## WANT PEACE

### Spanish People Tired of War,

### Some Opinions Expressed By the English Press.

### Calis it a Surprising Act of Generosity.

By Associated Press to The Journal.

LONDON, Nov. 22.—The morning's papers coucede the generosity of the offer of the United States peace commissioners and express the opinion that Spain would be foolish to reject them. They express universal gratification at the announcement of an "open door" policy in the Philippines.

The Daily Mail calls the offer of \$20,000,000, as indemnity, "a surprising act of generosity."

A Madrid special says the meeting, at Saragossa, of delegates from all the chambers of commerce of Spain discloses deep and bitter dissatisfaction at the delay of the Paris conference to reach a definite agreement as to the terms of peace. If anything could be gained by Spain in attempting to elude the American demands, the business communities would offer no objections; but the chambers of commerce, which represent the practical common sense of the country, are unanimous in denouncing the systematic obstruction and procrastination planned by Sagasta and carried out by Monte Rios.

The merchants and manufacturers consider the Philippines already practically lost to Spain, and then urge that the only wise course is frankly to acknowledge that fact and as speedily as possible to get the best terms the Americans are willing to give. The president of the Barcelona chamber of commerce even goes so far as to say that the pettifoggling technicalities and quibbles with which Montero Rios, as he understands, has opposed the demands of the United States commissioners are likely to irritate the Americans and induce President McKinley to reconsider the indemnity he may intend to offer in regard to the Philippines.

These views, which accurately reflect the convictions of the Commercial and mercantile communities, are shared by the masses of the population. It is the functionaries, the monastic orders and the politicians who support Sagasta and Montero Rios in their suicidal obstinacy for retaining the Philippines.

It is impossible to conceal the fact that animosity in official circles here against the United States is more bitter now than during the war. This feeling does not exist among the masses of people. Apprehension prevails in financial circles lest the sulking which Sagasta and Montero Rios are about to manifest in their manner of yielding to the American demands may induce the Washington cabinet to cancel or diminish the Philippine indemnity in regard to the amount of rent. Forty million dollars is considered the smallest sum that can be proposed. In sanguine circles \$100,000,000 and even \$200,000,000 are spoken of as the amount of the indemnity.

Even Austria and France, which are the countries most favorably inclined to Spain, have given recent evidences that they would not assist her in the present emergency. In short, it is the universal opinion among diplomatic officials here that Spain has left entirely to her own resources, and if she renews the war, she will have to fight it alone.

just as she did in its early stages. For the same reasons, it is said, there will be no intervention, arbitration, or any other foreign move, unless the country is a party with Spain to asking for such outside offices.

A rather pessimistic outlook is taken by one of the high diplomatic officials here, who believes that discontinuance of negotiations at Paris will be followed by the immediate sending of an American fleet to the coast of Spain, another to the Philippines, and a more bitter conflict than that heretofore waged. In his judgment, Spain has reached the point where she is ready to lose all rather than voluntarily yield more, and will contest, even though American troops advance to Madrid.

A dispatch from London says: The Daily Chronicle, in a strongly worded editorial article of the American policy in the Philippines, says:

"It is a rather disquieting fact that no sooner is America authority firmly established over Porto Rico than a medieval navigation law is passed, killing at a single stroke important Canadian shipping trade with the island, and making it impossible for any but American ships to trade between America and her new colony. 'This is not an 'open door.' It is a door shut, bolted, locked, barricaded. The Canadian commissioners naturally feel keenly the blow thus dealt their country, and regard it as a bad augury for success in the negotiations

## SPAIN YIELDS

### We Can Now Take the Philippines,

### Because We Have the Power to Do So.

### Spanish Refuse the Offer to Pay Money.

By Associated Press to The Journal.

PARIS, Nov. 22.—The Spanish peace commissioners last night telegraphed to Madrid the substance of the United States memorandum, and late yesterday evening they were discussing it among themselves. At 1 o'clock this morning a Spanish commissioner affirmed that his colleagues did not know what to do regarding the American offer. There is a difference of opinion among the unofficial people, but the prediction is made that Spain will decline the American offer of money. She will refuse to cede the Philippines and will say to the United States: "You may take the Archipelago because you have the power to do so. As you advance, we will retire, protesting against your greedy aggression. We will faithfully carry out our part of the pledges and leave Cuba and Porto Rico in your hands. You came here to engage in a discussion under the terms of a protocol, but you evidently meant when drawing up that document to provide a conference in which you proposed to announce at the proper time what you will do, whether we agree to it or object. Such an attitude robs this conference of its negotiative character and sets up the United States as a dominant power, whose first purpose is to listen but whose ultimate determination is to do its own will."
