of Oregon and will no doubt use it to elect, if possible, one of their combine senator in 1899.

In the last legislature this powerful coalition of McBride and Mitchell and their personal followers, backed by the power of federal patronage, sought to organize the legislature to return John H. Mitchell, but failed. The legislature was deadlocked, and the two factions were unable to elect a senator at once and go on with the legitimate business of a general assembly of the chosen representatives of the people? It is to be hoped it will. That is what the people expect.

But does anyone believe such will be the case? The people have no confidence in so fortunate an outcome. The Dolph-Scott-Simco Corbett-Lord wing of the Republican party, who have forced the party onto a solid, honorable gold standard platform, without dodging, straddling or deception, are not going to surrender the legislature to the McBride-Mitchell combination. They declare that Mitchellism must be eliminated from the Republican party even though it has the apparent sanction and endorsement of the administration.

What will the twenty-four members of the legislature chosen by the Union party do on this question of the senatorship? It is not presumed that they will assist either of the Republican factions to elect a senator. It is their duty to act in the interest of the voters who elected them. Those voters were not Republicans, and the representative principle requires that the members of the Union party take no part for or against any Republican candidate. For once let the aspirants in this dominant party settle their own differences, make their own bed and lie upon it. Let the Union members keep their hands clean of all corruption. Office jobbery and corrupt methods cannot be continued in the election of senators with the consent and co-operation of the Union party and have that party live and exist as a People's organization or a Reform party. Let this be clearly understood in advance of the legislative meeting.

Eugene-Claud Branton, who has been charged with murder on the night of June 15th on the Cascade Divide east of McKenzie bridge, got off train yesterday at this place and walked up the street. He was recognized and arrested.

A GOLDBUG DODGE.

In the course of a half column of editorial abuse of Mr. M. A. Miller of Lebanon, because Mr. Miller had the temerity to assert that the "endless chain" could be stopped by simply paying silver to the chain-saw, when they make a raid on the treasury, the Oregonian says:

"Let it be known that the treasury will redeem in silver at its nominal value, and in silver only, the \$400,000,000 in silver certificates and \$100,000,000 in treasury notes of 1890 now outstanding, and other silver currency, both coin and paper, will instantly lose its gold value and descend to its silver bullion value. The parity will be destroyed, because the machinery for its maintenance has been abandoned."

In reference to this it may be said of Col. Scott, as he says of one of Mr. Miller's Statements:

"He proves it. How does he prove it? By simply declaring it. He says, 'That is enough.' That is all the proof that any goldbug ever deigns to produce for that particular piece of monetary information. It is all the proof there is. On the other hand it might be pointed out that, from the resumption of specie payments until Secretary Foster made a different ruling in 1890, the government always exercised its option as to whether it would pay gold or silver in redemption of greenbacks; that there was never any trouble about keeping up the gold reserve in all that time; that there never was even an attempted run on the gold reserve in all that time, but once, and that Secretary Manning squelched that incipient run, in its infancy, by using the yet expedient that Mr. Miller suggests; and that in all that time our 'silver currency both coin and paper,' retained its gold value and failed to ascend to its silver bullion value, 'nor was the 'parity destroyed.' It may also be pointed out, as it has been pointed out ten thousand times, that the French government refuses to be bull-dozed, uses its own option as to the redeeming its papers in gold or in silver, that a 'run on the gold reserve' is there unknown, and that gold, silver and paper still remain permanently at par. How do our goldbugs account for it. They don't account for it. They don't have to. They dodge it."

HOME INDUSTRIES. One of the first needs of this city is more loyalty to home enterprises. The Dolph-Scott-Simco Corbett-Lord wing of the Republican party, who have forced the party onto a solid, honorable gold standard platform, without dodging, straddling or deception, are not going to surrender the legislature to the McBride-Mitchell combination. They declare that Mitchellism must be eliminated from the Republican party even though it has the apparent sanction and endorsement of the administration.

A number of Salem firms have enlarged their business plants and thus given employment to people at home, besides making Salem a most desirable point to trade and are drawing large mail trade from all over Western Oregon. All such promoters of home industry deserve the support of every loyal Salemite.

As bearing on this subject the following, from the Tacoma Ledger is apropos: "In past years thousands of tons of berries and fruit have gone to waste in the Puget sound counties because of low prices or lack of market. Of late an improvement of these conditions has been secured through the establishment of local canneries and drying plants. These establishments have not only offered a market but have proved profitable investments. These canning and drying plants are not expensive and can be established and operated on the co-operative system with local capital, with good results to all concerned."

We let tons of fruit rot under the trees, and leave rich land lying idle, while we use California canned peaches, tomatoes, peas, beans, etc., These canning and drying plants are not expensive and can be established and operated on the co-operative system with local capital, with good results to all concerned."

There is a "Bull" in Tacoma, Washington that plays a fiddle, a "Coo" that blows a big brass horn. Truly, Tacoma is a city of destiny.

The present city administration deserves thanks for doing a little something to Willson avenue. It needs drain and the irrigation.

A Salem paper announces that its editor has gone to the ocean. Well what of that; he's not so all red important that he could expect the ocean to come to him.

The editor of Braun's Iconoclast, published at Waco, Tex., pays his respects to the editor of the Oregonian in the July issue of that paper. Scott is rising into respectability in his old age.

Eastern tourist to Seattle citizens: "Yes, I just arrived. Am tired out. Must have some rest. Where is a good quiet place, where I can enjoy solitude?" Seattle citizen: "Go to Tacoma."

And have the LARGEST SALE of any Patent Medicine in the World 25c. at all Drug Stores. canned corn from Maine, and other vegetables drawn from the four quarters of the globe, that we could just as well raise here. In the meantime the canny lies idle, or, when it runs, is obliged to market its product at a distance. It is safe to say that there are less dried prunes used in Salem than in any town of its size in the east, apparently because they are a home product and very cheap here, while there is no finer or more healthful fruit in the world. When we used poorer fruit, imported from France and Germany, we esteemed it a luxury.

If all of the cigars consumed in Salem were manufactured here, it would require 40 makers at salaries of \$15 to \$20 per week. Yet we use cigars that are no better manufactured in Portland, San Francisco, Chicago, New York, any where but here; while our two local cigar factories are obliged to find a market for the bulk of their wares at a distance. This may be a natural foible of human nature, but it certainly is not a far-sighted business policy.

The cost of the raw material in a buggy or wagon is but a small fraction of its total cost; the rest is for labor. When we pay \$100 for a buggy or wagon made in Racine, Wis., we are sending \$100 (less the Salem dealer's profit) out of our midst for good. When we pay that amount for an good or better a vehicle made in Salem, at least \$80 of it, and probably more, will represent the employment of labor here, will remain here in circulation. A full trainload of harvesting machinery recently came into Eastern Oregon from a California manufacturer. That was better than having it come from some point beyond the Mississippi, but it means sending out of the state several thousand dollars for goods which ought to be made here. It means the giving to work men in California of employment that should be given to skilled laborers within our own borders.

Three years ago the nucleus of this patch could have been eradicated for \$10. Now it would take \$10,000 to exterminate the weed, and the professor thinks it would be a most wise investment for the state to make, even at that cost.

Foul-Smelling Catarrh.

Catarrh is one of the most obstinate diseases, and hence the most difficult to get rid of. There is but one way to cure it. The disease is in the blood, and all the sprays, washes and inhalant mixtures in the world can have no permanent effect whatever upon it. Swift's Specifics cure Catarrh permanently, for it is the only remedy which can reach the disease and force it from the blood.

Mr. B. P. McAllister, of Harrodsburg, Ky., had Catarrh for years. He writes: "I could see no improvement whatever, though I had constantly treated with sprays and washes, and different medicinal remedies. In fact, I could feel that each winter was worse than the year previous."

Mr. McAllister writes: "I was brought to my knees by Catarrh. I was unable to do my work, and I was in constant pain. I tried many other remedies, but they did me no good. I tried Swift's Specifics, and they cured me. I feel like a new man now. I can eat, sleep, work and enjoy life. I can't say enough for them. I will give them to all my friends." Swift's Specifics are sold by all druggists.

To continue the wrong treatment for Catarrh is to continue to suffer. Swift's Specifics is a real blood remedy, and cures obstinate, deep-seated diseases, which other remedies have no effect whatever upon. It promptly reaches Catarrh, and never fails to cure even the most aggravated cases.
