Has it Occured to You

That a good watch should last a lifetime? Therefore care should be exercised where you take it for repairs. In this we excel. A good time piece is worth having. An unreliable time piece is worse than none—it will deceive you. You may have a good watch but a poor "timer." It needs our care to make it reliable. RELIABLE WORK BY A RELIABLE WORKMAN. All work warranted.

City of Salem.....\$1,070.77
Salem School District.....1,325.34
State, County and State School Tax.....22,473.94

GAS WELL STRUCK AT HIGHLAND

Well-Diggers Forced to Quit at Depth of Thirty feet
While digging a well north of Highland church, the workmen struck a flow of gas and were nearly overpowered and had to suspend operations. The men digging were Messrs. Medill & Webber and they struck the gas at a depth of thirty feet, having penetrated the hardpan overlying Lake Labish, when it came through in such force as to compel them to abandon the well or be suffocated.

Mr. Chapel, the oil expert, has gone to the discovery this afternoon to see if there is sufficient volume to indicate the presence of oil or gas in paying quantities. A gas discovery at Salem would be of even greater value than an oil well although the two are usually found together.

RED TAPE SYSTEM OF MILITARY

City Recorder Judah has received a reply to his letter to the military authorities at the Presidio, asking them if Thomas Fletcher was wanted by them. Fletcher has today completed his term of five days in the city jail for misconduct, and he alleged that he deserted from the 17th U. S. Inf. at the Presidio in November, 1898.
The letter received is from J. B. Hande, Colonel Artillery corps, commanding, and is as follows:
"Without positive identification of this man as being what he claimed, a deserter from the 17th U. S. Infantry, including the letters of the company he deserted from, it will not be possible for me to certify the vouchers upon which in such cases are paid the reward and expenses of his apprehension and delivery."

Practical School Work

The Corvallis Times reported of the Agricultural College regents meeting has this: A set of resolutions from the state grange suggested the co-operation of the experiment station in a movement of establishing Nature Studies in the public schools. The movement is led by the state grange and Superintendent Ackerman is co-operating with the organization. Instruction of the sort is already given in the public schools of Portland. The plan is to familiarize growing pupils with animal, bug and plant life with a view to interesting them in the environment of rural life with the ultimate end in view of checking migration of population to cities and inspiring a greater love of country life. It is in short, a proposition to carry into public schools a preparatory instruction in nature study. The movement is being supported by the committee on Agricultural Colleges. In many Eastern states the work has already been inaugurated. In response to the request, a committee was appointed to cooperate so far as practicable with the movement. Members of the committee are President Gatch, Mr. Leedy and Dr. Withycombe.

Timber Holdings Active.

There is considerable activity in timber circles in Southwestern Washington for the present time, and owners of timber land are receiving fancy prices for their holdings.

The improvements made by the logging companies has been a boon to timber land owners on the north side of the river, and, where quarter sections sold for \$800 a few years ago, they now bring from \$1200 to \$2000. One choice claim on the Nasel recently sold for \$4000. Even at these figures, timber is worth only \$4.50 a thousand there, while here on the Columbia, where the price of quarter sections ranges from \$800 to \$1200, the price of timber is \$6 and \$6.50. This is one of the unexplainable things for which the Northwest is remarkable.

Birthday Honored.

A pleasant surprise party was given at the home of Mrs. W. H. Bennett last Monday on her fifty-fourth birthday. Every one spent a very enjoyable evening, and elegant refreshments were served. Those being present were: Mrs. E. D. Hart, Mrs. Fred Erickson, Mr. E. Van Patton, Mrs. W. DeLong, Mrs. Joe Martin, Mrs. E. Sealey, Mrs. Geo. Mason, Mrs. P. Hansen, Mrs. M. Viesko, Mrs. Harry Lucas, Mrs. Charles Lucas, Mrs. Hegg and Mrs. Elmer Kennon.

Lost Left Hand.

Lieut. H. A. Kurtz experienced an accident this afternoon that resulted in his losing four fingers on his left hand. He was operating a treat saw, when the saw struck his hand and flew back, striking him on the fingers mangleing them horribly. He was taken to the Florence Sanitarium for surgical treatment.
Lieut. Kurtz is an officer of F. Co., O. N. G. and will probably have to resign.

Beat the Railway Company

by buying a Woodman Excursion Ticket to Portland—going Saturday morning on the 5:40 overland and returning leave Portland Sunday evening at 8:30. Round trip \$1.75.

London—The King and Queen will visit Ireland in April.
San Francisco strike unchanged.

CATHOLIC ORPHANAGE BURNED AT ST. PAUL.

The Catholic orphanage at St. Paul was burned last night about 5:30. This four story building made a very hot fire and proves a total loss, the flames destroying the large water tower and the new barn full of hay. The total loss is at least \$10,000, with insurance of about \$2000. The building was erected by the late Father Delorme, who died June 20th, 1901. The orphanage was burned in the morning and had up a hot fire in the laundry, and it is thought the flames caught while they were at dinner, in less than an hour the structure was laid in ashes and the flames were so hot that the fences, walks and trees on all sides were burned, and many of the houses of the town of St. Paul were set on fire and only saved by the most devoted efforts of the people. There was no way to save the orphanage as there was no fire apparatus and the building and all its contents are a total loss. Thirty-five children and the sisters in charge were saved.
The building stood north of the town and there was some wind that carried the cinders all over St. Paul and set fire to nearly every house in town but none were lost. The bells were rung and a relief party went over from Gervais upon hearing of the fire by telephone. Quite a number of citizens went over but arrived too late to offer anything but sympathy. The orphanage was a branch of the Sisters of Holy Family, and was founded by Archbishop Christie as a home for girls while the parent house at Beaverton is both for boys and girls. Father Rauw of Portland was the director and Father Faber Superintendent. The home was under the immediate charge of the sisters of the Holy Name. These workers in the cause of charity are entitled to public sympathy in their great loss. It is believed temporary homes will be found for the children and that the orphanage at St. Paul will be revived at an early day.

CHANGE IN NEW YORK HOSPITALS

NEW YORK, Aug. 1.—A number of radical changes in the methods employed in the state hospitals are contemplated by Governor Odell, who has just completed a tour of the state institutions. The institutions affected by these changes, it is said are at Randall's Island, Middletown, Centre Islip, Kings Park and other points. The governor aims at saving \$500,000 a year on state hospitals alone.
"Governor Odell is satisfied," said a member of his party, "that state hospitals are too expensively run. In his message he cited the fact that the state has \$30,000,000 invested in buildings and equipments which the Governor said, shows this it has cost \$90 for each patient for building and equipments. This sum indicates to the Governor's mind that there has been great extravagance in the matter of buildings and equipments. He is determined that in the future greater economy shall be exercised in appropriations for these purposes."

CANADA'S POSITION WITH UNITED STATES

MONTREAL, Aug. 1.—The Montreal Star editorially claims that the Dominion of Canada does not want reciprocity with the United States. The Star refers to the campaign conducted in the Liberal in 1891, which resulted in their defeat. Concerning the transfer of American industries across the Canadian border, the Star says Canada is familiar with that argument and adds that the union of the spider and the fly developed the energies and industries of both species. Continuing the Star says: "We have already done too much to build up the industries and advance the prosperity of our neighbors. We buy too much from them and sell them too little but there is grave danger that in any new deal we may become worse instead of better."

BOERS ARE ON A NEW FIELD

LORENZO MARQUES, Aug. 1.—The Boer commands with two guns has entered the Portuguese territory, camping at Guaneiz. Five hundred Portuguese troops are already at Guaneiz and three hundred troops in addition are in readiness to proceed, unless the Boers surrender.

CADIZ AUTHORITIES ENTERTAINING

CADIZ, Aug. 1.—The authorities, including the port commandant Eulate, today gave a luncheon to Prince Henry, of Prussia, and afterward assisted in the evolutions of the German cruisers.

Russell Traction Engines

Separators, self feeders, wind stackers, etc. The reliable line of goods, more of which are in use than all others combined hereabout. Don't compete with your neighbor till you get a self feeder. It'll pay for itself in two seasons.

Plymouth Binder Twine

I am daily sending out hundreds of pounds of this popular twine, the same that my predecessor, Mr. Croisan sold so largely during the past few seasons. The price is 1 1/2 cent less than last year, and considering the fact that no twine in Salem has ever throughout as this it is the best twine to buy by all odds. You need never have to dismount and unscrew your needle or tension when using this, thus losing time and patience. Time is money.

The Cheapest Twine to Buy is the Sort That Requires the Least Bother. That's Plymouth.

F. A. WIGGINS 255-257 Liberty Street.

Successor to E. M. Croisan and E. F. Parkhurst. Studebaker wagons and buggies, McCormick Harvesting Machinery, Russell engines and threshers, Tribune bicycles, Standard and White sewing machines.

The Strong Foundation of the McCormick Binder

A wagon does not sink down on a smooth level road. It is the chuck holes, ditches and side hills that try a strength. The same is true of the main frame of a binder.

Did you ever stop to consider the striking strain that are thrown on a binder or hole, the entire strength of the frame, and the momentum of the machine and horses, are thrown on the platform and main frame. Unless the construction is perfect there is great danger of warping the frame and throwing the bearing and gears out of line.

To meet these warping and torsional strains the McCormick Technical Staff invented, years ago, a form of construction that has made McCormick machines famous for the strength and solidity of their main frames. This invention is the square pipe which carries the torsional and side strains with a strength six times as great as the same material would have if made into a flat bar. The outer shell acts like a heavy channel steel, bent to form the three sides of the frame. This scientific construction gives the McCormick main frame a degree of strength and durability that has never been equalled. The square tube is a McCormick design, found only on the McCormick.

It appears that manufacturers could not get into the market and buy tubular girders steel rectangular in cross section as a substitute for the timber framing of their purpose, adapted in size, weight and form to go into their structure. We and valuable conception worked out to practical results, which they should be able to protect themselves in against piracy.—Decision by the Examiners in Chief. Patent No. 442,504.

Studebaker Wagons

Equipped and spring rig. Call in order to get a catalog. Light 100 road wagon we make. Delivery enough for a prospector. 21 or light 100 with out top are the best made out. Studebaker makes good rigs.
