XX OFFICE XX

Willamette Hotel, 10 to 12 o'clock Daily where they can be consulted in private  
Except Sunday

## McCormick Mowers

The way the McCormick Mowers are selling again this season, only further proves their lasting merits. The best test of any implement or tool is in the place it's intended to be used. The best place to try a McCormick Mower is in a hay field, the tougher the better, for the weight and width of the frame eliminate the side draft, and the draw cut and positive motion start the knife on the instant. Here are a few McCormick features.  
Heaviest main frame made, widest frame.

Gears set at extreme left, balancing the cutter bar, all enclosed. Main gear hung on both sides. Some are not.

Extra heavy cutter bar, cold rolled steel, stiff and flawless. Wearing plates on cutter bar, cost 10c each to replace. Tilting lever does not throw cutter bar out of line. Doubletrees hitched under the tongue, relieves neck weight and draws directly on main shoe.

A Test—Take a McCormick Mower into the field, drop the tongue from the neckyoke and start down the swath. The tongue will float along and there will be no side draft. Try any other mower that way. You'll see something happen. Remember that no McCormick Mower is too old or too out of date to get repairs here.

## McCormick Rakes

There's a lot of satisfaction in starting into the field with a rake that will do the business and stay where you want it. Examine the angle iron axle of the McCormick, with its truss, its heavy malleable tooth plates, its heavy channeled wheels with staggered spokes and removable boxes, its easy self dump, its cleanness, and all that goes to make up a good rake, and you'll see a vast difference in it and others. A dollar more did you say? What's a dollar on a machine when you get \$5 more in goodness or durability. You'll lose five times the dollar in time and worry and bother, chasing after repairs for some unknown or untried rake, or machine.  
Get a McCormick and stop worrying

### Hay Tools Of All Sorts

Carriers, slings, pulleys, forks, hooks, and everything you need in the line of tools to put away your hay. Our prices will interest you for we own the goods right.

Hay Presses—See us in this matter if you're interested. We can talk to you along this line with circle or power presses, and with the engine as well.
