

SEE ANYTHING?

Better than our rye whiskey, XXX brandy or wines? No, not with a telescope. These are some of the finest brands on the market. Come in and try a sample—these goods please the palate, as well as the eye, and that is saying a good deal.

The SENATE, 160 State Street.

"Busted"

Buttonholes are the bane of a bachelor's (married man's, as well) existence. No wonder the blankety-blanks are forthcoming. Don't worry, don't fume, don't swear. Simply let us do the laundering, and the collar bands will remain intact until the end of the chapter. We are thinking of offering a prize for buttonholes despoiled here.

HINTS FOR FARMERS

Agricultural Education. The importance of agricultural education leads us to risk becoming tire-some in our advocacy of it. We favor increased facilities for agricultural schools wherever they are inadequate. They are inadequate in Pennsylvania. The total value of the buildings and equipment for agricultural education in this state is \$27,000; in Ohio, \$150,000; in New York, \$157,000; in Iowa, \$175,000; in Illinois, \$194,500; in Massachusetts, \$228,000; in Minnesota, \$247,500, and in Wisconsin, \$355,000. Statistics are unnecessary, however, to any one who has seen the schools. No short courses in Pennsylvania because no place to run them! No dairy instructor in a state that stands among the first in extent of its dairy industry! During the past sixteen years agricultural education has received a little over one-eleventh of the state's appropriations for education at State college. Are there ten industries or interests in Pennsylvania of equal importance with agriculture? No, not one. Moreover, the other industries are well provided for in the various universities and technical schools, whereas agriculture has no other school than the one at State college. Pennsylvania has not even a state fair, as the other states above named have. Need we say more to show why the bill now before the legislature should become a law?—Stockman and Farmer.

Curing Scours in Calves. We have had a great deal of trouble with scours or calf cholera, which usually occurs the second or third day. We have tried a great many different ineffective remedies, but reading an article in the Breeder's Gazette recommending rennet tablets we tried them and found them very good, especially for young lambs, writes Theodore Degenhardt. I have saved them when they were almost dead. The best thing I have found for calves is blood meal. We have never lost a calf from scours since using it. We usually give from two tablespoonfuls to half a teacupful at a dose in bolus milk three times a day, according to the peculiarities of the case, but stop when it begins to check.

Scale Insects and Fungus. So much has been written concerning scale insects and fungi on trees that a few lines only are now contemplated to bespeak attention to the subject from those who should be interested. From one end of the country to the other trees are becoming full of scale and other insects, and this evil, together with that of fungi, requires constant attention. It is not alone from nurseries that the evils are spread. Private orchards are infested in almost or quite every state, and from these trees birds carry the insects on their feet from one tree to another. Almost all nurseries are fairly clean of insects, some of them entirely so. The inspection laws of most states compel yearly examinations of the trees, and, besides this, the nurseryman's interests call for clean stock. Every one having fruit trees of bushes should be prepared to meet the foe. The best thing to do at the present time is to write to the advertisers of sprayers for their pamphlets concerning the subject. Very many that I have seen give formulas for making the various compounds, the time when spraying should be performed, the proper apparatus for the purpose and general information on the subject of great value.—Practical Farmer.

The Farmer's Account. In almost every community there are one or two persons who have some knowledge of bookkeeping, inventories and accounts. If indeed they may not be retired experts in this class of work. It would pay many a farmer to hire such a person to make out for him an itemized statement of his assets and liabilities, so that he can start in fresh with an exact knowledge as to just where he stands. Then, even if no regular books are kept, a similar inventory at the end of the year will show the farmer whether he has gained or lost. No business except farming is good enough to stand the carelessness in the matter of financial accounts such as characterizes so many farmers.—American Agriculturist.

The Best Cow. The best cow for each one of us is the cow we like best to handle and be around. There is such a thing as incompatibility of temper between the man and his cow oftentimes, and this fact often marks the line between success and failure. The man who loves his cows and cares for them as a man will who has this affection for his stock will most assuredly receive better returns for his labor than the one who simply tolerates his dairy. The man who takes pride in the Guernsey or the Jersey or the Durham should turn his attention to that particular breed.—Dairy and Creamery.

Moving Large Apple Trees. In answer to an inquiry Rural New Yorker says: Large trees can be moved by cutting back the tops quite severely and taking up as much of the roots as is possible. A large ball of earth should be left fastened to the roots by digging under, prying it up and sliding under a stone boat. This can then be drawn to the new location and slid into place. If the ground is allowed to freeze before digging out the ball, it can be moved with greater safety from crumbling.

With the Bees. In working around bees do not open hives early or late in the day, or on rainy days. Select nice weather, for at such times the old bees, which are the field force, are out in search of nectar, and fewer bees are in the hive. Some think the best time to take honey off the hive is at night, when the bees are asleep, but do not try it.

The SPORTING WORLD

Keeler Will Benefit Americans. "Wee Willie" Keeler, the crack outfielder and batsman secured from Brooklyn by the new American league club in New York, is one of the most popular ball players in the country. He is a star drawing card and will attract hundreds of dollars into the coffers of the American league. Keeler was formerly captain of Ed Quinlan's team, succeeding Joe Kelley.

WILLIE KEELER OF THE NEW YORK AMERICANS.

but as the Brooklynites did not see fit to pay the high salary he required for his services in 1903 Keeler determined to accept the offer of Ban Johnson, who well realized the little fellow's value and resolved to obtain him at any cost. President Joseph Gordon of the New York Americans is very confident that his team will finish close to the top in the pennant race.

Joe Corbett to Play Ball Again. In view of proposed opposition Manager Morley of Los Angeles, Cal., has signed Joe Corbett, the brother of Jim Corbett, by wire at one of the largest salaries ever paid a ball player in this country.

The contract calls for \$5,000 for Corbett's work and stipulates that he shall not pitch more than one game a week for the thirty-six weeks of the playing season. It is also agreed that Corbett shall not appear in any other position than in the pitching department and shall have the privilege of keeping in touch with his business in Frisco when not actually engaged in doing twirling for his team. This means that Corbett will receive nearly \$140 for every time he steps on a ball field, or practically \$1 for every ball he delivers. This sum is exceeded by not more than three players in the country. Corbett has been out of the game for several years, although he has had many offers from clubs in the east. He made his record with the Baltimore under Ned Hanlon and helped that club win two pennants. Then he retired and resisted all efforts to drag him back into the game until this spring.

Boom in Western Golf. There is a possibility that the playing of the women's national championship at Chicago this year will result in increasing the interest in golf among the women of the west.

The interest in golf among the women in the west has not been less during the last few years than it has been in the east, and doubtless the new association which is to be organized this season by the women connected with the forty-two clubs forming the Western Golf association will have the same beneficial results on the standard of the play in the west as have the associations in the east upon the play coming under their jurisdiction.

Ireland's Big Auto Race. All Ireland is rejoicing because parliament favors the act legalizing the great international motor race in Ireland. It is believed the race will prove the dawn of better times in the Emerald Isle. It will induce hundreds of rich English and American automobilists to visit Ireland in the coming summer, who will be charmed with the scenery and life and be tempted to return annually. All Ireland is excited over the prospects of the great race. Hotel keepers are preparing to receive swarms of visitors. Visiting motorists will find the island exceedingly quiet politically.

Quaker City Bowling Sharps. There are so many bowling experts in Philadelphia that it would take considerable space to mention them all. Some of the best known are John Hutt, Charles Womeldorf, H. H. Bronson, Charles T. Daumenhauer, H. H. Price, D. J. O'Donnell, J. C. Macdonald, George E. Flood, H. Warker and Willie Gehman.

Wefers May Go Abroad. Bernard Wefers, the great sprinter, who is now athletic instructor at the Boys' Latin school in Baltimore, may go with an all American track team which John Mockley, coach at Cornell, purposes to take abroad during the summer.

Chicago to Play Cadets. Coach A. A. Stagg announces that the University of Chicago football team will play the United States Military academy team at West Point next fall. The date set for the contest is Nov. 14.

Jeff and Corbett. The critics are unanimous in their opinion that Jeffries will defeat Corbett. Many of them even say Corbett has no chance whatever.

WHAT TIME PROVES. This thing of being sick and looking for a cure is a mighty serious business. People are not given to joking even at the first symptom of the approach of the grim destroyer. They do not want to be the subjects of experiment, but want medicine that has been the test of years behind it. A medicine that has been made and used for 20 years gives assurance of its worth, and can be taken with a faith that they have the very best cure the world affords. All this can be said about Dr. Gunn's Improved Liver Pills as a remedy for sick-headache, dyspepsia and indigestion, it begins right at the source of the trouble and removes the cause. We will send a sample box of these pills free, or a full box on receipt of 25c. Sold by all druggists for 25c per box, or address Dr. Bosanko Co., Philadelphia, Pa. For sale at Dr. Stone's Drug Stores. 2 To Swipe Timber. Twenty-two timber land hunters left Ashland Tuesday morning to locate lands in the Lakeview district beyond the town of Lakeview. The party, which comprised mostly residents of the state of Washington, was transported in six rigs, provided by S. C. Hamaker, of the Grove stable, who contracted to stage them across the mountains. The distance to be covered to and from Lakeview is 360 miles, and the trip will cover 13 days.

Suffered 18 Months. I can heartily recommend Acker's Tablets for dyspepsia and stomach troubles. I have been suffering for eight months, and tried many remedies without any relief, until I got Acker's Dyspepsia Tablets, which I used only a short time, and am now perfectly well. The Wonder of The Century

Dr. Gunn's Improved Liver Pills. A special arrangement with the publisher enabled the Oregonian to publish the leading agricultural weekly of the West. This paper at an exceedingly low price and interest of his country, and is the best and most practical journal for the farmer, horticulturist, and stock raiser. The readers of this journal know the value, therefore, descriptive of it as an agricultural publication.
