

# THE DAILY CAPITAL JOURNAL

BY HOFER BROS.

OFFICIAL ORNSUS SALEM, MAY, 1904, 13,287.

### SPECIAL SESSION OF CONGRESS.

It is stated there will be a special session of congress, called for October 15, 1905.

The President wanted congress to meet October 1, 1905. He has something up his sleeve, a job for congress that needs doing.

**BUT THAT DATE WAS INCONVENIENT FOR SOME OF THE SENATORS.**

So the President had to get any old date that he could to meet the convenience of the senate.

The last man he had to get consent from was Senator Burrows, of Michigan.

That senator told the President if he called it as early as October 1, 1905, he, Burrows, could not attend.

So congress will be assembled on October 15th.

**THE AMERICAN REPUBLIC IS GROWING.**

It takes more than ordinary sessions of congress to handle the public business nowadays.

The American empire is expanding beyond the conception of many of its politicians.

It must call some of the plutocrats of the senate to be ordered to come together to pass the anti-corporation bills.

**THEY DISLIKE TO GO ON RECORD AT REGULAR SESSIONS.** But they have got to come together and do business. Teddy has said so, and Teddy means business.

### PRESERVE THE FIRS AND OAKS.

The Park Board and street department of this city should take steps to preserve the natural trees in the streets and public places.

There are still many beautiful fir and oak standing in all parts of the city that should be protected and preserved.

Sometimes a mere transient renter will cut down a noble tree for the fuel it makes **WITH NO LEGAL RIGHT TO DO SO.**

Thoughtless owners of property will sometimes slaughter trees that were hundreds of years in growing, or maim by cutting off the tops **TO THE DISFIGUREMENT OF THE WHOLE NEIGHBORHOOD.** This should be prohibited.

There are streets with grand and noble firs standing on them that should be preserved. The park board should take steps to save all such, at least the fir, oaks and alders.

Such trees, standing in public streets and on open public places belong to the public. Yet each year they fall victims to lawless vandalism and ignorance.

One of the most beautiful streets in the seventh ward has many noble firs, and one day it will be a fine residence street. If the park board would serve notice that those trees must not be slaughtered for fire wood they would confer a lasting benefit on the city.

There are enough natural forest trees scattered over the site of this city to forever make it a beautiful place. But we must preserve this beauty by law and by its intelligent enforcement.

**THE TREES ALONG THE WATER COURSES THROUGH THE CITY SHOULD BE PRESERVED.** The city should acquire control over all the beautiful natural shade trees and preserve them for future generations. In no way can we do so much to beautify the city or do it so cheaply.

### DISEASE UNFASHIONABLE.

There is a wonderful change coming over society. The world is increasing in happiness and hopefulness. Epidemics are waning and good sanitary conditions are increasing. It is no longer in good taste to let it be known that you have a chronic ailment, or are a defective in any respect. Good sound physical health is become almost a moral requisite.

**IT MUST BE ADMITTED THAT THIS IS A "HEALTHY" TENDENCY.** It may be the time will come when a man or woman will no more admit that they are a chronic this or that, than they would lie or steal.

The dictates of fashion decreed in the 18th century that ladies should carry smelling bottles, appear to be delicate and at certain proscribed times faint and remain unconscious.

In George Washington's day few persons expected to live to mature age without smallpox. Two generations ago cupping and bleeding were common remedies, and the use of calomel was only limited by salivation.

**THERE IS NO REAL NECESSITY FOR SICKNESS.** It serves no good purpose of reformation or development of the individual. Without sin and violation of divine laws there would be little or no sickness in the world.

While not all sickness is the result of sin, the inevitable harvest of wrong living, wrong doing and wrong thinking is sickness, disease and death.

The Pharisees and doctors of the laws accused Christ of blasphemy because he healed a man of the palsy by saying, **THY SINS BE FORGIVEN THEE.**

His reply was that it was no harder to say, Thy sins be forgiven thee, than to say arise, take up thy bed and walk. But he branded disease as the result of sin.

The thought is extending among all Christian people that disease is unnatural and **HEALTH AND PHYSICAL HARMONY ARE THE NORMAL, NATURAL CONDITION.**

It must finally appear to all intelligent human consciousness that it is no harder to say to ourselves, let us be well, than it is to say, let us be moral, let us be law abiding. Then all will enjoy health.

### Louisville Welcomes President.

Louisville, Ky., April 4.—President Roosevelt's special train arrived here over the Short-line branch of the Louisville & Nashville on schedule time this morning. An immense crowd was at the station to greet the President. Around the station a cordon of soldiers had been stationed, in addition to a force of police. After an informal reception at the station the Presidential party, with the mayor and members of the local reception committee, entered carriages and the parade moved to the Galt house. Third avenue and other thoroughfares through which the procession passed were elaborately decorated and were thronged with cheering crowds. The personal escort of the President consisted of the George B. Easton Camp, United Confederate Veterans. The main audience was at the Galt house, where the President made a thirty minutes' address from a stand erected in front of the main entrance of the hotel. At the conclusion of the address the President was entertained at an informal reception and luncheon. After a short drive over the city the Presidential party again boarded their special train, and shortly after the noon hour the train left for St. Louis.

### Merchants and Their Clerks.

Ladies and gentlemen of all walks of life will be interested in the lecture at the opera house next Tuesday evening. All are invited, and the lecture is free.

### Wireless Telegraphy Conference.

Berlin, April 4.—On the invitation of Emperor William an international conference on wireless telegraphy opened in Berlin today. Twelve nations, including the United States, are represented. The conference is along the same lines as that held here last year and has for its chief purpose the framing of uniform regulations among all nations for the control of wireless telegraphy, both in time of war and in time of peace.

### Boston Collie Show.

Boston, Mass., April 4.—Collie breeders and exhibitors from all sections of the country are represented at the bench show of the Collie Club of America which opened today in Mechanics' building. It is the first exhibition of the kind ever held here, and from all indications will prove as successful as the specialty show held last year by the Boston Terrier club. J. Pierpont Morgan and Thomas W. Lawson are among the prominent exhibitors.

### Interstate Commerce Case.

Washington, D. C., April 4.—The differential case, involving the question of differentials on traffic to the Atlantic ports, came up for oral argument before the Interstate Commerce Commission here today.

### Tannery Burned.

Elkins, W. Va., April 4.—A fire in the plant of the Elkins Tanning Company last night caused a loss of \$200,000.

# Ayer's

**Sarsaparilla.** Your doctor will tell you why he prescribes it for thin blood, weak nerves. He will explain why it gives strength, courage, endurance. Sold for 60 years. J. C. Ayer & Co., Lowell, Mass.

## A Practical Lecture

The Christian Science lecture, which will be held Tuesday night at the Grand opera house will be the seventh on this subject given in this city during the past seven years. It is averred that the purpose of these lectures is not to proselyte nor to convert to Christian Science, but rather to correct misconception, and give general enlightenment of its doctrine.

The lecturer for this occasion, Edward A. Kimball, C. S. D., of Chicago, is rather an exception to the usual order of Christian Science lecturers heretofore visiting Salem, for the reason that he was not formerly of the clerical, legal or medical profession, but rather a successful business man, who became interested in Christian Science through securing health from its application. In his capacity as lecturer, Mr. Kimball presents his subject without attempt at oratorical effect, but with the practical directness of the business man, which has thoroughly appealed, not only to the most intellectual and critical listeners, but to the great rank and file of every-day investigators as well.

The following excerpt from one of Mr. Kimball's addresses is characteristic of his method of presenting his subject:

"Picture to yourself some man or woman who is kind, loving and upright; whose fair life is marked by the milestones of benevolence and good deeds. Notice the effect that such a mental condition has produced on the face of this person with the softened expression and pleasing lines.

"On the other hand, witness the man whose mind is evil; who, for years, has been animated by hatred and other brutal propensities that distort and debase mankind; witness his face, hard, repellent and twisted. Its very offensiveness of outline and shape is itself an evidence of the incarnation of evil. You know that this disfigured and twisted face has been caused by a wicked and sinful mind.

"Now I ask you if such evil thought can twist and distort his face, don't you suppose that it can twist and distort his liver? Suppose that such a man who was suffering in consequence of his evil thoughts should resort to the prevalent theory and practice of medicine for relief. Can you conceive it possible that there would be any scientific procedure in administering liver pills to him, or in changing his diet? Such a patient would not suffer because he ate ice cream or mince pie, but because his very being is wrenched and torn by evil thoughts and motives. He does not need a change of diet, but the transformation of mind, 'for to be carnally minded is death, but to be spiritually minded is life and peace.'

"Knowing this to be true, the practice of the Christian Scientist is directed to the removal or destruction of the cause, and he proceeds with the knowledge that neither fear, sin, superstition nor ignorance are indestructible. He knows that you cannot remove ignorant fear by means of a plaster, nor transform the moral and temperamental status by means of mud-baths. He knows also that these causes are abnormal, unlawful and unreal, and that he can master them because of the divinely ordained and divinely bestowed intelligence of science.

"It would be of little satisfaction to any one of us to be thus told that his sickness was caused by fear or sin, or some other evil mental influence, if there was no remedy; but Christian Science reveals an adequate way whereby

all evil can be lessened and dispelled." Mr. Kimball's lecture is given by the local Christian Scientists, and is complimentary. The lecture will begin promptly at 8 o'clock next Tuesday evening, April 4, 1905.

### Pennsylvania Train Wreck.

Wellsville, Ohio, April 4.—In a collision early this morning between an extra freight engine and the flyer on the Pennsylvania railroad, at Castonia, Engineer Edward Fuller and Fireman H. Emig, of the passenger train, were killed, and several others slightly injured.

### Hear a Business Man Talk.

Salem audiences have heard several public lectures on Christian Science from gentlemen of the different professions, but next Tuesday evening at the Grand opera house there will be a talk on this subject by a business man, Edward A. Kimball, of Chicago. Lecture free. All invited.

PALACE PHARMACY.

### Died at Asylum.

August Rheinstrom, an inmate of the insane asylum, died at that place yesterday morning at 10 o'clock. The deceased was aged 75 years, and was a resident of Portland, having only been in the asylum 34 days. The cause of his death was exhaustion of dementia. The remains were sent to Portland yesterday afternoon for burial.

### PROPOSALS INVITED

Sealed proposals endorsed "Proposals for construction of buildings, etc., at Oregon State Fair Grounds" will be received by the State Board of Agriculture for the construction of buildings, plumbing, sewerage, drainage, painting, etc., to be done at the Oregon State Fair Grounds, in accordance with plans and specifications on file at the office of W. D. Pugh, architect, Salem, Oregon.

Bids will be received at the office of F. W. Durbin, State street, Salem, Oregon, until Saturday, April 15th, at 1:30 p. m., and then publicly opened. Bids must be made out on blank forms, which can be secured at the architect's office.

The board reserves the right to reject any and all bids.

W. H. DOWNING,  
President of Board
