

Summer Terrors

Acne, Tetter Eczema Salt Rheum Psoriasis Nettle Rash

An itching, burning skin disease during the hot, sultry summer weather, is a positive terror and a veritable demon of discomfort. The intolerable itching and stinging are tantalizing almost beyond endurance, and the unsightly eruption and rough, red skin keep one thoroughly uncomfortable and miserable night and day. Eczema, Tetter, and diseases of this type are caused by acid poisons in the blood, which the heat of summer seems to warm into life and renewed activity. These fiery acids keep the blood in a riotous and sour condition, and the skin unhealthy and feverish—they inflame the pores and retard perspiration, when the whole body feels like an over-heated furnace, and the escaping poison burns and blisters like liquid fire.

TORMENTING ECZEMA.

KANSAS CITY, Mo., May, 1898.
In 1896 I experienced at times patches on the inside of my hands that itched and burned, causing much discomfort. As time went by it grew worse. I had read medicine in my early twenties (now 50 years of age) and was convinced that I was afflicted with a type of Eczema. I consulted several physicians and a number of specialists, and used several external applications, one of which was claimed to be a certain specific. I confess, however, I had but little faith in external applications, yet I used them, receiving but slight temporary relief. In February I decided to try S. S. S. and in less than a month I experienced a change for the better, and by May of that year all symptoms had disappeared, and I found myself entirely cured, and have had no return of the disease since.

and blisters like liquid fire. To the skin disease sufferer, summer time brings no joy, but is a season of unrest, sleepless nights and incessant pain, resulting in shattered nerves, physical exhaustion and general derangement of all the vital forces. Scratching is a pleasant recreation to one tormented and almost distracted by an aggravating itching skin eruption. Some find temporary relief in bathing and the application of lotions and salves. A few hours respite is gained by such methods, but nothing applied externally can alter the condition of the blood

THE ITCHING WAS TERRIBLE.

ESCONDIDO, San Diego Co., Cal., Oct. 1900.
DEAR SIRS—My body broke out with a rash or eruption. The itching, especially at night, was simply terrible; it would almost disappear at times, only to return worse than ever. I had tried many preparations without benefit, and hearing of S. S. S. determined to give it a fair trial; a few bottles cured me entirely, removing every blemish and pimple from my body.

BAD FORM OF TETTER.

For three years I had Tetter on my hands, which caused them to swell to twice their natural size. Part of the time the disease was in the form of running sores, very painful, and causing me much discomfort. Four doctors said the Tetter had progressed too far to be cured, and they could do nothing for me. I took only three bottles of S. S. S. and was completely cured. This was fifteen years ago, and I have never since seen any sign of my old trouble.

Mrs. L. E. JACKSON,
837 St. Paul St., Kansas City, Kan.

or check the outflow of the burning fluids through the skin. Only persistent and faithful constitutional treatment can do this. The acid poison in the blood, which is the real cause of the eruption, must be attacked, and when the blood has been cleared of all accumulated impurities and restored to a healthy condition, then, and only then, will a thorough and lasting cure be effected, and for the accomplishment of all this, no remedy equals S. S. S., which contains all requirements for cleansing and building up the acid blood, and invigorating and toning up the system. S. S. S. completely and permanently eradicates every vestige of poison, thus effectually preventing a fresh outbreak of the disease.

Cases that have resisted ordinary treatment for years, yield to the purifying, cooling effects of S. S. S. upon the blood, and when rich, pure blood is again circulating through the system, the itching and stinging cease, the eruption disappears, and the red, rough skin becomes soft and smooth again.

Skin diseases appear in various forms—sometimes in pustules or blisters, sores, rashes, or red, disfiguring bumps and pimples—but all are caused by a bad condition of the blood, and for which S. S. S. is a safe and effectual cure. No bad effects can come from its use, because it contains no Arsenic, Potash or other harmful

drugs, but is guaranteed a strictly vegetable remedy. If you are a sufferer from some summer terror like Eczema, Tetter, Acne, Psoriasis, Salt Rheum, Nettle Rash or kindred disease, write us about it, and medical advice or any special information wanted will be given without charge.

Our Book on Skin Diseases will be sent free to all desiring it.
THE SWIFT SPECIFIC COMPANY, ATLANTA, GA.

CHANCE FOR GENIUS.

Big Prizes Offered by Foreign Nations.

Many no doubt will conclude that there is practically no chance of securing such desirable prizes as the large sums of money—five prizes each worth \$8000—offered by the Noble bequest where it is absolutely needful to have attainments of both learned and brilliant nature, yet a study of the following particular prizes which are being offered today will show that there are other splendid opportunities well within the scope of most people.

Among the many varieties of cactus there is one which is known as the

Our groceries excel. We believe that good health depends upon the proper selection of food, and keep the standard of everything we sell fully up to the mark. If you wish to secure both quality and value try

EXCURSION RATES

During the Lewis and Clark exposition the O. C. & E. Co. will make the following rates: Salem to Portland, one way, 75 cents; round trip, \$1.00. Tickets good for ten days. Boats leaving daily at 1 p. m., except Sunday.
M. F. BALDWIN, Agt.
Dock Pool of Trade Street.

prickly pear; it is a rather attractive looking plant, but its leaves are covered with hair sharp enough to pierce the hands of any one who is so rash as to touch it. The plant came originally from America, but after it was introduced in some manner or other into Queensland it spread so rapidly and to such an extent that in some districts it has practically destroyed all other vegetation. The Queensland government is still offering a reward of £5,000 to any one who can devise a method by which it can be completely eradicated.

The British consul at Palermo not long since sent a dispatch to the foreign office containing information regarding a premium of £2,000 that the municipality of Catania is offering. In order to encourage local industrial enterprise this sum is to be awarded to the individual who establishes some new industry in the town; this trade is to be of such a nature that it will employ not fewer than 100 workmen; a further £1000 will be paid for every additional 50 hands that are afterwards employed. These sums would be payable at the end of the year in five equal installments.

Five hundred pounds is being obtained from the government of Holland. As most people are aware, the Dutch are the most expert diamond cutters in the world, but in this diamond cutting it is necessary to use an alloy which is dangerous to health. Is it possible to find a method of doing without the aid of this alloy?

Again, to turn to a very different source of money making by competition, there is £300 being offered by the well known firm of Biscardi & Co. In order to encourage English opera that firm has offered this prize, to be competed for by English subjects alone, and has guaranteed to produce the successful work at the Royal Opera house, Covent Garden. M. Massenet has already been secured as one of the adjudicators.

One of the biggest prizes on offer at the present time is for no less a sum than £3,500. This is being offered by the Russian imperial ministry of Finance, and the last date for claiming it is July 1 of next year. The subject of the competition, however, is of a technical nature, for what the Rus-

sian minister wants is a good and reliable system of denaturing alcohol.

Mr. Woodbury, a well American philanthropist resident in New York, offers £200 to any married man who can convince a jury of 12 matrons that there is in that city a single specimen of a perfectly happy married man. Mr. Woodbury's contention is that bachelors and spinsters form the happiest section of the community; he

GOLDEN NUGGETS FOR SALLOW PEOPLE

urges nothing against marriage in general, and says that his arguments refer only to the conditions of life in New York. Mr. Kerr, who takes the side of the married man, and Mr. Woodbury himself will act as counsel, while a committee of single men will act as judges.

Women can gain a prize of \$200 which is being offered by the Women's Institute of Science at Naples; it is to be given for the best work on any subject of a scientific research, but it must be based on independent laboratory experiments.

Another interesting subject is "The best, least irksome and least costly method of securing the male able-bodied youth of this country for service in the regular or auxiliary forces as existing and for expanding these forces in time of war." For the three best essays dealing with these topics the Royal United States Institution offers prizes consisting of 100 guineas, 30 guineas and 10 guineas.

A very big prize is that which a millionaire residing in Paris, M. Daniel Osiris, has instituted on similar lines to that laid down by Mr. Nobel. This prize, however, is confined to Frenchmen, except during any year when an exhibition is being held in Paris, when it becomes open to people of any nationality. A sum of money has been set aside that will produce not less than 100,000 francs, and this amount is to be awarded every three years in perpetuity to the discoverer, inventor, or producer of the idea, or object that will do most to benefit humanity.—London Tit Bits.

DEATH ROLL IS VAST.

Great Britain Accused of Taking Inadequate Measures in India.

In 1903 the number of deaths from plague in India was 853,000; in 1904 it was over 1,000,000, being 1,040,000. Of the 1,000,000 deaths, more than 350,000 occurred in one province, and that province was the Punjab, the one from which some of our best Indian soldiers are recruited. Consider the possible significance of a fact like this upon the efficiency of our Indian army. The Punjab is not a large province, its actual population being about 20,000,000, or only two-thirds that of England, and yet the deaths in the Punjab during 1904 from plague amounted to over 250,000 in the course of twelve weeks only.

We believe that these figures, which have been published before, have never been contradicted, though they seem incredible. What would be thought, said or done in England if in the course of twelve weeks over 250,000 persons were swept off by disease? Surely there would be something like a panic. And if this destruction threatened to be an annual one, would not any inactivity on the part of the authorities in whom prevention is vested, be deeply resented?

The English public has, of course, not realized the position, and though we are not playing the alarmist with any special relish for the office, we think that the policy of concealment or the absence of policy that has necessitated concealment—has gone on long enough.

The small number of deaths from plague in Hongkong and the Mauritius is regularly published every week in the daily papers, and presumably the information comes from official sources but the mortality which occurs in India from the same disease, and which by its magnitude is a danger not only to India, but to the world, is never published—it is not considered wholesome reading.

The public is not aware from official information of the official tragedy going on in one part of the empire—in that part which is always termed the brightest jewel in the possession of the crown, for whose welfare we are naturally responsible, and for whose possession and maintenance some of the noblest British blood has been shed.
