AN INVENTOR CAUGHT.

RIDING RAILROAD TRACKS WITH A COMMON BICYCLE

An Invention that May Revolutionize Travel
---Railroad Trains Outrun By Ordinary Wheelmen.

SACRAMENTO, Aug. 13.—Railroad Detective William Abern has in his office at the depot a contrivance which would be of great interest to the cranks of the wheel—the men who have the bicycle habit on the brain. With this simple affair it is easy for a wheelman to ride his ordinary bike over any standard gauge railroad track and make a passenger train appear like an ice wagon, no far as speed is concerned. The inventor of the affair is a young man named J. L. Robinson. He evidently took pattern after the ordinary railroad bicycle, which the track inspectors ride, and which is a heavy and cumbersome piece of machinery, lacking both grace and speed. Robinson has improved his pattern and has an affair which runs an ordinary bicycle over the rails like the wind. There is an outrigger which rests on a rail opposite the bicycle. It has a wheel which is about one foot in diameter, ball-bearing in its movement, having a rubber tire, and it is kept on the track by means of two flangs, which are about one inch in depth. The outrigger supports are of light wood and the whole apparatus does not, perhaps, weigh more than 15 pounds.

Reports had come into the office of Superintendent Wright that some man was using the company's tracks in this section of the State without any authority of the railroad officials. Station agents, section foreman and other railroad employes were instructed to be on the lookout for the wheelman and stop him whenever he put in an appearance. On Tuesday last the wheelman came sailing down the railroad track from a business trip which he had made into Tehama county. As he neared the little town of Roseville the section foreman spied him and stopped him. He took part of the apparatus and then telegraphed the news of his capture to Abern. The railroad officer took the next train to Roseville, where he confiscated the bicycle attachment and then brought it back to this city.

Robinson, of course, "made a roar" at the same time threatening all kinds of punishment for Abern. He has given Abern until next Monday to return his property. The railroad men are in a sort of quandary as to what kind of punishment they can mete out to the brilliant inventor. He has been riding over the company's lines without permission and without paying anything for the privilege.

He told Abern that he was willing to pay a certain price for the privilege of riding over the lines in this State. He says that he has his machine patented and that it will only be a question of a short time when wheelmen all over the United States will be running their machines on all the railroad tracks.

Robinson is employed in a local electrical establishment and makes frequent trips into the country in the performance of his duties, always riding his patented machine. He told Officer Abern that he recently rode his machine from Colorado to the Needles in this State.

Contagious Blood Poison

There is no poison so highly contagious, so deceptive and so destructive. Don't be too sure you are cured because all external signs of the disease have disappeared, and the doctor says you are well. Many persons have been dosed with Mercury and Potash for months or years, and pronounced cured—to realize when too late that the disease was only covered up—Liko Begots Liko. Driven from the surface to break out again, and to their sorrow and mortification find those nearest and dearest to them have been infected by this loathsome disease, for no other poison is so surely transmitted from parent to child as this. Often a bad case of Rheumatism, Catarrh, Scrofula or severe skin disease, an old sore or ulcer developing in middle life, can be traced to blood poison contracted in early childhood.

The Sin of the Parent. Drives from the life, for it remains smoldering in the system forever, unless properly treated and driven out in the beginning. S. S. S. is the only antidote for this peculiar virus, the only remedy known that can overcome it and drive it out of the blood, and it does this so thoroughly and effectually that there is never a return of the disease to embarrass or humiliate you afterwards.

AMERICAN FIREMEN ARE PAID.

The Kansas City Team Will Compete for the World's Honors.

PARIS, Aug. 13.—Many thousands of people are attending the international firemen's tournament today. Among those who will represent the United States and compete for the prizes is a portion of the paid department of Kansas City, which is made up of trained athletes and are under the personal management of Chief George C. Hale. They have been in training for the tournament a year and their general appearance makes them strong favorites here. The contests include all kinds of work and exercise performed by firemen. The performance of the Kansas City firemen will form an important part of the day's program. The team is the one that defeated the British firemen in feats of fire fighting in London in 1895, and taught the Englishmen how easy American firemen can harness and hitch up a team and get started to a fire inside of 20 seconds from the time the alarm reaches the engine house. About the quickest time the Britains could make before the Kansas City lads showed them how to do the work, was about three minutes. This would indicate that unless the foreigners have improved wonderfully within the past five years, the Americans should experience little difficulty in landing the prizes. The city council of Kansas City voted to give the firemen \$15,000 to defray the expense of this trip to Paris.

One License.

A marriage license was issued Saturday to Rosa Gage and Nathan S. Ward. The young people being under age the consent of the parents was given.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers, that they offer one Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

It Makes a Man Feel Uncomfortable

To have his collars and cuffs show raw edges and look like candidates for retirement instead of fresh graduates from the laundry. What we can't make seem new might as well be thrown away. It's like a patient too far gone for the doctor. Spotless linen is an indispensable dress factor, which you must have not to be among the outs.
