ONE STEP MORE

Will be fatal to the sleep-walker. Will he draw back or will he take the final fatal step? A great many people are in peril like the sleep-walker. They are diseased. The disease is progressing day by day. The time comes when one more step away from health is fatal. The man who has suffered from indigestion or gastric trouble goes some night to a dinner and returns home to find he has taken that last step from health which can never be taken back.

To neglect the cure of indigestion or some other form of stomach trouble is dangerous. Dr. Pierce's Golden Medical Discovery cures diseases of the stomach and other organs of digestion and nutrition. It purifies the blood, stimulates the liver, cures biliousness, and eliminates all poisons from the system.

"The praise I would like to give your 'Golden Medical Discovery' I cannot utter in words of praise with pen," writes J. B. Ambrose, Esq., of 120 1/2 Main St., Huntington, Ia. "I was taken with what our physicians said was indigestion. I doctored with the best around here and found no relief. I wrote you, and you advised me to use Dr. Pierce's Golden Medical Discovery. I took three bottles and I felt so good that I stopped being careful. I have no symptoms of gastric trouble or indigestion now."

If you ask your dealer for "Golden Medical Discovery" because you have confidence in its cures, do not allow yourself to be switched off to a medicine claimed to be "just as good," but which you did not ask for and of which you know nothing.

SHOULD NOT BE IRRIGATED

An Editor Thinks Other Lands Should Be Settled First

Since the state of Oregon has recently entered into contracts with large corporations for the reclamation of large tracts of arid lands in this state, the following criticism of that plan, which appeared in the "Farm, Stock and Home," of Minneapolis, might be interesting:

"The general government has now entered upon the work of reclaiming 50,000,000, it is claimed, of arid lands in the Southwest. It is the opinion of F. S. & H. that its action is premature. There is already enough arable land in the United States to support five times our present population without reaching the limit of its productive ability. It would be a wiser economy to make better use of land now available than to add so immensely to an area that is largely unoccupied, and still more largely unused. In matters of detail there are objectionable features about the law authorizing this gigantic scheme that it is not proposed to discuss in this connection. They will be minimized, anyhow, and so will the whole scheme, for the area of the John Day river. Since then about 50 claims have been taken up by individuals, amounting to 8000 acres. The fever is spreading and crusaders are at work in the different localities. Already 4000 acres have been filed on in other townships contiguous to Sumpter, and in 60 days it is predicted by those who are keeping the cases, that a vacant quarter of government land, not in conflict with possible mineral location, can be found in a radius of 30 miles of this camp, the center, the throbbing heart of all such enterprises in Eastern Oregon."

The scrippers are here also, if not in such numbers, then in great financial strength. The government sells the land, 160 acres only to each individual, at \$2.50 an acre. In order to secure it through a script transaction it costs \$5.50 an acre, and it is considered dirt cheap at the price. In this way one can secure all the land he can find unclaimed—and has the money to pay for—Sumpter Miner.

How Portland Gets Its Name.

According to a writer in the New York World, the city of Portland received its name under these circumstances: Two men named Pettygrove and Lovejoy were the first owners of the ground on which the city of Portland, Ore., now stands. Pettygrove had gone there from Maine and Lovejoy from Massachusetts. Pettygrove, out of admiration for Portland, in his own state, wanted to name the new place Portland. Lovejoy, being a Boston man, insisted upon calling it Boston. Unable to agree, they finally decided to toss a penny, the man getting heads to name the place. Pettygrove got the heads, and named the place.

It may sometimes, owing to nervous disorders, but it is hardly ever lost, except in extreme old age. What is called impotency or sexual neurasthenia is merely weakened power. Underneath the ashes the fire remains aglow. It requires careful, scientific treatment to fan it into a bright flame of life and energy. For these cases, which have been hitherto the despair of the physician, nothing equals the application of electricity. If by proper current and exact dosage, in combination with the scientific administration of specific medical remedies, which penetrate the secret ambush of disease, exterminating it root and branch forever. A rejuvenation follows its use. It produces results because it replenishes the vital tonic requisite to the nervous system. According to Dr. Darrin's peculiar and scientific methods of administration, it is a powerful revitalizer, indicated in diseased conditions, due to all kinds of excesses.
