"He Won't Die"

Of consumption is a remark often made of a fleshy man. The remark expresses the popular recognition of the fact that the sign of consumption is emaciation, loss of flesh. On the other hand, a gain in flesh is a sure sign that wasting diseases are being cured.

Mr. Will H. Whitmore, of Astoria, Rocking-ham Co., Va., writes: "Our son contracted a severe cold about the first of July, 1920, and had a terrible cough. We called a doctor and he pronounced it irritation of the bronchial tubes, with asthmatic trouble, and he informed me that my son was liable to die at any time. He told me that if we could keep the bronchial tubes open, he might cure him; but after treating him several weeks and my son growing worse all the time, I concluded to try Dr. Pierce's Golden Medical Discovery and 'Pleasant Pellets.' I had seen several almost miraculous cures brought about by the use of these medicines, and of course I had wonderful faith in them. He used three bottles of Golden Medical Discovery at home and one oval of the 'Pellets,' and was then well enough to go to West Virginia, taking a supply with him. I am just in receipt of a letter from him from which I quote: 'I am well and hardly and getting very fleshy.' The Common Sense Medical Adviser, 100's large pages is sent free on receipt of stamps to pay expense of mailing only. Send 31 one-cent stamps for the cloth-bound volume or only 21 stamps for the book in paper covers. Address Dr. R. V. Pierce, Buffalo, N. Y.

Willamette Valley. Lane county—Friday and Saturday were quite warm but I do not think any damage resulted; hay is mostly housed, except grain, which is not cut yet; hops are growing finely at present; corn is making a rapid growth; fall wheat generally will soon be ready for the binder.

FAIR BOARD APPEAL

Judge Burnett Dismisses Jurors and Adjourns. Carson & Adams, counsel for the state fair board in the suit against Contractor R. T. Denham and his bondsmen, J. C. Goodale and F. P. Tallington, this morning filed a motion in the circuit court asking that the conclusions of law of Judge Burnett in finding for the defendants, be set aside, and that judgment be entered for plaintiffs. The motion was overruled and judgment for the defendants, dismissing the action and for costs and disbursements. Counsel for plaintiffs gave oral notice of an appeal to the supreme court.

CROP AND WEATHER BULLETIN

Furnished Today From Uncle Sam's Bureau. No rain has fallen, except a few showers early in the week in the Willamette valley and the coast counties. The week has averaged the warmest of the season, its first part was unusually cool, after which the temperature rose quite rapidly. The maximum, or day temperatures, in Western Oregon ranged between 69 and 96 degrees, and the minimum, or night temperatures, between 45 and 65 degrees. In Eastern Oregon the maximum temperatures ranged between 70 and 100 degrees, and the minimum temperatures between 44 and 64 degrees.

One of the severest wind storms ever known at this season of the year swept across the entire state on the afternoon and night of the 11th. Ripe grain, fruit, hops and cut hay were badly damaged by the wind in many sections. Barley, being further along, suffered the most, and the yield will be considerably lessened from this cause. The damage to wheat was not so great, owing to the fact that much of it was too green to be badly shattered, although the green wheat was knocked down, the heads whipped off, and the straw broken in numerous exposed places in different parts of the state.

Fruit also suffered quite extensively; many apples were blown off the trees, and even the trees themselves in some cases were blown down. The damage to fruit was greatest in the Willamette valley and the coast counties. The laterals to the hop vines were torn away, and in the more exposed yards the poles were blown down. In the case of cut hay, the stacks were blown down, and the loose hay was scattered over the fields. Most of it was later recovered in fairly good condition, and the damage to the hay crop by the wind storm did not amount to much.

The hot weather during the last few days of the week dried up pastures, and feed on the foothills is fast becoming poor. Stock, however, continue in good condition, and the flow of milk in the dairy districts has not shrunk more than usual at this season of the year. Haying is nearly finished, and some have been cutting their second crop of alfalfa. The hay crop is an average one, and it has generally been secured in good condition.

The fall grain harvest has begun, and the cutting of grain will be become general all over the state by the first of next week. Corn, potatoes, hops and gardens are growing nicely, and the warm weather was just what these crops needed for rapid advancement.
