

### Great Symptoms

Stimulate and cathartics will never cure indigestion. They merely relieve the system but the next meal clogs it again. The system is diseased. The nourishment—health—strength it contains is appropriated—absorbed by the system.

### KODOL

Purifies, cleanses, strengthens and sweetens the stomach. This new discovery digests all classes of food and assists the stomach and digestive organs in assimilating and transforming it into the kind of nourishment that is taken up by the blood and fed to the tissues throughout the various organs of the body. Kodol cures indigestion and dyspepsia, thus removing the cause of all stomach troubles. Kodol gives each strength to the body that it is invaluable in all wasting diseases.

"I wish to thank you for what Kodol has done for me," writes Clifford Olson, Collet, Ind. "It cured me of dyspepsia after everything else had failed. When I tried Kodol it helped me right away. I cheerfully recommend it."

**Kodol Digests What You Eat.** Prepared by E. G. DeWitt & Co., Chicago. The 8 bottles contained in this box are enough for actual consumption at the trial size which costs 50c.

SALEM WAITER'S UNION Organized to Protect Local Workers

There will be a large initiation of new members of the Salem waiters' union this evening at the hall in the Turner block. All the dining room employees in the leading hotels and restaurants have been notified.

The present wages paid the best waiters and waitresses is \$15 a month and it is not expected that these wages will be raised, but some of the waiters complain that on occasions when special help is needed Portland union waiters are brought to the

city and paid \$2.50 per day, while the local waiters have to work for the same pay.

George Patterson of the Salem Waiters' Union, will conduct the initiation.

Other Labor Notes. The proceeds of Salem Central Labor Union's ball for the relief of the Pennsylvania miners, \$72.65, was sent to the treasurer at Indianapolis, and the local secretary, A. C. Hoff, was instructed to tender a vote of thanks for the \$46.20 raised by the churches of Salem for the same purpose.

G. Y. Harry, president of the State Federation of Labor, and O. P. Powell, international president of the Shirt and Laundry Workers' Union, are expected in the city Friday night, and will be present at the meeting of the local union. Their business here is to look after the interests of the local labor organizations.

The French government has decided to build a great industrial school in Chicago for the training of young men in American ways of manufacture and business methods.

The new charter should provide for a park road. This city has been without parks too long. There should be a fine boulevard built north, south and east leading to a park.

What has Flagg's record in the legislature to do with his qualifications for city recorder? Men have served a term in the penitentiary and made competent officials when they got out.

The Chicago anarchists again celebrated the Haymarket riot. Well, that's harmless.

The labor bureau and the hop commission are things the next legislature will probably call into existence.

The Pendleton East Oregonian credits the Journal editorial on Salem carpoolists to another paper. No matter, so the young men get credit.

The Portland papers have a tale of woe over not getting their fair appropriation. Well, they still have Jonathan Bourne to fall back on for excitement.

There are great land frauds in California, too. The Republican party used to be the party that protected the homesteader in his rights to get public lands, and should be so still.

There was quite a depression in the outlook for Oregon the other day when a lawyer was disbarred by the supreme court. But the feeling has been relieved by the action of the court in admitting another Tuesday.

The Ohio campaign had too much Johnson. A millionaire, who is making his fortune greater out of a tariff and patented protected steel rail, denouncing all other wealthy men, is about the high-water mark of imperitance in a reformer.

The Journal regrets that its columns are so crowded that it has almost no space for editorials. Improved machinery will soon enable us to print an eight-page paper, and then we will have a page of editorials each day, if the readers wish them.

The broken rock road to Liberty is not being used much, if any. The farmers prefer to drive in the mud. That, at least, does not ruin the horse's feet. The road has been rolled with the sive-ton roller. The road needs finishing. What is that, A. I. C. class stand up: 1st—tamp a surface on it by hand labor with an iron tamper. 2d—cover it evenly with fine gravel or coarse sand. At present the road is like a house that has been built but not shingled. It will not be used, and will go into ruin.

Portland Telegram: It is probable that not many members of the legislature will pay much attention to the vote at the polls for Governor Geer. The Republican faction that dominated the state convention, and was mainly successful in the convention and at the polls, and of which he is not considered a part, will certainly not consider that vote binding upon them, and will have very slight regard for the outgoing governor's facetious remarks on that subject.

## Risking Life

To make a living! And he stands and stuns up the man in the clouds, wondering that any man can be so foolhardy. But what of the business man, who has barely time to snatch a hasty meal, and gulps down a lunch of pie and milk in a few minutes? He too, is risking his life to make a living. Life is sustained by food properly digested and assimilated. The result of hasty eating and irregular meals is "weak" stomach, and a "weak" stomach means a weak man. While the stomach is "weak" the food eaten is not properly digested and cannot be perfectly assimilated, so that there is a daily loss of nutrition, which in time will result in physical collapse.

Dr. Pierce's Golden Medical Discovery cures diseases of the stomach and other organs of digestion and nutrition. It enables the assimilation of all the nutritive values of the food eaten, and so builds up the body into sound health and strength.

Mr. Ned Nelson, the celebrated Irish comedian and mimic of 77 Broadway street, Camden, N. ## Worry

And Overwork Caused Nervous Prostration—Completely Worn Out.

Dr. Miles' Nerve Cure Me.

Dr. Miles' Nerve Cure cured nervous prostration. It will bring sweet sleep and rest; it will relieve the mind of the tendency to worry; it will make the nerves strong and the patient well. It has cured thousands. It will cure you. Try it today.

"Some years ago I was stricken with nervous prostration caused by overwork and worry. I was in such a weakened, exhausted, run-down condition that I was unable to do my household work. I felt too weak and tired to even make calls on my neighbors. Frequently when out driving I would become so exhausted that it seemed that I would die before I reached home. I was also troubled with sinking spells at night which left me so weak that I thought I could not rest until morning. I was in this deplorable condition when one day Dr. Miles' Nerve Cure was brought to my notice. I had little faith in proprietary remedies but determined to give the Nerve Cure a trial. After the second dose of the Restorative Nerve Cure I was able to sit at the table and eat a meal, something I had been unable to do for many days. I have since taken a number of bottles of Nerve Cure. I consider myself cured. I am doing my own work and give Dr. Miles' Nerve Cure credit for my general good health. My object in writing this is to recommend your medicine but I cannot write as strongly as I feel."

## Daughter Is Not Pleased

Pearl L. Dingman has filed in the Marion county probate court a demurrer and objection to the guardianship of the estate of her father, A. H. Dingman, who is an inmate of the state insane asylum, by her uncle, N. J. Dingman. She alleges that at the time of Dingman's appointment that he was unfriendly to only toward the man whose estate he is in charge of, but also to the petitioner. She claims that her father has a life estate interest in and to three city lots of the value of \$700, and that he has other property of the value of \$75. She petitions the court, through her attorney, J. A. Jeffrey and T. M. Fleming, that A. Olinger be appointed guardian, and be placed in charge of her father's property.

Boy Chewed by a Bull Dog. North Yakima, Wash., Nov. 12.—A shocking accident occurred to the 10-year-old son of R. Langertin, a rancher, living in the far Moscow country. It seems that the lad, with another child, was playing with a bull dog belonging to a neighbor, last Friday. The animal became enraged at something, and seized the boy by the calf of the leg. The father came to the boy's assistance, and tried to pry the jaws of the animal open. Finding this impossible, he seized the dog by the neck and, with the help of the other child, managed to cut the dog until it was unconscious. Haste instruments, like scissors, were used to draw the boy's leg out of the dog's mouth. The hamster was again called into requisition, until the dog was dead. The boy will probably be a cripple for life.

Another Pioneer. Bright's Disease and Diabetes Are Positively Curable.

When the San Francisco business men were investigating the Fulton Company they heard that Dr. C. D. Zelle had both Bright's Disease and Diabetes, and was given up as incurable, and so they waited on him and got him to take it. Now for the sequel. This letter was written 9 months later:

"Dear Sir: I have conducted my own share of my own property on Pacific St. for the last eight years, hence my associates number some of the best old school physicians. I had chronic Bright's Disease and Diabetes of long standing, which led to serious complications. I had lost the judgment of my medical friends and that three months would see the end. We all looked upon me as incurable. I was an empirical and visionary. But I yielded to the earnestness of the parties, and the sympathy of one of my family, and went on the Fulton compound for Bright's Disease and Diabetes. The first week I improved, but thought it a contact cure. But every week thereafter the improvement continued. The time for the trial, ended and I was still growing stronger. This continued till July, when the last traces of both albumen and sugar disappeared. I suppose I have given the Compound a dozen, and all I can report favorably. However unreasonably it may appear, the cure has been found. If those interested care to call at my drug store I will be glad to tell all I know concerning this important matter. The discovery is second only in importance to the discovery of a cure for consumption."—CARL D. ZELLE.
