**The Benefit of Change.**  
 We are like house plants. We need a change of soil now and then—to be replanted. New scenes, new experiences, new surroundings—a change of climate, dry air instead of moisture, sunshine in place of cloud. This is something essential to health. There are conditions near at hand that are better than Europe can offer. Take a month or two in California. Plant yourself for a time where there is no irritation, where the hotel is beyond criticism, the landscape pleasing, and where warm, sunny weather invites walks and drives. Pure and dry air, and the increased electric influence of sunshine are vastly helpful.  
 You can make this trip at very little expense, and enjoy a ride over the scenic Hiskiyou and Shasta Mountains, which, at this time of the year, with their snow-covered peaks, are unsurpassed for their grandeur.
