

TONIGHT WE ARE IN JUNE

A Clever Pastoral Drama at the Grand

Human Hearts With a Strong Cast in Melodrama Monday

Miss Grace Turner conceded by press and public alike to be one of the cleverest young stars on the American stage today in that strong attraction, "One Night in June," is the splendid offering which will hold the boards at the Grand Opera House tonight. It promises to be the dramatic treat of the coming season for both play and players come indorsed with the highest praise from the best known critics of the country. The scenic, electrical and mechanical effects are magnificent and the dressing of the production faultless. The story of the play is a country love story between a country parson and a village belle, and the opening scene is laid in the pretty village of Barre, Vermont, "One Night in June." The second act shows a swell gaming

Humors of the Blood

Cause many troubles,—pimples, boils and other eruptions, besides loss of appetite, that tired feeling, fits of biliousness, indigestion and headache.

The sooner one gets rid of them the better, and the way to get rid of them and to build up the system that has suffered from them is to take

Hood's Sarsaparilla and Pills

Forming in combination the most effective alterative and tonic medicine, as shown by unequalled, radical and permanent cures of

house in New York city; another scene takes you to one of the big city churches, during an evening service. The stirring events which happen in the great city just temper the quiet New England life. The blending of comedy and pathos is artistically done, and laughter and tears follow each other in rapid succession. Among the supporting company, is William J. Holmes, known as one of the best of eccentric character comedians, and baby Little Genevieve, the wonderful child actress. The others are all capable and well-known metropolitan artists. During the action of the play, many new, clever and up-to-date specialties are offered by the management.

Salem, Albany and Eugene were visited by the Baker Theatre Company during the occupation of George L. Baker's house at Portland, Oregon, by the Pollard Lilliputian Opera company, and at each of the cities played the reception given the favorite theatrical organization of the Pacific coast was most enthusiastic.

Human Hearts Monday.

Any play that teaches a great moral lesson, is bound to do good to a community. Some of the greatest sermons ever preached against evil deeds and association are embodied in the plays of the stage. The lesson of life is presented to the listener in a way that makes an impression on the mind and gives him food for thought. While the spectator is listening to the text of the play, his visual sense is being attracted by seeing the scenes enacted before his eyes that are being described in the words to which he is listening.

In such a play as "Human Hearts" which will be shown at the Grand Opera House Monday night the contrast between virtue and vice is sharply drawn. The author has not minced matters in drawing his characters, and as the incidents of the play are based on real occurrences, he has not had to draw upon his imagination to invent a motive for "Human Hearts."

The characters of Jeanette and Frederick Armsdale in "Human Hearts" should be carefully studied by everybody. We meet their prototypes in daily life, in nearly all large communities. How often do we see men and women, who, with all the advantages of education, comfortable homes, and the loving care of parents and friends, still go astray, and sink lower and lower in the social scales, until they reach the lowest depths of degradation. We meet them every day.

Another novel character drawing in this play is that of Jim Mason; a man born amidst the lowest surround-

ings, with no advantages in early life, knowing nothing of the difference between right and wrong; a criminal because he has had no opportunities to be anything else. But here is a character that conspires to better things. The inherent instinct to raise himself above the level of his surroundings, lying dormant, but, when the realization of the difference between right and wrong is brought home to him he chooses the proper path.

SUNDAY SERVICES

Christian Science.

Second Church of Christ, Scientist, 140 Chemeketa street. Services at 10:30 a. m. and 7:30 p. m. Subject of lesson sermon: "Mind." Sunday School at 11:45 a. m. Wednesday evening. Testimonial meeting at 7:30. Reading room in the church open each afternoon except Sunday. All are cordially invited.

First Unitarian Church.

Corner of Chemeketa and Cottage streets. Frank Abram Powell, pastor. Subject at 11 a. m.: "Rock and Sand." In the evening Mr. Powell will begin a series of lectures on the general subject: "The Truth About the Bible." Special subject at 7:30: "The Synoptic Gospels." A special invitation to all who desire to know the facts about the Bible.

Y. M. C. A.

Corner of Commercial and Chemeketa streets. Rev. C. T. Hurd will address the meeting for men at the Y. M. C. A. Sunday afternoon at 3:30 o'clock. All men are cordially invited.

St. Paul's Episcopal.

Services on Sunday at 10 a. m.

Corner of High and Center streets. Preaching by the pastor, Elder D. Errett, at 10:30 a. m. and 7:30 p. m. Respective themes: "Marks of a Genuine Church" and "Is Christianity a Failure?" Bible School at 12 m., Charles Shoemaker superintendent. Junior C. E. at 3 p. m. Senior C. E. at 6:30 p. m. The revival meetings continue during the week. You are cordially invited.

Christian Science.

First Church of Christ, Scientist. Services: Lesson sermon and children's classes at 11 a. m. Subject of morning lesson sermon: "Mind." Wednesday evening meeting at 7:30 p. m. Reading room open daily except Sunday. Christian Science Hall, corner of Court and Liberty streets.

Thomas Huxley it was, who described the brain as a perfect logic engine, working without friction, without fret and without fear, with the strain equally divided. "The question then becomes," says Dr. Pierce, "how to run this engine without blowing up the boiler, without accident, and without sending the locomotive to the repair shop. An ignorant man cannot run an engine; neither can a man over-work his brain unless he observes certain laws of health without meeting with some disaster." If the engine is properly oiled and cared for, it will last a great many years, and in the same way if the human mechanism is properly looked after it will last the allotted three score and ten years. As civilization progresses, the draft on the brain and nerves increases, but no class of work burns up blood as fast as brain work. Hard work confined to shop or office, without the invigorating air and sunshine becomes 'the pace that kills,' the muscles and flesh become flabby and the blood watery. The human system must be a laboratory for the constant manufacture of rich, red blood. Success and courage depend upon the blood and the blood depends upon the stomach, for the stomach, when healthy, takes up from the food we eat the elements required for the blood. If the stomach cannot assimilate the food taken up, then the blood and the nerves starve for the proper nourishment they require. This human machine soon breaks down, like the engine without coal for its boilers, because the heart, liver and lungs do not receive the pure blood necessary to keep them strong and active.

RULES OF HEALTH.

"Remember this, that our bodies will not stand the strain of over-work without good, pure blood any more than the engine can run smoothly without oil." After many years of study in the active practice of medicine, Dr. R. V. Pierce found that when the stomach was out of order, the blood impure and there were symptoms of general break-down, a tonic made of the alterative extracts of certain herbs and roots was the best corrective. This he called: Dr. Pierce's Golden Medical Discovery. For over a third of a century this tonic and alterative has been more largely sold than any other blood medicine or nerve tonic. Being made without alcohol, this "Medical Discovery" does not shrink up the red blood corpuscles, but on the other hand it increases their number, and they become round and healthy. It helps the stomach to assimilate or take up the proper elements from the food, thereby helping digestion and curing dyspepsia, heartburn, and many uncomfortable symptoms, such as heart-palpitation due to gas formed in the stomach. It is especially adapted in diseases attended with excessive tissue waste, especially in convalescence from the various spring fevers, whether of a malarial or typhoid character. As a tonic and reconstructive during and after the influences of grip it will prove of particular value. It has been extensively used as a re-builder after the severity of a rheumatic attack. "I now take the opportunity to let you know that I have not forgotten you or your wonderful medicines," writes Mrs. L. D. Cronk, Redfield, Oawego

Co., N. Y. "One year ago last December, my husband, Lorenze D. Cronk, was taken sick with typhoid fever; he had a double run and then suffered a relapse, which left him with lumbago and bowels trouble. Every time he would try to work he would have an attack and each time more severe. He continued to grow worse until about the last of August, at which time he was reduced to a mere skeleton, not weighing over ninety pounds. Everyone gave him up to die when the leaves fell. I could not bear to give him up without trying Doctor Pierce's Golden Medical Discovery, having tested it in my own case and having used it jointly with your 'Favorite Prescription' and 'Pleasant Pellets.' These medicines saved my life three years ago. I began giving my husband one teaspoonful of the 'Golden Medical Discovery' four times a day. In a few days he began to have a better appetite and rest better nights. He continued to improve and has now taken nine bottles of the 'Golden Medical Discovery' and seven vials of the 'Pellets' and is feeling good. Weighs 145 pounds and is gaining every day. He is now able to do quite a good deal of work. Everyone who sees him, says, 'I never expected to see you out and around again.' He tells them they never would if it had not been for Dr. Pierce's Golden Medical Discovery and 'Pleasant Pellets.' Thanks be to God and to Dr. R. V. Pierce." Dr. Pierce's Common Sense Medical Adviser is sent on receipt of 21 one-cent stamps for the paper-covered book, or 31 stamps for the cloth-bound. Address Dr. R. V. Pierce, Buffalo, N. Y.

New Scheme in Tips.

M. Leon Dunfour, a Parisian restaurateur, has decided to do away with tips by assessing his guests five per cent of their bills and dividing the money thus raised among his waiters. He has had little notices

to this effect printed on pretty pink paper in three languages—twit, French, English and German—explaining modestly that this is a trial made in order to palliate as far as possible the irritating question of gratuities and adding that the percentage will be handed over in full to the staff and be considered as tak-

ing the place of the former gratuities. The majority of his guests thoroughly approve of it, and so does his staff. He calculates the average percentage a month at 1200 francs, which, divided among his ten employes, makes 120 francs for each. This means a rough total of 1440 francs a year for each member of his personnel.
