

# WANT SENATE SEAT

## Indiana Aspirants Getting Ready for Fairbanks Place

Indianapolis, Ind., July 15.—There are prospects of a pretty fight in Indiana before a decision is reached as to who shall fill the senatorial seat left vacant by Mr. Fairbanks, in the event of national Republican success at the polls next November. The Hoosier members of the Republican host are not ready to admit the slightest possibility of defeat for the Roosevelt-Fairbanks ticket, and are shaping their plans accordingly. Already in the field and being urged by their friends are four "receptive" candidates, with still another just dawning on the horizon.

Among those mentioned are Governor Durbin, who is term as chief executive of the state, expires in January next; Congressman James A. Hemmenway, chairman of the house committee on appropriations, and the right hand man of Cannon; Congressman Chas. Adair and Congressman Crum, who wants the Southern reputation cut down.

These three were immediately mentioned when it became apparent that the vice-presidential tide had set in the direction of Senator Fairbanks. The party leaders appear confident of giving a good working Republican majority in the next legislature. The new body will meet in January, and will then choose a successor to Mr. Fairbanks.

In the event of a Democratic success in the state, however, it is believed that the choice of that party for the senatorship would lie between John W. Kern, of this city, and Benjamin F. Shively, of South Bend.

## Republican Campaign Opens.

New York, July 15.—The Republican congressional committee opened its headquarters today in the St. James building, Broadway, near Fifth avenue. From now until election day, November the headquarters will be the scene of strenuous activity. From here will be disseminated tons of campaign literature, including copies of the principal speeches delivered in the Chicago convention, to which will be added later Roosevelt's speech of acceptance, to be delivered at the formal notification of the latter part of this month. Another duty of the congressional committee will be the assignment of speakers for the campaign. No plans for this part of the work have been made as yet, but the matter will be taken up at an early date. It will be early fall, however, before the stump-speeching will commence in earnest. The various plans for the congressional end of the campaign

will be formulated by the committee as a whole, and the work of carrying them out will be intrusted to Congressman Babcock, chairman of the committee; Congressman Overstreet, of Indiana, and William J. Browning, chief clerk of the house of representatives; these three being in charge of the headquarters in this city.

## Patent Medicines.

A man that compounds or invents something that is just a little better than the next best thing, is certainly entitled to the best share of the profits to be derived from the sale of the article. So he patents or copyrights to protect his interests. Patented goods are good goods, poor goods are never patented. We have 20 years of trial behind us to give us the assurance that we have the best medicine compounded for the cure of dyspepsia, such headache, biliousness, indigestion and all stomach disorders. We protect the public as well as ourselves by keeping the formula a secret, as long as we make it we know it is made right and it cures these diseases. Druggists tell us that it is the one medicine that the sale is ever on the increase. To get the best remedy for dyspepsia or indigestion ask the druggist for Dr. Gunn's Improved Liver Pills, price 25c per box, only one for a dose. For sale by Dr. S. C. Stone, druggist.

## May Break Auto Records.

New York, July 15.—Among motor car enthusiasts much interest is manifested in the great automobile race meet to be held at the Empire City track tomorrow. Prizes have been offered for every type of automobile now in use. Four regular events are scheduled, in addition to which there will be some special match races. Record trials will be numerous, for the Empire City course is admitted to be the fastest mile track for automobiles in America. It is the same course on which Barney Oldfield made the world's record of 55.45 seconds last year.

## Chicago & Alton Deal.

New York, July 15.—In explanation of the announcement that no Chicago & Alton preferred stock will be received after today, a representative of the Harriman interests gives out the following statement: "There is now on deposit sufficient of this stock to guarantee the success of any plan which the projectors may have in mind. In all probability, however, nothing will be done in this matter until the return of Mr. Harriman from Europe."

## Neil to Fight Attel.

Chicago, July 15.—Frankie Neil, the bantam champion, will defend his title against Abe Attel, of St. Louis, in a six-round tilt at the Waverly Athletic club tonight. Neil is naturally a favorite in what betting is being done on the result, but there are many who are willing to back their opinion that Attel is shifty enough to elude the terrific left-hand blows of the champion, and remain in the ring until the limit of the bout is reached.

# SANTIAM SURVEY COMPLETE

## Estimated Power Will Run Far Beyond Expectations

The engineering party from the university of Oregon concluded a survey of the Santiam river and returned to Eugene, July 1. The party was in charge of Prof. E. H. McAllister, who has prepared the following notes of the trip:

Our survey covered the Santiam river from a half mile above Idanha to Mill City a distance of 23 miles. The purpose of the survey is to gather data concerning the water power of the stream. To this end a careful line of levels was run along the river, and from our notes a profile of the river surface will be drawn showing the fall from point to point. Also a transit traverse was made, showing the windings of the stream and distances along the bank. The flow of the stream, or the amount of water discharged per second, was measured at three different points; the first about a half mile above Detroit, the second below the mouth of Blowout creek, which is also below the mouth of Breitenbush, and the third at Mill City. These measurements consist of soundings taken at intervals across the stream bed, together with measurements of the velocity of the water at numerous points in the cross-section of the stream, the velocities being taken with a standard current meter having an electric attachment to indicate the number of revolutions of the wheel in a given time, noted by a stop watch.

To verify and correct the transit work, an azimuth was taken by astronomical observations in the evening, every three or four miles. From the corrected transit traverse a map of the river will be drawn.

The full report of our investigations cannot be published for some months, but a few general results can be stated now. The total fall of the river from a half mile above Idanha to Mill City is about 900 feet. The discharge of the stream at Detroit was found to be 1228 cubic feet per second; below Blowout creek are the principal tributaries; and at Mill City 2191 cubic feet per second. As the Breitenbush and Blowout creek are the principal tributaries between the first and second measurements, it will be seen that these two streams carried something over 600 cubic feet per second. These measurements, made early in the summer, do not represent quite the extreme low water flow of the stream, but they give what may be called the average summer flow; for the Santiam, like other streams fed by eternal snow peaks, does not markedly decrease in flow during the summer, though there is, of course, a slight diminution.

## Enormous Energy of Stream.

The energy of the stream, that is to say the portion of it covered by our survey, is the equivalent, in round numbers, of 175,000 horsepower, continuously exerted; or, in other words the stream could theoretically perform the work of nearly 800,000 average horses, each working eight hours per day, seven days a week.

Speaking roughly, I should say that upward of 100,000 horsepower could be economically developed in a series of plants varying from 5000 to 10,000 horsepower each. In one or two places possibly a 15,000 horsepower plant could be economically developed.

The natural conditions are very favorable to power development, and I do not know of any stream in this part of the state where plants of moderate capacity could be installed at so low a cost. In the future progress of the middle Willamette valley, the water power of the Santiam, electrically transmitted, is bound to prove an important factor.

Our party is under obligations to the officials of the Corvallis & Eastern railroad for many courtesies extended during the survey.

## Midsummer

Is bringing many good things to the public, and one is the great sale of buggies, surries, runabouts, road wagons, and all pleasure vehicles greatly reduced at Mitchell, Lewis & Staver Company Salem branch. 6-30-04

## Notice.

The lumber companies of this city, after this date, will charge cartage on orders calling for the delivery of less than 1000 feet of material. Salem, July 12th. 7-12-1wk

The Kind You Have Always Bought

# When Your Gold Catches You Just There

There is No Time to Wait.

It is not a "little thing." It's a deadly thing. It will not "get well by itself" if you let it alone. Whiskey and quinine and such things brace you up for the time, but they don't cure you.

Ask any intelligent doctor why you catch cold so easily. He will say, "Because you are a bit run down." He means that the force which nature placed in your body to keep out disease germs—the resistive force—is weakened. The door is open a little way toward disease.

There is not a gravestone in any cemetery in the world caused by consumption or pneumonia or any lung trouble whatever, which did not start with what you call "Nothing but a cold."

A cold should not be beaten back or drugged over—it should be cured, and the general health should be built up.

## ACKER'S ENGLISH REMEDY

should be taken at the first symptoms of cold. It is a tonic for the whole body, a specific for sudden colds, coughs or sore throats. It doesn't matter where the cold is or how it got there, we know that Acker's English Remedy will reach it and cure it. It is sold on a positive guarantee.

**NO CURE NO PAY.** If you have a cold—no matter how slight—it means something. Take Acker's English Remedy at once. Keep it in the house. If it does not relieve you almost instantly, we will refund you the price paid.

"ACKER'S ENGLISH REMEDY saved my life. A cough, slight at first, grew constantly worse and I finally had to give up my work in the Knife Factory at Walden. I had frequent bleeding spells. Was examined by local doctors, prominent physicians in New York and at a Medical College. They all pronounced my case hopeless. I began using ACKER'S ENGLISH REMEDY and a few bottles cured me. I am today a perfectly well man." (Signed) A. H. SIMPSON, Walden, N. Y.

Acker's English Remedy is sold on a positive guarantee that the purchase money will be refunded in case of failure. 25c., 50c., and \$1.00 per bottle.

SOLD AND RECOMMENDED BY DAN'L FRY, DRUGGIST, SALEM, OR EGON.

# ECZEMA

SETS THE SKIN ON FIRE.

No disease causes so much bodily discomfort, or itches, burns and stings like Eczema. It begins often with a slight redness of the skin, followed by pustules or blisters from which a gummy, sticky fluid oozes, which dries and scales off or forms bad looking sores and scabs. It appears on different parts of the body, but oftentimes upon the back, arms, hands, legs and face, and is a veritable torment at times, especially at night or when overheated.

The cause of Eczema is a too acid condition of the blood. The terrifying itching and burning are produced by the overflow through the glands and pores of the skin of the fiery poisons with which the blood-current is overloaded. While external applications, such as washes, soaps, salves and powders are soothing and cooling, they do not enter into the blood itself or touch the real cause of the disease, but S. S. S. does, and purifies, enriches, and strengthens the thin acid blood and cleanses the system, when the skin clears off and Eczema and all its terrifying symptoms disappear. Book on the Skin and its diseases free. No charge for medical advice.
