You Must Not Think

That people wearing or needing glasses have diseased eyes. Such is not the case. Astigmatism—near, far, and old sightlessness—is not a disease, but a local trouble that is easily corrected by properly fitting glasses. It is not necessary to consult a specialist along these lines, but go to an optician who has made the SIGHT a life study, and is in a position to diagnose your case absolutely correct, with the astigmatometer, skiascope and Ophthalmoscope. We have the latest instruments known to optical science. With these instruments in the hands of a thorough, competent optician, it is almost impossible to err. We examine the eyes free of charge, and will be frank with you as regards your needs.

We Never Furnish Glasses Unless They are Needed.

We earnestly solicit your patronage and guarantee perfect action. Where glasses are needed our prices are reasonable.

DID YOU EVER STOP TO THINK

That cheap drugs are always the most expensive in the long run? Keep your eye on the quality before you look at the price. Quality first, then the price, our motto—in other words, right goods at right prices. Prices with us depend on quality, and we positively will not sacrifice the latter to the former. Our goods must be as good as we say—and we say they are as good as gold can be. The very foundation of the drug business is and should be, QUALITY, QUALITY, QUALITY. Quality, first, last and all the time, is the mark on which our eyes are centered. Human life, in our opinion is too serious a matter to juggle with, therefore we apply the Golden Rule. Our prices are reasonable, but they must be sufficient for first-class goods skillfully handled.

DANIEL J. FRY
Graduate in Pharmacy.
