

**Testing The EYE**

Different men, different methods. Our method is scientific. We have the instruments, the experience, the knowledge that is necessary, and your eyes will be examined without charge. Then, again, we have the proper glasses that will be exactly what your vision calls for after the test is made. No haphazard work here. Just the best there is in optical work.

**DAIRY IS SURE TO WIN**

**Western Oregon a Nature Butter and Cheese Region**

Professor C. L. Smith, Farmers' Institute lecturer for the Washington State Agricultural college, was in Portland last evening, on his way to the institute, which opened at Walla Walla this morning. Mr. Smith was all over the state of Oregon a few years ago, in the interest of the farmers, whom he advised to pay more attention to dairying, and he thinks they have profited by his advice, so well that this state is now on the point of becoming the foremost on the Pacific coast in production of milk, butter and cheese.

"I consider Western Oregon and Western Washington natural dairy regions," Mr. Smith said, "and every day's progress in these industries proves that I am correct. Lands on which farmers made a poor living raising wheat are now making money for their owners, who have quit grain raising and gone into dairying."

"A half dozen good cows, well kept, will make more money for their owners than one would imagine who has not the actual experience. I can cite you one instance as an illustration of many:

"H. P. Albery, a farmer of Gray's river, cleared \$111 per cow in the year 1903. He milked ten cows and fed them well with 40 acres in cultivation, though he had some outside range. A few years ago he started with seven good Jersey cows and now he has a large herd, having been particular in breeding. He chooses his own according to their productive ability, and when he has any second grade in his herd he brings them to Portland and sells them to people who desire Jersey cows of their own."

Professor Smith goes his pile on "silos," which he so strongly urged the farmers of the Willamette valley to construct some years ago. He finds many of them in existence now and says they add to the winter supply of milk very materially.

"The ordinary silo is built of barrel staves, is 16 feet in diameter and 30 feet high," he said. This is built on top of the ground and filled with chopped cornstalks, cobs and all. The bottom and sides are airtight and as the fodder is fed from the top the unused portion keeps in good condition until the bottom is reached. Such a silo will hold 30 tons and supply five cows for 200 days. These silos will be more numerous every year in Oregon and Washington, and the milk cows on the silo farms will give as much milk in winter as in summer, while the quality of the milk will be better than ever."—Telegram.

**Sacred Heart Academy.**  
The dramatic entertainment rendered by the pupils of the Sacred Heart Academy at the opera house last night was a great success, and the young ladies reflected credit upon their instructors. They were assisted by Miss Ruby Phelps, who gave a remarkable exhibition of club swinging, also a reading from Hiawatha, which was well received. Her interpretation of "A Railway Station in North England," was exceedingly well given. The first vocal class, of about 40 children, gave a selection.

the harmony of which showed most careful training. Another chorus, "I'd Like to Be Like Grandma," was given by 10 little girls, who indeed looked very quaint in their grandma costumes, and created much merriment. Several musical selections were given, the piano quartet by Misses Hawley, Sutherland, Woods and Walsh being rendered in perfect harmony. Misses Georgia Booth and Evelyn Wood also gave a piano selection, showing exceedingly good expression.

This was followed by the drama, entitled "The Magic Bell," in which all the young ladies did so well it would be hard to say which was best. Miss Margaret Sutherland, as king, carried her part exceedingly well, and seemed quite at home on the stage, as did also Misses Hawley and Powell. Miss Goldie Goulet appeared as a haughty countess and did the part full justice. Evelyn Wood and Olive McGee, as the two sisters, showed great talent, as did Miss Hattie Miles. Miss Anna Brinkly, as John's countess' footman, made quite a "handsome" one, and played her part well. The Misses Howard, Glover, Hoffman, Lebold, Ecklerien, Moisan and Church, who carried minor parts, also did remarkably well.

The Cecelian Academy Stringed Orchestra, assisted by Misses Bess Tilson and Lillian Stege as violinist, then appeared, and were much appreciated.

The whole entertainment was well given and the sisters are to be congratulated upon the excellent way in which it was presented.

**What a Mouth**

You have several teeth missing, which makes you ashamed to laugh. If you do open your mouth everybody notices the deficiency, and unpleasant comments are made about it when your back is turned. Why not have a bridge made, which will look as well as the original teeth, and feel just as comfortable? Call and see us if you want the best work performed painlessly.

**No Pain No Delay**
