

Eczema

How it reddens the skin, itches, oozes, dries and scales. Some people call it tetter, milk crust or salt rheum. The suffering from it is sometimes intense; local applications are resorted to—they mitigate, but cannot cure. It proceeds from humors inherited or acquired and persists until these have been removed.

Hood's Sarsaparilla positively removes them, has radically and permanently cured the worst cases, and is without an equal for all cutaneous eruptions. Hood's Pills are the best cathartic. Price 25 cents.

FARMERS FARMERS SMARTER MEN

Than Old Noah Use Newspaper Advertising. How the Want Columns of the One Cent Daily Enables You to do Business at Home and Never Leave the Farm or Neglect Your Work.

A Sample Adlet, 3 Times for 25 cents, including one in New Today; One Week for 50c., or \$1.50 a Month in the Daily Journal will Buy or Sell any Article.

Noah is said to have been the first man to advertise. He advertised the flood and kept constantly at it until the flood came. This is but one more proof of the efficiency of advertising and one that should be imitated by all farmers.

How to Do the Business

Every farmer has something to sell that he can turn into money and there are plenty of people who want that particular thing. Many have land to sell or rent, stock to sell or rent on shares, money to lend on real estate, fruit to sell in the orchard, young stock to dispose of, horses or breeding cattle eating their heads off, that some one would buy if they only knew where to find them. Here is the way to get the business going that will save you trouble, put you long on cash, save you time, wear and tear on teams and travel, have people coming to you instead of your running after them:

1. Write down in as few words as possible just what you have to sell or want to buy from a wife up
2. Put down your full name and postoffice address by mail, so that people can write you and your location so that people can come to see you.
3. Enclose cash with your order and state just how long you want the ad. to run. You may not sell or buy at the end of the time for which ad runs, and then you can extend it at the same rate and say difference.

The Form of the Ad.

Here is a concise form of an ad. for the Wanted and New Today column, and the gentleman who runs this ad. does quite a large real estate business through THE JOURNAL want ads.

FOR SALE—5, 10 and 15 acre orchard and chicken ranch. New house and barn. Well water. Two miles out. See G. W. Pearline, 2 miles north on river road. B. F. D. No. 8. 10-25-11

The above ad goes three times for 25c (including one time in the "New Today" and two times in the classified Want Column). In this time it will reach about ten thousand people and some of them are sure to want what you have or to have what you want, if it's a Mormon Bible.

FARMERS! FARMERS!

Dr. Miles' Heart Cure is especially adapted to remove all irregularities of the heart's action. Sold by druggists on guarantee. Dr. Miles Medical Co., Elkhart, Ind.

REFORM SCHOOL FIRE

State Suffers \$30,000 Loss

With Some Insurance--Boys at the Industrial School Behaved Like Heroes.

Water Tank With 25,000 Gallons Falls With a Crash.

The Industrial building of the State Reform school was destroyed by fire at one o'clock Wednesday morning. This building is located six miles southeast of the city. The fire started in the paint room, presumably caused by spontaneous combustion. It spread throughout the tall tower-like structure with such rapidity as to leave only the walls remaining one hour after the blaze was discovered. The night watchman, Ed Howell, had just completed the rounds of the building and reached the main part of the institution, when he heard the crackling of the flames and at once sounded the alarm. Every official and pupil of the school was put to work fighting the fire, and water was carried and blankets used, while in the meantime a call was sent in to the Salem fire department. The main building of the school is only 8 feet from the industrial department, and at first it seemed that this would ignite from the flames in the burning building. Blankets and quilts were suspended from the sides of the building and water was frequently poured on these, so this building was scorched but little.

The industrial department consists of the shoe shop, electric light plant, blacksmith shop, steam laundry, tailor, shop, boiler room, paint shop and several others, and this will entail a great loss. On top of this building was located the 25,000 gallon water tank filled with water from Mill creek, used for common purposes, and when the building was nearly consumed and the flames were hottest, the roof fell in and this water tank burst open, thus throwing an immense lot of water on the flames and enabling the fighters to control them. The Salem fire department was stopped before reaching the Reform school.

The work of the boys of the school was excellent, as they so promptly obeyed all the orders given them and their assistance was of great value.

This morning the walls of the industrial building and water tower are still erect, but are badly cracked and are likely to fall at any time.

SORE NECK

Take Scott's Emulsion for scrofula. Children often have sores on the neck that won't heal up. The sores may come and go. Parents may not know what's the matter nor what to do. Scrofula is the trouble and Scott's Emulsion is the medicine.

Scott's Emulsion heals the sores. But that is not all. Scrofula leads to consumption. This is the real danger.

Scott's Emulsion is the "ounce of prevention" that keeps off consumption.

We'll send you a little to try, if you like SCOTT & BOWNE, 409 Pearl street, New York.

The State Board, consisting of Governor Geer, Superintendent Ackerman and Secretary Dunbar, went out to the scene of the fire on the morning train to take steps necessary to rehabilitate the industrial department, for which some temporary provision must be made. The other work of the school will not be interfered with. In the water tower were a number of bicycles and some clothing belonging to the employes that are burned.

The loss is covered by an insurance of \$8000.

Superintendent Bickers says he has no idea how the fire started. The engine room is on the first floor of the industrial building, and in the same room is the boiler for the steam-heating plant and the dynamo for the electric light plant. A night watchman is employed at the building, and the fire was discovered by him before it had made any headway. Without the aid of the fire-fighting apparatus, which was cut off by the fire, no attempt could be made to fight the fire in the industrial building, and it was only by heroic work that the fire was prevented from spreading to the main building.

Tonight at the Grand Opera House, The Senator's Wife.

SHAW CHURCH DIFFERENCE

Peaceful Relation of a Village Disturbance.

The Christian and Methodist people at Shaw have been using the one church building at that place in common. The people built the church and turned it over to the Methodist church at Turner, the minister at Turner filling the pulpit twice a month, with the understanding that it was open for union services and Elder R. D. Skaggs was to hold services once a month, and he has been doing so the past six months.

He held services last Sunday, when the trustees of the Methodist church residing at Shaw, W. L. Cummings, C. R. Durfee and A. O. Noyes, served a written notice on him to leave no further appointments for services there on "Lord's Day."

Both societies have a strong membership, and the Christian church people claim that they have a right to the church part of the time at Shaw, which they helped to build.

There are other denominations represented at Shaw who are interested in keeping the church open on equal terms. At present the Methodist organization is in possession. Under the rules of the Methodist church the minister in charge can determine to what kind of services the church shall be opened.

SHAW CHURCH DIFFERENCE

Union Church Closed to Services of Christian Denomination.

MARCONI CAN'T BE STOPPED

From Sending His Wireless Messages

Across the Wild Atlantic Waves

Expects to Perfect His System in Few Months.

NEW YORK, Dec. 18.—Wm. Marconi's wireless experiments cannot be stopped by Anglo-American Telegraph Company even by result of action in the courts. They declare the character of the monopoly would not operate to stop scientific experiments and according to English accounts such grant would not operate to bar any invention unknown at the time the concession was granted.

NEW YORK, Dec. 18.—At his laboratory at Orange, N. J., Thomas Edison authorized the following statement concerning Marconi's feat in wireless telegraph communications from England: "Since Marconi has started over his own signature that he has received the signals from England, I believe and I think he will carry it to a commercial success. It is a great achievement, and he is a great experimenter."

ST. JOHNS, N. F., Dec. 18.—Marconi is today awaiting a message from London announcing the result of negotiations between his agents and the Anglo-American cable company. The inventor fears the latter will insist he must not engage in commercial business here until after the expiration of the company monopoly. Marconi is disposed to agree to such conditions believing he can perfect means for signalling between Cornwall and Nova Scotia within a few months.

MARCONI CAN'T BE STOPPED

From Sending His Wireless Messages

Across the Wild Atlantic Waves

Expects to Perfect His System in Few Months.

NEW YORK, Dec. 18.—A dispatch to the Herald from Colon, Colombia, says: A woman Colonel, Senora Ramona Mendosa, fought bravely with the insurgent forces in the recent conflicts between the Colombian Government and rebel troops at Nombre de Dios last week. Her husband and brother were killed last Thursday. When the government troops drove the insurgents from the trenches on Friday, Senora Mendosa escaped to San Blas in a small boat with Indians. Senora Mendosa has been an intrepid fighter during the last two insurrections on the isthmus. She displayed gallantry in the recent battle at Buena Vista.

According to the latest advices the rebels are still offering resistance to the government near Nombre de Dios. Employees of the Carribean Manganeze Mining Company at Nombre de Dios have arrived in Colon. They feared that their lives would be endangered by remaining at the former place.

When the government reinforcements arrived in two sloops at Nombre de Dios last week a rebel force in small vessels endeavored to get near enough to throw dynamite bombs on the government boats but did not succeed owing to the superiority of the latter craft in sailing.

Among the rebels killed during the fighting was their leader, Colonel Sosa. He was one of the revolutionists who surrendered when Colon was recaptured by the government. The revolutionists were taken prisoners.

said he had initiated the movement and he believed that it would yet produce as generous financial aid for Ireland as it had ever done before.

The speaker said that he was glad to hear that Mr. Wyndham, chief secretary of Ireland, had resorted to the coercion of Ireland and he hoped that he would continue to extend it. If there was one thing they wanted in Ireland, Mr. Redmond said, it was the salt of coercion, for this would not hurt Ireland but would irrevocably damage the government.

In the course of his speech Mr. Redmond described how all classes in the United States from President Roosevelt down, had extended their hospitality, their good will and their sympathy with his mission and the Irish cause. He said he regarded these evidences of good will as of enormous value to Ireland. With the enlightened public opinion of the great and free nation on his side, explained the speaker, Ireland possessed a power more potent for the future than all the armies and navies at the disposal of Mr. Chamberlain and Lord Salisbury.

Mr. Redmond said that he and his companions had received the same assurances of sympathy from Canada, Sir Wilfrid Laurier the Canadian Premier, being among the first to welcome them.
