

THE SIXES WILD MAN AGAIN

Hairy Being Who Is Horror of the Miners

He Hurls Four Pound Rocks Through the Air Like Base-balls

The appearance again of the "wild man" of the Sixes has thrown some of the miners into a state of excitement and fear. A report says the wild man has been seen three times since the 10th of last month. The first appearance occurred on "Thompson Flat." Wm. Ward and a young man by the name of Burlison were sitting by the fire of their cabin one night when they heard something walking around the cabin which resembled a man walking and when it came to the corner of the cabin it took hold of the corner and gave the building a vigorous shake and kept up a frightful noise all the time—the same that has so many times warned the venturesome miners of the approach of the hairy man and caused them to flee in abject fear. Mr. Ward walked to the cabin door and could see the monster plainly as it walked away and took a shot at it with his rifle, but the bullet went wild of its mark. The last appearance of the animal was at the Harrison cabin only a few days ago. Mr. Ward was at the Harrison cabin this time and again figured in the excitement. About 5 o'clock in the morning the wild man gave the door of the cabin a vigorous shaking, which aroused Ward and one of the Harrison boys who took their guns and started in to do the disturber. Ward fired at the man and he answered by sending a four-pound rock at Ward's head, but his aim was a little too high. He then disappeared in the brush.

Many of the miners avow that the "wild man" is a reality. They have seen him and know whereof they speak. They say he is something after the fashion of a gorilla and unlike anything else either in appearance or action. He can outrun or jump anything else that has ever been known; and not only that but he can throw rocks with wonderful force and accuracy. He is about seven feet high, has broad hands and feet and his body is covered by a prolific growth of hair. In short he looks like the very devil.—Myrtle Point Enterprise.

South Dakota Favors Hearst.
Sioux Falls, S. D., March 30.—The democratic state convention for the selection of four delegates-at-large and alternates to the St. Louis convention was called to order here shortly before noon. The convention for the nomination of a state ticket will be held at Aberdeen in July. It is a foregone conclusion that today's convention will reaffirm the platform of 1900 and it appears to be equally certain that the delegates from South Dakota will be instructed for William R. Hearst for the presidential nomination. The recent declaration of former Senator Pettigrew for the New York congressman is indicative of the sentiment of the democratic party throughout the state.

Eruptions

Dry, moist, scaly tetter, all forms of eczema or salt rheum, pimples and other cutaneous eruptions proceed from humors, either inherited, or acquired through defective digestion and assimilation.

To treat these eruptions with drying medicines is dangerous.

The thing to do is to take **Hood's Sarsaparilla and Pills**

Which thoroughly cleanse the blood, expelling all humors and building up the whole system. They cure Hood's Sarsaparilla permanently cured J. G. Hines, Franks, Ill., of eczema, from which he had suffered for some time; and Miss Alvina Walter, Box 212, Algona, Wis., of pimples on her face and back and chafed skin on her body, by which she had been greatly troubled. There are more testimonials in favor of Hood's than can be published.

Hood's Sarsaparilla promises to cure and keeps the promise.

COURT HOUSE NEWS

The answer in the case of Dr. Cornelius O'Leary vs. Thos. Conner was filed. Plaintiff brought an action to recover the \$649 alleged to be due for medical services rendered and defendant in his answer denies the account, except the sum of \$250.

Abbie and Nicholas Gehlen were appointed administrators of the estate of Theo. Gehlen, deceased, with bonds fixed at \$8,500. John Geodera, A. Lalek and John C. Eulberg were named as appraisers.

M. E. Pogue has commenced an action against N. Simon for the recovery of the possession of one-fourth interest in the northeast quarter of block 8, Roberts' addition to Salem. Plaintiff claims that he is the owner of one-fourth and defendant of three-fourths interest in the above described property, and that defendant has taken possession of the whole thereof, and refuses to allow plaintiff to enter or use the same. Plaintiff asks for \$100 damages for the unlawful withholding of the same, and for \$36 costs and rent.

Real Estate Deals.

B. E. Edwards sold a tract of land in Salem to A. E. Mitchell for \$500, and the same grantor sold to M. B. Mitchell a similar piece for the same consideration.

F. J. Ridings sold 10 acres to J. H. Shults in t 5 s, r 1 w, for \$807.

R. Brown sold to G. D. Bannister 22 acres in t 8 s, r 3 w, for \$1250.

Sure Cure for Piles.

Itching Piles produce moisture and cause itching, this form, as well as Biting, Bleeding or Protruding Piles are cured by Dr. Bo-sank-o's Pile Remedy. Stops itching and bleeding. Absorbs tumors. 50c a jar at drug-gists, or sent by mail. Treaties free. Write me about your case. Dr. Bo-sank-o, Phila., Pa.

Will Wear Stripes.

Hammond and Stagg, two burglary convicts, were brought up from Multnomah county last evening, to serve two and four years, respectively.

Eugene can have a Carnegie library by spending \$1000 a year in keeping it up. So can any town upon agreeing to spend a tenth of the amount annually for running it.

CONSTRUCT- ING EARTH ROADS

Practical Pointers on Laying Off and Building

J. A. Kennedy of North Da- kota Writes Instructively in the Orange Judd Farmer

(J. A. Kennedy, North Dakota.)

The best road for a farming district is a single macadamized road with a dirt road by the side of it, each track to be eight feet wide. A single macadam road alone is not preferable, owing to the fact that it is too hard on horses' feet in dry, warm weather. I approve of having the dirt road to travel on in fine weather and the stone road in bad weather. Both roads, of course, should be united, so that teams could pass. This double road will be comparatively cheap (where rock can be obtained), and a long-lived one. These roads will some day take the place of all our modern dirt roads. But that is looking a little too far ahead, so I will not go into detail, but will discuss construction of earth roads.

Location of a Road.

The first point is to get the road properly laid out. In hilly regions great care should be taken to maintain as level a grade as possible. In many instances it is no farther around the base of a hill than it is straight over it. All roads in hilly sections should be laid out with this point in view, regardless of section lines.

Where the country is level, we should follow section lines and get our roads perfectly straight, for where a road is once laid out it usually remains. Find the corner stones, or if they cannot be found, get the surveyor to give you the corner. Be sure and get the proper marks to go by. Then measure out the distance from these centers to where you want to run the first furrow, or inside the slope of ditch. Set up your stakes or poles and line others in between. Do not attempt to drive a big grader to any line of poles, for it cannot be done with such a variety of drivers and horses.

Take a good steady team on a breaking plow and get a good driver who has a good eye. Have him run a straight furrow to these poles, and repeat the same on the opposite side of the road. It all depends on the first furrow. Now you have a good straight furrow for the big grader and nothing to delay it. Keep the left front wheel in this furrow and the next time in the furrow you have made the previous time, and so on until the outer limit of ditch is reached, then start over again, keeping in from each side of ditch a certain amount each time to give proper slope to ditch. Keep on in this way until the required depth of ditch and height of grade is reached.

The total width of a highway is 66 feet, but the width of the grade should be governed by its use. The nearer it is to large cities, the wider it should be. Do not dig up the whole right of way because you have the privilege of doing so. Reduce all

SSS THE OLDEST AND BEST BLOOD PURIFIER

THE GREATEST OF ALL TONICS.

A Spring Medicine that adds vigor and strength to the system, purifies and enriches the Blood, and lays the foundation for a strong constitution and good health during the hot sultry summer.

Most everybody feels bad in the spring. Some have no particular ailment but are just tired, worn out and totally unfit for work or anything else that requires energy or effort. They moan around upon the border-land of invalidism, irritable, peevish, hysterical and unreasonable.

A good appetite in the spring is a rarity, and we sicken at the sight of food, or thought of eating, and what little we do eat is a burden to the stomach and a tax upon the digestion.

Warm weather is sure to bring out the hidden poisons, germs and seeds of disease that have been collecting in the blood and system during winter, and you may look for some old chronic trouble to make its appearance. It is a time, too, when boils and carbuncles, and pustular or scaly skin eruptions like eczema and tetter, pay their annual visits and make life miserable by their intense pains and intolerable itching and burning.

The fight for health should begin before any warning symptoms of physical collapse are felt, or before the seeds of disease have time to germinate if we would avoid the usual spring sickness; and with S. S. S., the acknowledged king of blood purifiers and greatest of all tonics, you can put your blood and system in such perfect condition and so strengthen the constitution that one may be as free from sickness and as vigorous and strong during the trying months of spring and depressing summer season as at any other time.

S. S. S. not only builds you up, but searches out and destroys any poisonous germs or impurities that may be lurking in the blood. The benefits derived from the use of S. S. S. are permanent because it acts directly on the blood and purifies and cleanses it of all impure matter, leaving nothing to cause fermentation and deterioration of this life-giving fluid.

In selecting your blood purifier and spring tonic get one that long experience and thorough test have proven the best. In S. S. S. you will find a remedy whose purifying properties are unquestionable, and just such a tonic as your system needs. Ask your druggist for S. S. S.—there is nothing else just as good.

For the past 40 years we have had a standing offer of \$1,000 for proof that S. S. S. contains the least particle of any mineral whatever, and this offer is still open.

SSS NATURE'S REMEDY PURELY VEGETABLE

grades where it is at all possible to do so. A slight grade will tire a team amazingly. In building embankments keep the dirt level as it is hauled on, and it will settle and pack evenly. It is better to keep the center a little lower, if anything, until just before finishing.

Drain the Road Thoroughly.

This is the most important part of road building, and should be thorough. I will subdivide it into three divisions—underdrainage, side ditches and culverts, and surface drainage. The foundation of the road really needs to be in a drier condition than the surrounding fields. Land which is full of water, which will not soak into side ditches, should be drained by tile laid parallel to and under the roadbed, with sufficient fall. The tile drain should be relieved of its contents at intervals by cross culverts which should lead into side ditches.

Side Ditches and Culverts.

These side ditches should have a proper slope toward the center (a slope of a foot and a half to a foot) and a good fall. It is the most important thing for a road-builder to know the value of fall as a factor in handling water. Culverts should be placed across the road, where needed; nothing but the best tile should be used, and they should not be placed too near the surface. They should be covered by at least a foot of earth. It is better to place two 12-inch tile drains in the same trench side by side than one 24-inch drain where it would not have sufficient covering.

The surface of a road will always drain well if properly constructed. The crown of the road should have a gradual slant from the center to the bottom of the ditch.

Lost Game, But Fared Well.

The Albany Democrat, in speaking of the recent bowling match in that city, says:

The Alcos defeated the Hillbees, of Salem, Saturday evening in an interesting contest. The Salem team was exactly the same as the one which defeated Multnomah, so that the victory was a notable one. Albany won the first game, 217 to 214; the second, 248 to 176; the third, 237 to 233, and secured a tie on the last, 209 to 209.

Harry Schreiner lead for Albany, with 162. He opened his second game with six strikes, but ended with only 53, the highest score of the contest.

Lee was next with 159, Austin 156, Trimble 151, Dannals 142 and Cannon 141, remarkably even bowling with no tumbles.

Sutherland lead for Salem with 153, Dr. Cartwright 151, Lachman 149, Hatch, generally at the top, 137, Coshaw 126 and the veteran Hoyt 117, after a hard struggle with centers.

A fine lunch of ham sandwiches, pickles, olives, doughnuts, cake and coffee was served, with a high average for all in the building.

Sealed Bids for Wood.

Bids will be received for 100 cords of body fir wood, for the use of the city of Salem, at the City Hall. To be delivered, 20 cords by May 15th, and the balance by September 1st. Address tenders to N. J. JUDAH, City Recorder, 3-22-10d.

BEST FOR THE BOWELS

YOUNG WIFEHOOD

Boston, Mass., 152 Shawmut Ave., Oct. 25, 1902.

After I had been married about four months I felt my health generally decline. I seemed to lose the light step and dragged wearily along instead. My appetite failed me and I lost health and strength. I was nervous and had shooting pains through my limbs and stomach while bearing down pains and constant headaches added to my misery. The menstrual flow became more and more profuse and I was unfit to attend to my daily duties. My husband called in three different physicians and I took enough medicine to kill or cure a dozen women, but it all had no effect on me whatever, until I took Wine of Cardui. In a few days I felt a change for the better, my general health improved and at the next time of my periods my flow was more natural and I was in less pain. Gradually I recovered my health and strength and am now in perfect health. I take an occasional dose of Wine of Cardui which keeps me well.

I am happy to give you this endorsement. *Beth Ricker*

President, Back Bay Woman's Club.

Why don't you try for the same health Mrs. Ricker has? It is easy to secure if you take Wine of Cardui according to directions. Wine of Cardui strengthens weak and worn-out women of any age and assists the mother and housewife to bear her exacting duties. Wine of Cardui makes women fit for all the duties of womanhood.

It will relieve the pains of irregularity, cures falling of the womb, leucorrhoea, ovarian troubles, and has been known to remove what physicians considered dangerous tumors. Women who use Wine of Cardui do not suffer at the monthly periods. They do not suffer hysterical attacks, because Wine of Cardui gives them strong nerves freed from the irritation of female suffering.

A \$1.00 bottle of Wine of Cardui purchased from your druggist will keep you free from pain.

WINE OF CARDUI

694 cremo

5¢

CIGARS

Sold Every Minute

41,640 every hour, 1,000,000 every day. The largest selling brand of cigars in the world. You owe it to yourself to find out why so many people smoke the Cremo. 5 cents invested in a Cremo will explain it. Sold in every store, in every town, in every State.

The Band is the Smoker's Protection.
