

WOMAN'S BEAUTY.

It is Made or Marred.

There is nothing more subtle than beauty. It eludes all attempts to define it. A woman may have the elements and lines of the Medician and yet lack beauty. Or she may be a beautiful woman. There are, however, one kind of beauty which is made by all and which is every day a dowry, a beauty to which the name of "The Beauty of Youth." Many a time we have watched some sweet, young girl, and we have said to ourselves, "How beautiful by her beauty. But if we could have the beauty we find it is made up of clear skin, clear complexion, bright, rosy lips and rounded contours. Beauty ought to last always. But

How soon we see it fade. The young wife looks at her yellow skin, sunken cheeks and hollow eyes and marvels at her own falling off. And the younger wife still retaining the beauty of youth wonders what her husband could have seen attractive in her, not knowing that it will be their turn to fade very soon.

HOW TO KEEP BEAUTY.

In order to preserve this beauty of youth, to retain the charm of sweetness and freshness which belongs to maidenhood, the prerequisite is to understand that the chief foe of woman's beauty is womanly ill-health. Young women are often very careless of themselves. The temptation of the dance, or of the sleigh-ride overrules their prudence, and the result is suppression and perhaps irregularity. This is only the beginning of a series of evils, and yet this alone is sufficient to steal the freshness from the face. The womanly health should be protected with the utmost care and the first symptom of derangement or disease should be met by the use of Dr. Pierce's Favorite Prescription.

"I will always recommend Dr. Pierce's Favorite Prescription, 'Golden Medical Discovery' and 'Pleasant Pellets,' for they cured me when doctors and other medicines failed," writes Mrs. Mary E. Lewis of Tanner, Gilmer Co., W. Va. "For fifteen years I suffered untold misery. When I commenced taking Dr. Pierce's medicines, I had given up all hope of ever getting well. I could not get down to sleep, and everything I ate would almost cramp me to death. Was very nervous and could hardly walk across the room. Only weighed ninety pounds when I commenced taking these medicines; I now weigh one hundred and ten pounds and am having better health than ever before. My friends all

say they can hardly believe that I am the same person; after being sick so long I have changed to be robust and ruddy checked. I have taken fifteen bottles of 'Prescription,' fifteen of the 'Discovery' and fifteen of the 'Pellets.' I know that if it had not been for your medicines I would not have been living to-day."

Dr. Pierce's Favorite Prescription is a woman's medicine. It is not offered as a cure-all but it is confidently recommended as a sure and safe remedy for all those diseases of women which are curable by the use of medicine. It establishes regularity, dries the drains which destroy the strength and beauty of women, heals inflammation and ulceration and cures female weakness. It is the best preparative for motherhood, giving great strength and elasticity to the organs of maternity, and making the baby's advent practically painless.

"GETTING YOUNG AGAIN." It is one of the triumphs of "Favorite Prescription" that its results are so palpable and visibly real. The cure of womanly diseases by this medicine is proved by the gain in flesh and weight, by the restoration of youthful freshness, by the renewed strength and ambition, and by all the outward and visible signs of robust health.

"I enjoy good health; thanks to Dr. Pierce's Favorite Prescription and 'Golden Medical Discovery,' writes Mrs. J. J. Schneyer, of Pontiac, Livingston Co., Ill. "Have taken six bottles of each kind. I was taken sick last February and the doctors here called it 'Grip.' I lay for four weeks in bed, and when I got up I found I had 'displacement.' Had such aches and pains in my back and limbs, could not stand any length of time. I knew that our home doctor would insist the first thing on an examination, and that I would not submit to, unless I was dangerously sick, and then it would be too late. If anyone had told me your medicines would do me so much good I would have said, 'Oh no, not that much good.' I can say truly I was surprised at the benefit I received. An old friend of mine said to me, 'Why, what is the matter with you, you are getting so young again?' I told her I had taken six

bottles of Dr. Pierce's medicine, and that if she would do likewise she would feel ten years younger, too." There is one clause in Mrs. Schneyer's letter, which voices the sentiments of thousands of sensitive women. "I knew that our home doctor would insist the first thing on an examination, and that I would not submit to, unless I was dangerously sick, and then it would be too late to do any good."

Many a woman in just such a case, realizing the danger she runs yet neglects medical treatment because she shrinks from the indelicate questionings, the offensive examinations and obnoxious local treatments which the home physician often thinks necessary. A WAY OUT of this difficulty is opened for women by Dr. Pierce's invitation to consult him by letter, free. All correspondence is held as strictly confidential, and the written confidences of women are guarded by the same professional privacy observed by Dr. Pierce in personal consultations with women at the Invalids' Hotel and Surgical Institute, Buffalo, N. Y. Address Dr. R. V. Pierce, Buffalo, N. Y.

THE FAMILY FRIEND. A. I. Amend, of Newfield, El Paso Co., Colo., says: "We have studied the Medical Adviser thoroughly, and when anything is the matter with any of our large family the first thing we do is to see what the book says." Dr. Pierce's Common Sense Medical Adviser, containing 1008 large pages and over 700 illustrations, is sent free on receipt of stamps to pay expense of mailing only. Send 31 one-cent stamps for the cloth-bound volume, or only 21 stamps for the book in paper-covers. Address Dr. R. V. Pierce, Buffalo, N. Y.

As soon as Mr. Burton was elected to the senate he went to Washington to ask the president for Bristow's scalp. "I am glad to see you Senator Burton," said President McKinley, "glad to see you. It is a good thing to have strong young men in the senate. I shall be glad to do anything I can for you."

"That, Mr. President," said Senator Burton, "brings me to the point I want to make. I desire to speak to you concerning the Federal patronage." President McKinley knew what was coming, he had been warned. "Certainly, Senator," he replied suavely, "certainly; whenever you have any good man you want placed, and good man—like Bristow, for instance—come and see me. Good morning."

Bristow is in the department yet, and just now strong in the public view from the investigation he is conducting. The Right Place to Begin. When the political history of Maryland is written there will be a paragraph or two for the McComas-Mudd feud. It is now in progress, bitter and unrelenting. McComas was a United States senator until March 4 last, and Mudd is a representative in congress. Both are Republicans. In the old days, though, they were bosom friends. McComas was the leader and Mudd a follower. One day they were dining together. "Sydney," asked McComas, "how old is your boy?" "Sixteen," replied Mudd, proudly. "My, my," said McComas, "I didn't think he was so old, but I'll tell you, Sydney, when the time comes I'll do something handsome for that boy."

Mudd leaned over the table. "Mac," he said, "when you want to do anything for the Mudd family you forget the boy, and begin with the old man." —Philadelphia Saturday Evening Post.

STORIES ABOUT PEOPLE

Admiral Dewey Admits Statement and Expresses Hope

Payne ate Terrapin, and Mudd Know Where to Begin

The recent interview of Admiral Dewey, in which he said the American navy had nothing to fear from Germany, and the pother kicked up by Germany about it, reminded the admiral's friends of a similar interview he gave out on his way home from Manila to the triumphal reception in New York.

Somewhere on the cruise there came aboard the Olympia a newspaper correspondent with a letter of introduction to the Admiral from a common friend. The Admiral talked freely. The correspondent printed what he said. One sentiment was that, sooner or later, this country is to have a war with Germany.

After the interview was printed the Admiral stood by what he had said. As a sailor man and not a politician he did not try to impeach the reporter. Still, he thought there might possibly be an inquiry about the interview, either from this country of Germany, and he decided to prepare a statement, for he knew he should be very busy when he reached New York.

The Admiral thought about the statement for some days. Then he concluded what he wanted to say was this: "Yes, I said what the reporter quoted me as saying, and I hope I shall be alive when it happens."

Where Postmaster Payne Got His Gout Senator Mark Hanna has a lame knee. The ailment has been described many times as the gout. It was nothing of the sort. The trouble is due to a fibrous growth that makes it extremely painful for the senator to walk at times, and is always inconvenient.

A few days ago Postmaster General Payne limped through the lobby of the Arlington hotel in Washington. Senator Hanna was sitting in one of the big leather chairs.

"What's the matter with Payne?" asked a friend.

"He's got the gout—real old-fashioned gout," Senator Hanna replied. "He came here from his rural retreat in Wisconsin and ate too much terrapin."

Senator Hanna paused. Then, with fine indignation, he said: "I don't know that I'm sorry for him. Why, when his friends began twisting him about having the gout he calmly told them he caught it from me."

A Daniel Come to Judgment. Joseph L. Bristow, Fourth Assistant Postmaster General, and Senator Burton were political enemies out in Kansas, and are yet.

As soon as Mr. Burton was elected to the senate he went to Washington to ask the president for Bristow's scalp.

"I am glad to see you Senator Burton," said President McKinley, "glad to see you. It is a good thing to have strong young men in the senate. I shall be glad to do anything I can for you."

"That, Mr. President," said Senator Burton, "brings me to the point I want to make. I desire to speak to you concerning the Federal patronage."

President McKinley knew what was coming, he had been warned. "Certainly, Senator," he replied suavely, "certainly; whenever you have any good man you want placed, and good man—like Bristow, for instance—come and see me. Good morning."

Bristow is in the department yet, and just now strong in the public view from the investigation he is conducting. The Right Place to Begin. When the political history of Maryland is written there will be a paragraph or two for the McComas-Mudd feud. It is now in progress, bitter and unrelenting. McComas was a United States senator until March 4 last, and Mudd is a representative in congress. Both are Republicans. In the old days, though, they were bosom friends. John O. Collins in Four-Track News Writes of Him

Halfway between the Mohawk river and the Canadian line, in Essex county, New York, shut in by a dozen towering peaks of the Adirondacks, are the living place and sleeping place of "Old John Brown." The living place is the home from which Brown went out to fight in Kansas, and the sleeping place is a grave in which they laid his body after the execution at Charleston in 1859. Thirty-seven years after his death, when the horror of his anarchy had been forgotten, Kate Field and a dozen friends bought the old Brown farm at North Elba and turned it over to the state as a public charge. It is near Lake Placid and the other resorts of the Adirondacks. Frequently during the summer sojourners in want of amusement go over to the place and rest for a few minutes in the low-roofed, two-story house. Everyone knows the story of John Brown's repeated business failures, his visions, in which a "voice" told him to free the slaves, his part in the slavery war in Kansas and the attack on the arsenal at Harper's Ferry. All these things the world has weighed and it has given an honored place to him who was arch anarchist only fifty years ago.

TAKEN IN BATTLE

The Thrilling Experience of Captain Westbrook

For a Year After His Capture He was Moved From One Prison to Another And was Finally Exchanged

A Confederate force under command of Brigadier-General John A. McAusland had attacked, on July 3rd, 1864, a blockhouse ten miles west of Martinsburg, W. Va. Captain N. S. Westbrook with the remnants of Companies B and F of the 135th Ohio Volunteers, made a gallant defense but when a six gun battery was brought to bear upon his position, further resistance became a useless sacrifice of life. For a year after his surrender, Captain Westbrook, who now lives at Ripley, Ill., was confined in Southern prisons. In telling of his experience, he says: "They took me from one place to another till I had been in nearly all the prisons of the Confederacy and by the time I was exchanged at Annapolis in the spring of 1865, I was reduced to a physical wreck. The experience caused sciatic rheumatism which became chronic and did not leave me until thirty years afterward when I took Dr. Williams' Pink Pills for Pale People and was cured."

"The disease affected my entire system. In addition to the agonies of the rheumatism I had indigestion in its worst form, together with kidney trouble and heart failure. I was getting thoroughly used up." "How did you come to take Dr. Williams' Pink Pills?" was asked. "A neighbor of mine, James M. Stout, was cured of rheumatism by this remedy when he was so bad that he could not straighten up. So I thought what cured him would cure me. And I was right."

Rheumatism is a disease of the blood. External applications may afford temporary relief, but to cure the disease it is necessary to treat it through the blood. Dr. Williams' Pink Pills for Pale People go directly to the seat of the disorder, purifying and enriching the blood by eliminating poisonous elements and renewing health-giving forces. They are a positive specific not only for rheumatism but for all diseases arising from poor blood or weakened nerves. They are sold at fifty cents a box, or six boxes for two dollars and a half, and may be had of all druggists or direct by mail from Dr. Williams Medicine Company, Schenectady, N. Y.

A NATURAL RESULT.

It is very reasonable to suppose if the foundation of a structure was removed that the building itself is bound to come down. This same principle can be applied to disease. Take a medicine into the system that will remove the cause of sickness, and the illness leaves of itself. Dyspepsia, indigestion, sick-headache and biliousness have their foundation in stomach disorders. Remove this weakness and the other symptoms are no more. There is one cure for all this that all druggists sell for 25c per box. It is called Dr. Gunn's Improved Liver Pills. They get right at the beginning of these diseases and make the cure by taking away the cause of it. We will send a small box free by mail, or a large box on receipt of 50c. Address Dr. Bosan's Co., Philadelphia, Pa. For sale at ... Boone's Drug Stores. 4

JOHN BROWN'S BODY

Place Where He Sleeps Near Lake Placid

John O. Collins in Four-Track News Writes of Him

Halfway between the Mohawk river and the Canadian line, in Essex county, New York, shut in by a dozen towering peaks of the Adirondacks, are the living place and sleeping place of "Old John Brown." The living place is the home from which Brown went out to fight in Kansas, and the sleeping place is a grave in which they laid his body after the execution at Charleston in 1859. Thirty-seven years after his death, when the horror of his anarchy had been forgotten, Kate Field and a dozen friends bought the old Brown farm at North Elba and turned it over to the state as a public charge. It is near Lake Placid and the other resorts of the Adirondacks. Frequently during the summer sojourners in want of amusement go over to the place and rest for a few minutes in the low-roofed, two-story house. Everyone knows the story of John Brown's repeated business failures, his visions, in which a "voice" told him to free the slaves, his part in the slavery war in Kansas and the attack on the arsenal at Harper's Ferry. All these things the world has weighed and it has given an honored place to him who was arch anarchist only fifty years ago.

WHAT THE BRAIN IS MADE OF

Principally Water and a Trifle of Phosphorus

Whether it be the brain cell of a glow-worm, or one trembling with the harmonies of "Tristan and Isolde," the stuff is made of much the same; it is a difference of structure, apparently, rather than of material. And the chemical difference between a brain or nervous cell and that of the muscles or the skin seems reducible mainly to a difference in the proportion of two substances, water and phosphorus. Lean beef, for example is from seventy to eighty per cent water; the brain is from ninety to ninety-five per cent water. And a brain or nerve cell may contain from five to ten times as much phosphorus as, let us say, the cells of the liver or the heart. The actual quantity is of course extremely small—by weight but a fraction of one per cent. About three pounds avoirdupois, of this very complex phosphorized stuff make up an average human brain. There is a lot more of it distributed down one's spinal column; and little phoexuses all over the body, wherever a group of muscles are to be moved; and others still, the sensory or feeling nerves, which are everywhere. It is hard to find a cubical half-inch outside the bones where they are not. All told, the nervous substance, which for the sake of making its functions clear I have called the matter which thinks, forms a not inconsiderable portion of the body outside of the bony skeleton. It is made up of distinct and separate units, for the most part extremely minute, though some attain a length of two or three feet. These units for lack of a more misleading name, are called cells. The "cells" which run from the small of your back down into your toes and wiggle the same, or inform you when a member of the family is stubbed, are the longest. Those of the brain are mostly so small as to tax the powers of the microscope; their average length would be measured in thousandths of an inch. There have been many attempts to get at their actual number; it is certainly large. Computations for the brain alone range from 600 million upward. One duo, I think to Waldeyer, sets the total number of brain cells (average) at 1600 million. This would mean a brain population exceeding the known population of the earth.—Carl Snyder in Harper's Magazine for May.

G. W. Johnson & Co.

Lane County at State Fair. Eugene, Or., May 8.—W. H. Wehrung, president, and M. D. Wisdom, secretary of the Oregon Agricultural Society, interviewed the county court today on the subject of making a county exhibit at the forthcoming state fair. The county court donated \$100 to a suitable exhibit, and appointed E. M. Warren to prepare the same, and there is a general desire to see a better exhibit than has ever been made from the county.

One of the longest road petitions to come before the county court today, asking for a road from Cottage Grove to Lorraine.

HERPICIDE BEAUTY IS NEVER COMPLETE

Without a thick, luxuriant head of soft, glossy hair, which is in truth "woman's crowning glory." The hair is the life of her character, for, by destroying the scalp germ that feeds upon the oil of the hair root, it makes dandruff, falling hair and all scalp diseases impossible. It thus produces a new and thick growth to replace the old thin, brittle hair. One bottle will restore your hair and all scalp diseases. For sale at all First-Class Drug Stores.
