NEW BOOKS

The Atlantic for March is a record-breaker. It has the most important political articles of the year—The growth of our foreign policy by Richard Olney, and the first of a series by Henry Loomis Nelson—on the political horizon. The article on the "unofficial" government of our cities is also a notable paper. The Atlantic seems to be one of the few great periodicals that is not gotten up merely from the commercial standpoint—To see how many copies can be sold—And as many of them are edited without a gleam of moral responsibility. It is today probably the most effective agent in molding public thought.

The initial volumes of a series of "brief memoirs of eminent Englishmen," to be called the Westminster Biographies, will shortly be issued in this country and in England. The first to appear here is "Deeds" by Mr. Wilfred Whittier, a "Wesley" by Mr. Frank Rendell, and a "Browning" by Mr. Arthur Waugh. The series, as may be guessed from its sub-title, has been modeled on the plan of the Beacon Biographies, and has been undertaken by the American publishers of that rapidly growing collection of "brief memoirs of eminent Americans," Messrs. Small, Maynard & Company, Boston.

The feud of the Montana millionaires, now being waged in the United States Senate is the subject of a dramatic narrative in Angles' for March. The greatest engineering feat the world has ever seen is described by John Ward, F. S. A., in "The Conquest of the Nile." The Mammoth dam at Assuan and at Assiout will practically recreate Egypt. An admirable compound of sense and humor is offered in "Fortunes Made in Small Inventions," by Harvey Sutherland. The expenses, the salary list and the receipts, together with many unpublished details of opera management, are agreeably treated in "The Business, Side of Grand Opera," by Gustav Kobbe. Full of the small and side of the sea is "Tramp Steamships of the World," by Samuel A. Wood. "The Real Hossels" is welcome because in it we see the famous novelist studied as a man rather than as a writer. In addition, there is a striking war story by Stephen Crane, the continuation of Gen. King's novel and stories by Chauncey C. Hotchkiss, Ewan Macpherson and Howard Fielding.

Street & Smith, Publishers, New York.
"Some German Social Democrats." In the March Magazine Number of The Outlook is given a lively account of the visit of Mr. Edward A. Steiner to the headquarters of German Socialists in Berlin, where he found Liebknecht, Bebel, and other famous German Socialists.

No personal article about John Ruskin has so largely been inspired by intimate knowledge and sympathy as that written by Canon Rawnsley and printed in the Magazine Number of The Outlook for March. Dr. Rawnsley is the vicar of Crowthorne, Berkshire, and knew Ruskin and his master for many years. He writes with many details and anecdotes of Ruskin's services to his neighborhood and especially to the village of Bainton; of the great writer's friendships, and of the simple and touching services at his funeral. The article has several illustrations. (35 a year, The Outlook Company, New York.)

Messrs. Small, Maynard & Company, Boston, are to issue, as soon as it can be got off the press, a little book entitled "A Woman's Paris." Intended for the use of the American lady who is about to go to Paris, and who wishes while she is there, to quote the author's preface, "to do the agreeable things there are to do and to avoid the disagreeable things there are not to do." The author is an American woman.

In the March number of McClure's Magazine, Mr. Walter Wellman will tell another story from his recent extraordinary experiences in the Arctic. He will also give the conclusions from his own experience regarding the only feasible way to reach the Pole, telling what it is and what it involves.

In McClure's Magazine for March, Captain John S. Mosby, the quiet and hardy Yankee skipper who once made a voyage around the world all by himself, will tell the story of his unparalleled achievement of sailing the USS Albatross around the world.

HEAT FROM THE SUN.

HOW LITTLE OF IT WE GET IS ALMOST BEYOND BELIEF.

Scarcely one sunbeam in Two Thousand Millions Alights Upon This Earth—A Pen Picture of the Actual Condition of the Fiery Orb.

The sun is for the most part simply wasting his heat—firing away the golden rays that are the life of the world with a recklessness beside which all human waste is mere parsimony. It is almost beyond belief. Scarcely one sunbeam in 2,000,000,000 alights upon the earth, and allowing for the whole solar system not more than one in 100,000,000 ever hits anything, so far as we can ascertain.

Dr. H. B. Stabler, dean of the scientific department at Harvard, contributes the leading article in Appleton's Popular Science Monthly for March. It is the first of a series which will discuss in detail the various problems connected with the race question in the South. Professor Stabler, whose boyhood was passed among the negroes, is especially well qualified for discussing the question, and his article throws much new light on features which are often lost sight of by Northerners. Nelson F. Lewis, engineer of highways for the Borough of Brooklyn, is the author of an illustrated article entitled Modern City Roadways. After giving a brief history of street paving, he discusses the various methods in use today, and points out the advantages and disadvantages of each, as to cost, cleanliness, durability, etc. One of the special points made by Mr. Lewis is that no city, no matter how poor, can afford to have dirty, ill-paved, unattractive streets. The final article in the series, What Makes the Trolley Car Go, by William Baxter, Jr., appears in this number. Mr. Baxter has the somewhat rare faculty of being a good writer as well as a good engineer, and these articles give the clearest and most complete popular account of the trolley car which we have seen.

There now seems no excuse for any who want to understand this important, and now well-nigh ubiquitous machine, not doing so.

The Saturday Evening Post, of recent date has an interesting review of the life and literary work of Charles Major, author of "When Knighthood Was in Flower," the popular historical romance of which over 100,000 copies have been sold, published by the Bowen-Merrill Co., Indianapolis.

Mr. Major's biography shows a fine, strong American life. He was born in Indianapolis, July 25, 1856. Thirteen years later he went with his father's family to Shelbyville, where he was graduated from the public school in 1875 and in 1878 he concluded his course in the University of Michigan. Later he read law with his father, and in 1877 was admitted to the bar. Eight years later he stood for the legislature and was elected on the Democratic ticket. He served with credit one term and has since declined all honors, although his ability and personal popularity make him just the man for success in the political field.

The title, "When Knighthood Was in Flower," was not chosen by Mr. Major, whose historical taste was satisfied with Charles Brandon, Duke of Suffolk. And who knows that the latter title would have proved just the weight to sink the book into obscurity? Mr. John J. Curtis, of the Bowen-Merrill Co., suggested "When Knighthood Was in Flower," a phrase taken from Leigh Hunt's poem, the Gentle Armorer.

Dr. Bull's Cough Syrup is the safest and surest cure for those dangerous affectioned with the little cough-croup, whooping-cough and measles' cough. Physicians prescribe it, children like it, and doses are small. Price 25c.

Twelve tons of sugar beet seed have arrived at La Grande from Hamburg, Germany.

HOSTETTER'S

Sufferers from stomach troubles such as Dyspepsia, Constipation, Indigestion, need the Bitter. It cures quickly and permanently where all other so-called remedies fail. It is the King of all stomach tonics.

BITTERS

CHRISTIAN SCIENCE LECTURE.

Judge Ewing, of Chicago Will Be at Salem Next Thursday Evening.

A lecture on Christian Science, entitled "Christian Science; the Religion of Jesus Christ," will be given by Hon. William B. Ewing, of Chicago, at Hoad opera house, Thursday, evening, March 8, at 8 o'clock.

Judge Ewing is a prominent member of the Illinois bar. He recently declined nomination to the bench of the supreme court of Illinois, that he may devote his entire time to Christian Science work, and is not a member of the International Board of Lecturers, established by "The First Church of Christ, Scientist," Boston.

Judge Ewing having investigated Christian Science in the judicial spirit which long legal experience has given him, and being intimately acquainted with the discoverer and founder of Christian Science, the Rev. Mary Baker Eddy, is in every way qualified to speak upon the subject. This is not Judge Ewing's first visit to the north-west, as he was here with the vice-president's party in 1893.

The lecture is under the auspices of the local Christian Science church. It is not only for Christian Scientists, but for all who are unfamiliar with the subject and ready to give it a fair hearing. No admission will be charged, and the public is invited to attend.

Best of All

To cleanse the system in a gentle and truly beneficial manner, when the Springtime comes, use the true and perfect remedy, Syrup of Figs. Buy the genuine. Manufactured by the California Fig Syrup Co. only, and for sale by all druggists, at 50 cents per bottle.

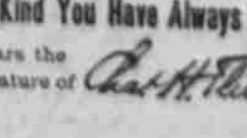

Mrs. Harriet Evans, Hinsdale, Ill., writes: "My little boy, who is 14 months from crop at once by using One Minute Cough Cure. I would not feel safe without it." Quickly cures coughs, colds, grippe and all throat and lung diseases. Stone's Drug Store.

Have to Eat

Whether they are prisoners of war or citizens, all need food and the best place to purchase first class provisions and secure for your family at Salem is at Dr. J. W. Wells, 3-5-50.

CASTORIA

The Kind You Have Always Bought

Bears the Signature of 

Curious Cuckoos.

The cuckoo is generally known only as a bird with a very monotonous note: a continuous cry of "cuckoo, cuckoo" over and over again. Among naturalists, however, the cuckoo is known as a bird that never builds a nest for itself, but takes advantage of one already built by some more industrious bird.

Illustrated Lecturer.

Rev. D. E. Finks, of New York City, will lecture at the Presbyterian church, March 15th and 16th at 8 p. m., under the auspices of the Mens League. Subjects "Alaska and its Gold," and "The Southern Mountaineers" respectively. Each lecture will be illustrated by 100 beautifully colored stereoscopic views, the finest ever shown on the coast. Admission 15 cents, children 10 cents. Don't miss this this "unusual" opportunity.

Mrs. Pinkham's Advice

and Lydia E. Pinkham's Vegetable Compound have restored health and happiness to scores of women. This is not a mere advertising claim, but a positive fact.

The reason Mrs. Pinkham is so qualified to advise women is because for 20 years she has been treating and studying women's ills. Her address is Lynn, Mass.

relieves painful periods and regulates menstruation. It cures backache, kidney troubles and all uterine disorders. Read the letters from women appearing regularly in this paper.
