

NEW YORK NEWS LETTER

New York, Sept. 24.—New York is resuming rapidly its autumnal gaiety and animation after the dulles of the summer. With one or two exceptions all the theatres are now open.

Not only is New York filled with visitors who come on pleasure bent, but buyers are here in unusually large numbers. The outlook for a lively and prosperous season is said to be exceedingly favorable, in spite of the fact that the presidential campaign is about to be opened in earnest. One reason for the more cheerful feeling is the improvement in the stock market. Last year at this time securities were at a much lower level, and with fortunes impaired by the great slump, economy was being practiced even by the well-to-do. This fall there is apparently a great surplus for luxuries, and the heart of the theatrical manager, the jeweler, florist and merchant is being made glad.

A floral garden which will be filled with roses, rare shrubs and foliage is now being laid out on John D. Rockefeller's estate at Pocantico Hills at a cost of \$50,000. The plans of the gardens—there really are three gardens, connected by a terrace and odd stone steps—were drawn by John D. Rockefeller, Jr., for his father, after ideas furnished by the latter, and when they are completed there will be nothing like them on any private estate in the country, with the possible exception of those on George J. Gould's Georgian court.

The gardens are about 300 feet square, and each is sunk below the level of the main drive leading to the stables. Surrounding them are walls made of cobblestones, arranged in artistic shape.

Mrs. John D. Rockefeller, Sr., and her daughter-in-law, who is the daughter of Senator Aldrich, of Rhode Island, have a mania for Jack roses and American Beauties, and Mr. Rockefeller has arranged for the purchase of some of the finest of these in this country as well as in Europe.

All of the Rockefeller servants have been instructed to give out no infor-

mation concerning the new mansion on Kybuit Mountain, and even the lips of the stable help are sealed. It is reported, however, that Mr. Rockefeller will spend \$1,000,000 on the new residence, which will be the most magnificent seat in this country.

A \$3,000,000 amusement park on the Harlem ship canal, greater than the combined attractions at Coney Island, is the latest thing proposed for Gotham. Plans for buildings have been drawn, and the landscape architectural work is under way. An effort will be made to eclipse Earl's Court, in London, the famous amusement resort. It is announced that the new place will open next June.

That the negro is a strong partisan, especially in this presidential campaign, is shown by the determination of practically the entire congregation of the Bridge Street African Methodist Episcopal church to effect the removal of Dr. S. Timothy Tice as presiding elder of the Greater New York district of the A. M. E. church, which includes all the churches of that denomination in Greater New York and on Long Island. This condition of things is due to the fact that recently Dr. Tice wrote a letter to a Brooklyn newspaper, declaring that he would support Judge Parker, and that there was no good reason why negro men should vote for Republican candidates in the ensuing election. Dr. Tice's letter created much of a sensation among the colored people, as he is next in authority to Bishop Arnett.

A genius for figures calculates that the saving of time by the faster rate of travel in the subway will amount to the saving of millions of dollars annually to the people of New York—this on the theory that time is money. He sets forth that there are 10,000 persons who will daily go south and north between, say the Rector and 125th street station of the subway. The time saved between these two points is calculated at twenty minutes daily to those who traverse this distance habitually, or two hours in each week. Thus the aggregate sav-

ing in time will be 3.33 hours a day, or 19.9 hours a week. Allowing for the class who will thus travel the customary two weeks' annual vacation, their fifty weeks of daily travel will be shortened by 999.9 hours, or 41.2 days of 24 hours. As the average business day does not exceed eight hours, this saving would represent 123.7 business days in every year. If the time of these 10,000 habitual travelers be worth 50 cents an hour, each one will have gained by the saving in time devoted to travel 16 cents a day, or in round numbers \$37.24 per year of 286 days. The aggregate money advantage to 10,000 people in the ordinary business year should be \$372,400. If a million people should travel by the subway daily, each passenger making an average gain of five minutes, the aggregate saving, figured out on the same basis, would amount to \$41,500 per day, or \$12,450,000 per year of business days.

OYSTER COCKTAIL FACTORY

Building Up a Business in the Succulent Bivalve

Charles Hellenbrand, the pioneer Salem restaurateur, has built up a large trade in oyster cocktails. He ran a booth during the state fair and sold as high as 100 dozen per day. He supplies nearly all the Salem saloons with the cocktails that cheers but never inebriates. He is also shipping them to Silverton and other places. One Silverton saloon last year sold as many as all the Salem saloons put together. The demand at Salem and other places is growing, and we are glad to see our old friend doing so well.

The Kind Our Mother Used to Take.

IT Was The Best Prescription Then—It is NOW.

N the old days it was sometimes considered fashionable to be delicate, pale and with an inclination to faint at the least provocation. It is different now. America is raising a strong race—a race of vigorous and healthy mothers. When a woman becomes nervous, suffers from backache, sleeplessness, a general tired-out and fagged feeling, with dragging-down pains, she turns to the right remedy. She is positive she can get relief and assistance from Doctor Pierce's Favorite Prescription.

Backed up by over a third of a century of remarkable and uniform cures, a record such as no other remedy for the diseases and weaknesses peculiar to women ever attained, the proprietors of Doctor Pierce's Favorite Prescription now feel fully warranted in offering to pay \$500

in legal money of the United States, for any case of Leucorrhea, Female Weakness, Prolapsus, or Falling of Womb, which they cannot cure. All they ask is a fair and reasonable trial of their means of cure.

There is every reason why women should not trust their delicate constitutions in the hands of unskilled persons. It requires a thorough medical education to appreciate and understand the womanly organism. When a woman has ill and pains that she cannot bear—when life seems dark for any woman, she should confide her troubles to a physician of standing in the community, or one who has a national reputation. Certainly it would not be the part of wisdom to confide in an ignorant person without medical education simply because she was a woman. There is every reason why she should write to some great specialist, one who has made the diseases of women a specialty for a third of a century, like Dr. R. V. Pierce, founder of the Invalids' Hotel and Surgical Institute, of Buffalo, N. Y. All correspondence is held sacredly confidential, and he gives his advice free and without charge.

SINGLE AND MARRIED WOMEN Very often find that it is repugnant to their feelings to consult their family

physician. In such a case they can put perfect confidence in Dr. Pierce, who has made such a success in the treatment of woman's diseases, for he will give you the very best advice possible, and without cost to you. To grow beautiful, healthy and happy should be the desire of every woman. It is then possible to hold a husband and make home happy and bring contentment to it.

Dr. Pierce's Favorite Prescription gives the mother health to give her child. It cures nervousness, nausea and sleeplessness. It makes the body comfortable and the mind content. It gives physical vigor and muscular elasticity so that the baby's advent is practically painless.

"I write you to let you know I received your kind and ever welcome letter and your kind and fatherly advice," writes Mrs. Ida Martin, of Berry, Ky. "I commenced your treatment the next day after receiving your letter, some months ago, and followed your advice as closely as I could. Am glad to say I am in better health than have been for years. Believe I suffered from every disease that any over-worked, run-down woman could. Was not able to do anything, could not get one good night's sleep; had heart disease of the worst type. A disordered liver was one great trouble, and, passing through change of life, it seemed to cause me excruciating pain in breast and shoulders. I had no appetite, could not sleep nor do any housework. I took treatment from three of the best doctors in our town but grew worse every day, so I decided to write to Dr. Pierce for advice. I took the medicines just as you advised and continued until I had taken six bottles of 'Golden Medical Discovery' and 'Favorite Prescription.' I know that your medicines did more for me than all the medical treatment I had ever taken."

Mrs. Geo. W. Wood, of Whitehall, Mich., writes: "I feel that I must let you know how much good your 'Favorite Prescription' has done for me. In June, three months ago, an eight-pound boy was born to us—my first child. I took eight bottles of Dr. Pierce's Favorite Prescription before his birth and got along nicely; was sick only a short time, and when baby was born I felt nearly as strong as I ever did. Was staying at my mother's at the time, and when baby was one week old I rode from there to my home, a distance of about two miles. Got up the fourth day and remained up, and when baby was two weeks old I walked to town and back which is quite a distance from where we live. I also felt so strong that I sat up for a short time the very day he was born. Baby is healthy and growing very fast and I give the credit to your wonderful medicines."

MARRIED WOMEN

should have a medical book handy, for knowledge is power. A standard work is the People's Common Sense Medical Adviser, by R. V. Pierce, M. D. Send 31 one-cent stamps for the cloth-bound book, or 21 cents for the paper-covered volume. Address Dr. R. V. Pierce, Buffalo, N. Y.

Gas Is An Ideal Fuel

You can't imagine a simpler, quicker, cleaner way of starting fires than the simple operation of lighting GAS RANGE.

Strike a Match and Turn a Lever

That's all, and it will do your work quicker, better, cleaner than any wood or coal stove. If you love your wife get her a labor saving, fuel saving, health saving Gas Range. Some men possess great affection for their wives and daughters, but let them work to great disadvantage in the kitchen, when a little expended in a Gas Range would save them twice the cost in comfort the first year.

One Other Point—Remember This.

If you are building or contemplating doing so, no house is modern and up-to-date unless piped for gas and wired for electricity. Five years from now you'll wish you had, if you don't.
