A child three years of age died of drunkenness the other day in New York City. The parents said they had given the child whisky to strengthen him. In their absence he found a bottle of whisky and drank from it, until he fell over in a drunken stapor, from which the physician could not arouse him. That is only one case in several cases of baby drankards recently noted. The important fact is that alcoholic stimo lants quickly develop the alcoholic habit in children. This fact is just as true when the alcohol is draguised as a medicine, a "sarsaparilla" or other "com-pound". So many medicines contain should be cantious what medicines they
