Pittsburg, Pa., Feb. 21.—The demand for raw material used in the manufacture of steel is so great that all records in imports of iron ore were eclipsed last month, when nearly 106,000 tons arrived in New York and other eastern ports.

While more than half of the January imports of ore came from Cuban mines, controlled by the Pennsylvania Steel company, the material was largely imported on Pittsburg district account. The call for ore by mills located in the interior is so urgent that considerable imports are being made from Persia, Spain and Greece. The first cargo of iron ore ever brought into the United States from a Persian Gulf port came from Bussorah.

Manganese ore, chrome ore, iron pyrites, miscellaneous iron and steel material and pig iron, as well as iron ore, were imported last month, making the total imports 146,624 tons. From Cuba came 60,840 tons of iron ore. From Spain 33,306 tons of ore were shipped. From Greece 14,760 tons were imported. Of manganese ore 10,400 of the 10,448 tons imported came from Bombay, India. The chrome ore, 2440 tons, came from New Caledonia. From Europe last month came 4175 tons of structural steel and other finished material. Antwerp sending 1425 tons of the structural steel.
