NO. 85.

The New York Racket IS GROWING

It's not the result of an accident. Our modern business methods enable us to undersell "regular stores." We have but one price. We sell for spot cash only. No exceptions to either rule. The latest addition to our stock is a general line of

DRY GOODS

Everything from Muslin to fine silks. Experienced dry goods men tell us we can't pay expenses on our margin of profit. We're going to try it. Don't you think it will pay you to help us make a success of the new lines?

Have You Tried Thompson's Glove-Fitting Corsets?

We sell this well known brand at "Racket Prices." All the new and staple shapes.

LADIES' WRAPPERS and UNDERSKIRTS

We want you to see our prices in the store hat's where you can judge of the value when you have the price and goods together.

WE'RE SHOWING A BIG LINE OF LACES and EMBROIDERIES

That's where most merchants double their profits. Ask your friends how we sell them. Great values in appliques and medallions.

THEY ALL COME OUR WAY WHEN THEY WANT

RIBBONS YOU KNOW WHY

It's time for

Lace Curtains

again. Our line is complete and prices bed rock.

Ladies' Belts, Purses Combs, Hairpins and all kinds of Furnishings.

COUNTERPANES You must have them to make the bed look right. Don't buy 'till you see what we have to show you

We carry the most complete lines in the city of Ladies' Men's and Children's

SHOES

They combine the best of styles with proper fit and good service. If you want to reduce your shoe bills buy your footwear of us. We believe in selling good goods at reasonable prices so you'll come again.

CLOTHING

The new patterns are beauties. We save you from \$2 to \$3 on a good, all wool suit. When we say it's all wool there is absolutely no cotton or shoddy in it. What has your experience with "all wool" from clothing been? We have nobby little suits for the boys that are built to stand boys' wear. We intend to carry everything you need to fit out the whole family.

When you want anything it will pay you to go to

CHRISTIAN SCIENTIST DEDICATION

Two Large Audiences Witness an Interesting Occasion --- Special Cars Bring Portland Friends Who Were Highly Pleased.

Two very fine audiences attended the services of dedication, and greeted the Salem Christian Science workers, and they were very well entertained. The perfect Easter day gave an additional pleasure to the observation of the happy event, so long looked forward to by this church.

The auditorium of the church, as well as the hallways, reception and reading rooms and platform, were decorated with palms and Oregon grape, the state flower now in perfect bloom, and beautiful blooms of flowering quince, hyacinths and narcissus.

At both services the building was crowded to the doors, and overflowed into the hallway and out onto the porch.

Nearly 100 Portland and Oregon City Christian Scientists honored the occasion with their presence, coming up on special cars on the 11 a. m.

for the purposes of speech and song the new church is as perfectly contrived as it is possible for ingenuity and scientific architecture to devise.

Miss Hortense Kimball sang "The Holy City," with accompaniment by Mrs. Frank Willman. It was a happy rendition of one of the world's most beautiful compositions.

After this the regular lesson sermon of the day, the same morning and evening for all Christian Science churches, were read by the readers and congregation.

The dedicatory service of the Second Church of Christ, Scientist, opened on Easter Sunday with an organ voluntary, and singing of the communion hymn, written by Mary Baker Eddy.

Mrs. R. S. Bean, the first reader, then read the 91st Psalm, the favorite of all David's compositions with Chris-

tian Scientists. After closing the hymn "He That Has God His Guardian Made," the first reader gave the address of welcome. There is always a time during the unfolding of the truth given by Mrs. Eddy when her personality troubles one. As the grandeur and verity of her thought presses on our consciousness, however, it becomes the hand that tears away the veil from before our spiritual sight. As such her service become fraught with most loving interest to her followers. Their love and gratitude go out to her more and more as the Truth she voices reaches their consciousness. And as this truth unfolds to one longing for the spiritual understanding as undoubtedly found in her writings, her personality becomes as nothing, or as a clear glass through which the truth is seen. As to those of us who can testify to needs met many, many times by the new-old truth, lived and taught by Jesus, and his disciples, and so beautifully and logically revived by Mrs. Eddy, the love and respect we bear for her seem so natural and unavoidable that we perhaps too often take it for granted others appreciate our love for her. There is no longer any doubt as to the influence Christian Science is to have in the development of the best in the world. In almost every small town there is some room where half a dozen meet who are realizing that "where two or three are gathered together in My name there am I in the midst of them." These little companies have the same pastor, same form of service, and same spiritual food that the worshippers in the beautiful temples of the largest cities enjoy. In Chicago they are build-

Second Church of Christ Scientists of Salem

train, and returned at 4:31 p. m. The Portland party were met at the train and taken back to the train, and they were lunched at Strong's restaurant. The party embraced some of the most prominent people of the metropolis.

There were visiting Scientists from many near-by communities, and all the visitors expressed surprise and delight at the "demonstration" of the Salem church.

The addresses of the occasion speak the sentiments of this organization, logically and correctly, and are, therefore, printed in full for our readers.

One of the addresses was by Mrs. Hogue, of Portland, for several years first reader of the First Church at Portland, and a recognized and authorized teacher of Christian Science. She is a woman of great culture, and many charming good qualities.

David B. Ogden, chairman for Oregon, of the Publication Committee, delivered an address at the afternoon service that was an eloquent exposition of this new thought, and was thoroughly appreciated by the audience and will be by all who read it.

The voluntary offering of the Portland Scientists, who came to attend the services in a special car, was a pleasant surprise to the Salem church. It was gratefully acknowledged by Mr. Moores in his address.

There was no service in the evening, but the members received many friends from the other churches, who called to show their good will and admire the cosy and homelike structure.

The Afternoon Service Was a repetition of the lesson and addresses of the morning, except that, instead of letters, two addresses were given by Portland friends. The dedicatory service proved that

Christian Scientists. After closing the hymn "He That Has God His Guardian Made," the first reader gave the address of welcome.

First Reader's Address. Friends: We sincerely welcome you to this the opening service in our new church. Our loving thought goes out to those who are longing for a sincere, practical religion, and also to those who realize the satisfaction of having this desire fulfilled.

We know we have your warm interest in the completion of this chaste and beautiful church, which has been demonstrated by this small band of Christian Scientists. A deep satisfaction and happiness is felt by those who realize the higher meaning of church, as given in "Science and Health, with Key to the Scriptures," by Mary B. G. Eddy. "The structure of Truth and Love; whatever rests upon and proceeds from Divine Principle," for they know that this church is also being demonstrated in each consciousness, that this building is a symbol of the "temple not made with hands, eternal in the heavens." Our work is with ourselves primarily, for, as has been beautifully said, "To think and demonstrate in daily living God's thoughts, as given in the Holy Bible and Science and Health is the most acceptable prayer, and this makes each consciousness become the temple of God, filled with health, holiness and harmony, which radiates from a spiritual and not a material source."

In this practical age, when every new theory or religion has to bear the scrutiny of all lines of thought, the fact that Christian Science has met the battery of every kind of criticism for over thirty years, and while the

channels for Truth, and we then see that Divine mind has guided our leader in this as in all else.

There is always a time during the unfolding of the truth given by Mrs. Eddy when her personality troubles one. As the grandeur and verity of her thought presses on our consciousness, however, it becomes the hand that tears away the veil from before our spiritual sight. As such her service become fraught with most loving interest to her followers. Their love and gratitude go out to her more and more as the Truth she voices reaches their consciousness. And as this truth unfolds to one longing for the spiritual understanding as undoubtedly found in her writings, her personality becomes as nothing, or as a clear glass through which the truth is seen. As to those of us who can testify to needs met many, many times by the new-old truth, lived and taught by Jesus, and his disciples, and so beautifully and logically revived by Mrs. Eddy, the love and respect we bear for her seem so natural and unavoidable that we perhaps too often take it for granted others appreciate our love for her.

There is no longer any doubt as to the influence Christian Science is to have in the development of the best in the world. In almost every small town there is some room where half a dozen meet who are realizing that "where two or three are gathered together in My name there am I in the midst of them." These little companies have the same pastor, same form of service, and same spiritual food that the worshippers in the beautiful temples of the largest cities enjoy. In Chicago they are build-
