seated, that the almost distracted sufferer feels that he could tear the skin to pieces, and that he must scratch or to crazy. He knows from experience that this only makes matters worse, but, made desperate by the terrible straining and itching, he is for the time being indifferent to after effects. There are several forms of Eczema, the moist, or weeping kind, that comes in little pusules which discharge a watery, sticky fluid, which dries and peels off in bran-like cales. So profuse is the discharge at times that large scabs or crusts form, which re both painful and troublesome, and not easily removed. Red, disfiguring bumps and sorres are symptoms of Eczema. The dry form usually attacks the head, ands and feet; the skin, becoming hard and rough, often cracking open and deeding, and attended with much itching. Eczema depends upon a poisoned condition of the blood, and local

Mr. L. Marno, Recondido, San Diego County, Cal., writes: "My body broke out with a rash or eruption which in spite of all efforts to cure continued to get worse. The itching, especially at night, was simply terrible; it would almost disappear at times, only to return worse than ever. I had tried many highly recommended preparations without benefit, and hearing of S. B.
