

DAILY CAPITAL JOURNAL

BY HOFER BROS.

OFFICIAL CENSUS SALEM,
MAY, 1904, 13,287.

Republican National Ticket

For President,
THEODORE ROOSEVELT,
of New York.
For Vice-President,
CHAS. W. FAIRBANKS,
of Indiana.
For Presidential Electors:
G. B. Dimick, of Clackamas.
A. C. Hough, of Josephine.
J. N. Hart, of Polk.
Jas. A. Fee, of Malheur.

OYSTERING ON THE PACIFIC COAST.

It is a boast of the people of the Pacific Coast States that, somewhere in their specially favored section of God's green earth, they can raise anything that is produced anywhere else in the world. There may be exceptions but the oyster is not one of them. If the average inhabitant of the East or Middle West were to be approached with the query, do oysters grow in the Pacific Ocean? the answer would probably be, no. Indeed, very few of the Californians, Oregonians, and Washingtonians themselves realize to what an extent the oyster-raising industry is being carried on.

Among the leading points where the oyster is being grown, the bays about San Francisco, Yaquina and Netarts in Oregon, Shoalwater and Olympia in Washington must be noticed.

Probably the earliest oysterling on this coast was done at San Francisco away back before the days of the Forty-niners. In 1851 six men from San Francisco chartered the schooner Robert Bruce and set sail for Shoalwater Bay, Wash., some twenty miles above the mouth of the mighty Columbia. They were convinced from Indian reports and otherwise that oysters were abundant there, and this they found to be true. Coming to anchor on the north shore of the bay, at a point later called Bruceport, they began to lay plans to "tong" a shipload of the bay's best, but the ship's cook fell out with the company and in an evil hour set the schooner afire that he might work his spite upon Captain Ledlow and his crew. Among the men that came on the Bruce, John S. Morgan has been most successful. For years he lived in the old village of Oysterville, across the beautiful bay where he saw his first venture go up in smoke. San Francisco now numbers him among her many millionaires.—From The Pacific Monthly for November.

TAKE A WALK.

Surely these are prime days in which to absorb health to be stored up for winter use. And Ralph Waldo Emerson—in a hitherto unpublished paper—tells in the November Atlantic one of the secrets of health to all who will listen. His rule, however, is so simple that few will care to try it. If the prophet had bid thee do some great thing—"ah yes, you would be eager to try it."

But Emerson's advice is merely to get out on a solitary walk through the woods, and he goes on to say:

"Few men know how to take a walk. The qualifications of a professor are endurance, plain clothes, old shoes, an eye for nature, good humor, vast curiosity, good speech, good silence and nothing too much. If a man tells me that he has an intense love of nature, I know, of course, that he has none. Good observers have the manners of trees and animals, their patient good sense, and if they add words, 'tis only when words are better than silence. But a loud singer, or a story teller, or a vain talker profanes the river and the forest, and is nothing like so good company as a dog."

"When Nero advertised for a new luxury, a walk in the woods should have been offered. 'Tis one of the secrets for dodging old age; for nature makes a like impression on age as on youth. Then I recommend it to people who are growing old against their will. A man in that predicament, if he stands before a mirror, or among young people, is made quite too sensible of the fact; but the forest awakes in him the same feeling it did when he was a boy, and he may draw a moral from the fact that it is the old trees that have all the beauty and grandeur. I admire the taste which makes the avenue to a house, where the house never so small, through a wood; besides the beauty, the smoke is passed through a cooler,

it has a positive effect on manners, as it disposes the mind of the inhabitant and of his guests to the deference due to each. Some English reformers thought the cattle made all this wide space necessary between house and house, and, that, if there were no cows to pasture, less land would suffice. But a cow does not need so much land as the owner's eyes require between him and his neighbor."

POLITICAL PARAGRAPHS.

"Utah is lost," says James K. Jones. It is understood, however, that Mr. Jones is just conceding Utah as lost in the 1900 election, and that his remark has no reference to the present campaign.—Washington Post.

"We have evidence sufficient," said Mr. Bryan in his speech in this city last April, "to convict Judge Parker with absolute unfitness for the nomination." Still, let us not call in question the sincerity of Mr. Bryan's support of Nominee Parker.—Chicago Tribune.

The betting odds are still in favor of the contention that Mr. Bryan will not be able to say enough for Parker to offset what he has said against him.—Kansas City Journal.

This year the Democrats said: Let us change the policy of the government; let us find a man who will not be so rash as to do things. And they were very lucky in hitting upon Judge Parker, who not only wants to undo every thing that the president has done, but who will not even say what he thinks ought to be done.—Kansas City Star.

It is again announced—this time officially—that Judge Parker will not stump the country. But just wait a few weeks and watch the country stump Judge Parker.—Philadelphia North American.

HERE AND THERE

The rampant tropical vegetation of Martinique has fairly buried the ruins of St. Pierre.

Romania has ordered from Krupp 300 quick-firing field guns. They will cost \$5,600,000.

The death rate among miners from lung diseases is much higher than in any other occupation.

The steamship Barkta has reached Liverpool with a cargo of cotton from the new West Africa fields.

A Salvation Army officer in England has substituted a coffin for the traditional soap-box rostrum.

The death rate among miners from lung diseases is heavier than among any other class of workmen.

Automobile fire engines have recently been added to the fire department of Cape Town and Johannesburg, South Africa.

A Chicago millinery firm has taken out an injunction to prevent one of its women hat-makers going to a rival establishment.

The Boston Museum has a love letter which is 3500 years old. It is written on a brick, and addressed to an Egyptian princess.

Dogs are allowed to enter tramway cars in Berlin, but must be held in the master's lap and paid for as if they were human passengers.

The government carries the names of about 10,000 boys between 14 and 19 on its pay roll. Most of them are employed as special delivery messengers.

Major R. W. McClaughry, warden of the United States penitentiary at Leavenworth, Kan., has just celebrated the completion of his 30th year in that office.

The Czar has a brother, an uncle, 4 first cousins, 10 second cousins, 13 third cousins and a great uncle. The first and second cousins are allowed to use the title "imperial highness."

A German physiologist points out that "dry smoking," in which care is taken not to moisten the end of the cigar held in the mouth, is less injurious than the "wet smoking" foolishly indulged in by many men.

The Tacoma smelter, controlled by D. O. Mills and associates, is making \$24,000 a month by saving precious metals that have heretofore been carried away in smoke from its furnaces. The smoke is passed through a cooler,

OREGON ELECTORAL TICKET

The ticket, as it will appear for the Presidential election on Tuesday, November 8th, is as follows:
FOR ELECTORS FOR PRESIDENT AND VICE PRESIDENT OF THE UNITED STATES.

12. G. B. DIMICK, Clackamas.....R	For President:	THEODORE ROOSEVELT.
13. JAMES E. FEE, Umatilla.....R	For Vice President:	CHAS. W. FAIRBANKS.
14. J. N. HART, Polk.....R	For President:	ALTON B. PARKER.
15. A. C. HOUGH, Josephine.....R	For Vice President:	HENRY G. DAVIS.
16. THOS. H. CRAWFORD, Union.D	For President:	SILAS C. SWALLOW.
17. W. B. DILLARD, Columbia....D	For Vice President:	GEORGE W. CARROLL.
18. W. S. HAMILTON, Douglas....D	For President:	EUGENE V. DEBS.
19. J. A. JEFFREY, Marion.....D	For Vice President:	BEN HANFORD.
20. I. H. AMOS, Multnomah.....P	For President:	WATSON
21. LESLIE BUTLER, Wasco.....P	For Vice President:	TIBBLES.
22. W. P. ELMORE, Linn.....P		
23. T. S. M'DANIEL, Multnomah..P		
24. C. W. BARZEE, Wasco.....S		
25. WILLIAM BEARD, Clackamas S		
26. J. C. CHERRINGTON, Mult..S		
27. S. H. HOLT, Jackson.....S		
28. J. L. HILL, Linn.....Peop		
29. L. H. M'MAHAN, Marion..Peop		
30. P. E. PHELPS, Malheur....Peop		
31. G. F. SCHMITLEIN, Jackson Peop		

and then strained through light canvas. The result is a harvest of gold, silver, copper, etc.

The great number of recent railway accidents in Spain is ascribed to the rapacity of the companies, which in their eagerness to declare large dividends neglect improvements and repairs.

The practice of oiling the roads has been introduced in India, at Bombay. It is found that if the oil is allowed to soak in slowly no obnoxious mud is produced and the result is a success.

About thirty thousand horses are said to be slaughtered for their meat in Paris each year. The carcasses of a good horse yields about 369 pounds of meat, which can be eaten by those who do not care what they do.

It is reported from Tokio that the Russian prisoners of war of Jewish and Polish origin now held in Japan have expressed to the officers in charge of them their desire to become naturalized Japanese after the war.

All the five planetary satellites discovered since 1846 have been found by Americans. They include Hyperion, the seventh satellite of Saturn, Diemos and Phoebe, the little moons of Mars, and Phoebe, the ninth moon of Saturn.

Miss Norma Hamilton, aged 19, has entered the service of the Long Branch life saving corps, and will have to patrol the beach in stormy weather as well as the men in the service. She is an expert swimmer and an all-round athlete.

Jenqueel & Hayne, of Hamburg, Germany, have patented a process for manufacturing an artificial building stone from infusorial earth, which they call gubrolit. The stone is very light, is fireproof, withstands the influence of most chemicals, and can be easily sawed, nailed and bored.

During sleep the aut's body is quite still. Occasionally may be noted a regular lifting up and settling down of the fore feet, one leg after another, with almost rhythmic motion. The autenae also have a gentle, quivering, apparently involuntary movement, almost like breathing.

Don't Respect Old Age.

It's shameful when youth fails to show proper respect for old age, but just the contrary in the case of Dr. King's New Life Pills. They cut off maladies no matter how severe and irrespective of old age. Dyspepsia, Jaundice, Fever, Constipation all yield to this perfect Pill. 25c at J. C. Perry's drug store.

Buggy Comforts.

These cold days of approaching winter, persons who drive want the greatest possible amount of comfort on their trips. To supply this need the Mitchell, Lewis & Staver Company, have put in the most elegant line ever brought to Salem of woolen lap robes. Call and look over the immense supply, and you will be satisfied.

Killed by a Train.

Scattered along the railroad track for a distance of several hundred yards the horribly mangled remains of a young man was found north of Myrtle Creek early Tuesday morning by Southern Pacific Section men, while on their way to work. On one portion of the remains were found discharge papers from the United States army, identifying the man as Jacob Cross, of Ohio.

He was a Spanish-American war veteran, 23 years of age, and was evidently beating his way on a train, from which he fell and was so terribly mangled.

The circumstances being fully known and the death being purely accidental, Coroner Twitchell will not hold an inquest.—Roseburg Review.

Learning By Experience

An investment last winter and spring of \$78 in advertising space in two agricultural publications put \$2,400 in a farm boy's pocket. He advertised seed corn. It was the first publicity purchasing he ever did, and naturally he went about it in that diffident, incredulous manner which is of considerable assistance to the "new man" in killing trade. Still he made money and, what is more important when philosophical considerations, learned to appreciate the value of printers' ink.—Agricultural Advertising.

If there are any doubting Thomases among our merchants, they should advertise in this paper. It reaches the buyers in town and the adjacent territory.

Advertising Did It

Does advertising pay? If you doubt it, examine the remarkable record of the Chamberlin-Johnson-DuBoise company of this city. In a unique presentation in the columns of the Constitution that enterprising firm has made a comparative statement of its business in 1896 and 1903.

In the former year it employed forty-eight helpers, its storehouse occupied 34,200 square feet of floor space and its sales amounted to \$225,000. Seven years later it employs 215 helpers, its storehouse occupies 99,000 square feet floor space and its sales were \$884,679.17.

More remarkable still is the record of the firm's March business for this year over that of one year ago, the increase for the month being almost \$30,000, or nearly \$1,000 per day over the same month a year ago.

As everybody knows, this great retail dry goods emporium sets the pace for the south in the use of printers' ink.—Atlanta Constitution.

Successful merchants everywhere are those who advertise. The successful merchants of this town advertise in our columns.

FIX FOR WINTER

That is what all should do, and one of the most important things to be done is to have the pumping in your house in good sanitary condition. Let us put your pipes and connections in order.

BURROUGHS & FRASER
Sheet Iron Workers and Plumbers.

Engagement Announced.

Mr. and Mrs. L. C. Cavanaugh announce the engagement of their daughter, Birdie Leila, to Mr. Ernest Robert Wiggins, the wedding to take place November 17, 1904.

TRMPS CHASE

Large Families
Turner from the
and Will

Turner, Or., Nov. 1. Itzel and Miss Wing, visiting Miss Bear, returned just about dusk Saturday and just before they reached men, with packs on their backs, emerged from a fence, followed the girls, who, it is said, were becoming frightened, they just then came to a showed good judgment. The men stood at the gates and then ran. It they were tramps.

On account of a letter its destination on time, wife were the victims of a week. A party of 13 men in on them at 1 o'clock, near 'bus could hardly them, so they enjoyed walk, after arriving on train. The party consisted of Mr. Wing and son and daughter, and Miss Wiggins, and Miss Wiggins, and the Willamette valley home. Mr. Wing and son, and daughter, and Miss Wiggins, and the Willamette valley home. Mr. Wing and son, and daughter, and Miss Wiggins, and the Willamette valley home.

George Moore has a business college in Salem. Mr. Maugus, of Fruitland, chased the Doe Shanks from Jacob Ashenfelter and departed for Eastern Oregon. Wm. Foster, of Oregon, acted business near Turner. Scott LaFore has married and started a small business.

Rev. Crandall and wife, latter's parents near Mary Sunday. Carl Duncan has disposed stock, rented his farm and Turner.

Frank Roberts, who visited Nate Silvers farm, returned to Montesano, Wash., to his family. His brother, Ernest, has run the farm this year.

Franklin Herrell, of Salem, with his sister, Schmitt, Tuesday night. He is making plans to have a crop put in of the old Vaughn place.

Winter Rates to Yaquina. In order to accommodate people who wish to sail to Yaquina Bay, the Yaquina Company will sell on Saturdays of each week, 31, 1905, round-trip tickets, to Yaquina and back, to 60 days from date of issue, who desire to take advantage should apply to the Oregon Pacific agent for tickets.

That New Woolen Under

Salem Steam Laundry

and be cleaned. We have steam table in Oregon work and guarantee. Those blankets probably have the only facilities for this work outside of mill.

The Salem Steam

Hop Wire

We are headquarters for hop wire fencing. Call for prices. We can save you
