Attorney W. C. Chase, of Coquille City, who was in the city on legal business went to Drain this noon. He is one of the Republican candidates for the legislature from Coos county.

**A Lucky Postmistress.**  
Is Mrs. Alexander of Cary, Me., who has found Dr. King's New Life Pills to be the best remedy she ever tried for keeping the stomach, liver and bowels in perfect order. You'll agree with her if you try these painless purifiers that infuse new life. Guaranteed by J. C. Perry, druggist. Price 25c.

## MEXICO'S NEW GOLD CURRENCY

The introduction of gold currency into Mexico is producing a strange condition of affairs, as is made evident in the following interview with a Guadalajara banker, printed in the Talisco Times.

"The circulation of Mexico's new gold coins will give sharpners an opportunity to make fortunes," said the manager of one of the Guadalajara banks. "I predict that thousands of people in Mexico will be swindled within the next few months. Accustomed to regarding gold as worth at least double the value of Mexican silver, the people will be slow to realize that the new gold coins are worth no more than the value stamped upon them—that the 5 peso piece is worth only five silver pesos, and the 10 peso piece only ten silver pesos. Sharpners will be quick to take advantage of the confusion resulting from the free circulation of the new gold pieces, and undoubtedly will exchange many of them for double their value in silver."

"A few days ago," continued the bank manager, "I made a purchase in one of the largest stores in Guadalajara and sent a new 10 peso piece to the cashier to pay for it. The cashier sent me word that he would be unable to allow me more than 1.95, or 19.50 for the coin. When I explained to him that the 10 peso piece was worth exactly ten silver pesos, and no more, he was dumfounded. Swindling will be carried on in the large cities as well as in the small towns."

**New Change.**  
R. H. Kappahn is now manager of the Willamette Baggage & Transfer Company, in place of Tom Eckhart, who has gone to work for the Capital Improvement Company. Erny will meet all trains and go after baggage and trunks anywhere and everywhere. Leave orders at the Willamette hotel. Phone 207-855. 4-3-45

## SALMON HATCHERIES IN ALASKA

The total number of corporations, firms and individuals packing and salting salmon this season in Alaska was 45, being five more than in 1904. They operated 47 canneries and 22 salteries, as against 55 canneries and 18 salteries the preceding year. The fact of their being more persons engaged in the business and fewer plants than formerly is due to some of the larger concerns, which run several plants, shutting down a part of them and new enterprises being started in the line of salted and dry cured fish.

The aggregate capital stock employed in the business is \$11,371,150, being a decrease in this item of \$2,576,850 from the reported capitalization of last year. This reduction is largely accounted for by the withdrawal from the field of the Pacific Packing Navigation company, which represented a capital of \$3,000,000. The Northwestern Fisheries company, which succeeded to the ownership of the major part of its business, is capitalized at \$1,000,000.

The valuation of plants is placed at \$5,728,978, being \$106,878 less than last

### A VINDICATION FOR DR. PIERCE.

#### Decision by the Supreme Court of the State Against the Ladies' Home Journal.

Buffalo, N. Y., April 5.—A verdict has been rendered in favor of the plaintiff in the libel suit brought against the Ladies' Home Journal (published by the Curtis Publishing Co.) by the World's Dispensary Medical Association, of which Dr. R. V. Pierce is president. The suit was brought by Doctor Pierce against the Curtis Publishing Co. for making false statements about one of his standard family medicines known as Dr. Pierce's Favorite Prescription. In the May number of the Ladies' Home Journal (1904), Mr. Edward Box, the editor, stated that Dr. Pierce's Favorite Prescription contained alcohol and some other harmful ingredients and Dr. Pierce had in the action alleged that the defendant maliciously published this article containing such false and defamatory matter. Dr. Pierce further claimed that no alcohol is or ever was contained in his "Favorite Prescription," that said medicine was a vegetable preparation and contained no deleterious ingredients whatever; that Mr. Box's statement pretending to give some of the ingredients of said medicine, was wholly and absolutely false. During the trial, the vice president of the World's Dispensary Medical Association stated, that the ingredients of Dr. Pierce's Favorite Prescription were extracted from the following roots: Golden Seal, Blue Cohosh, Lady's Slipper, Black Cohosh and Uva-ursi, by means of pure glycerine. He was asked how he knew as a physician and experienced medical man, that the "Favorite Prescription" was a cure for diseases peculiar to women, such as amenorrhoea, dysmenorrhoea, ante-version, retroversion, and he stated that he knew such was the fact because of his professional experience and the many thousands of women whose ills had been cured by this "Prescription." The vice-president being asked to give his authorities, read from the standard works, such as the United States Dispensary, The American Dispensary and many other standard medical books.

The retraction printed by the Curtis Publishing Company two months after the libelous statement appeared and nearly two months after the suit had been begun stated definitely that analyses had been made at their request and that the "Favorite Prescription" did not contain either alcohol, opium or digitalis.

**Origin of the Hairless.**  
(From Wednesday's Last Edition.)  
The tenth night out the crew of the ark was disturbed by the howling of the dogs.

"That means bad luck," said Mrs. Noah. "I'll fix 'em."

Going to the galley, she returned with a kettle of hot water and threw it over the howlers. Noah, in the morning, observed that one of the dogs was completely hairless.

"Upon my word," he remarked, "we will now have a new breed of canines."

Thus originated the famous "hairless" dogs one sees at a bench show.—Chicago News.

**Want to Buy Horses.**  
Everts & Baker will be at the Club Stables Saturday, April 7th, to buy horses. They want them from 1300 to 1700 pounds, and in good flesh. Bring in your horses.

EVERTS & BAKER.

year, which is due to the fact that a number of canneries are idle and are not taken account of.

The season's pack foots up 1,889,015 cans and 18,881 barrels, together with 7,565,009 pounds of dry salted fish. In 1904 the aggregate was 1,953,746 cases and 15,407 barrels. Being reduced to cases, the figures are 2,059,119 for 1905 against 2,012,928 for 1904. While there is actually a loss of 64,731 cases of canned salmon, the total output for the year shows a gain of the equivalent of 46,191 cases, which is explained by the large increase of salted and dry cured fish.

The total value of the products amounts to \$6,563,655, against \$7,735,872 last year. In most instances the approximate market value is furnished by the packers and where not thus obtained is estimated from the best information obtainable. The higher priced grades have ruled at lower rates, while the others have commanded better prices than for many years.

The total number of salmon taken was 26,579,919, as against 28,028,841 in 1904. They were divided as follows: King, 301,760; red, 21,394,945; silver, 541,725; humpbacks, 3,149,579; dog, 1,291,910. There was a gain of 64,000 reds, 27,282 kings, 916,610 dogs, and a loss of 205,838 silvers and 2,834,970 humpbacks.

The total number of hands employed was 10,645; made up of 4306 whites, 2113 natives, 2518 Chinese and 1610 Japanese. The number of operatives last year was 12,867, being 2222 more than in the current year. Considering this fact it is remarkable that the pack should have been about equal last year, and the explanation is found in the unusual length of the run to Bristol bay and the great number of fish. The effect is to reduce materially the cost of the output, as the sum total of wages paid was \$2,321,112, against \$2,890,934, a saving of \$569,822.

The tax payable this year is \$77,448.10. It was \$79,690.54 in 1904, a decrease of \$2242.44. The shipping in use consisted of 118 steamers, 30 launches, 49 sailing vessels, 197 lighters and boats. Fishing gear used was made up of 68 traps, 211 seines and 1154 gill nets.—From Special Agent King, 301,760; red, 21,394,945; silver,

## Improvements in the RACYCLE

Not in any other make of bicycle. These improvements are of great value to the rider in making an easier running and more durable wheel.

**FIRST.—THE MAGAZINE OILED CRANK BEARINGS.**—The Racycle is the only bicycle made in which the bearings in the crank-hanger run constantly in oil, there being sufficient oil put in when the wheel is assembled to last for 10,000 miles.

**SECOND.—THE DUST PROOF CRANK HANGER BEARINGS.**—The Racycle is the only bicycle in America that has a set of ball bearings on each side of the chain pull. This is done by recessing the cranks—thus placing the bearings wider apart than they are in any other bicycle.

**THIRD.—CHAIN PULL BETWEEN THE CRANK HANGER BEARINGS.**—The Racycle is the only bicycle in America that has a support at the point wanted and cutting off the leverage found in other bicycles.

**FOURTH.—CRANK DRIVE OVER THE CRANK HANGER BEARINGS.**—The Racycle is the only bicycle made in America in which the bearings are placed in the center of the cranks, giving a support at the point wanted and cutting off the leverage found in other bicycles.

**FIFTH.—BI-PLANE SPROCKETS.**—This is a feature that the Racycle originated and has always used in the making of sprockets. It insures the rider more durability and less friction in the chain and sprockets, which must result in a more easily running wheel.

**SIXTH.—LARGE SPROCKETS—FRONT AND REAR.**—This is another feature characteristic of the Racycle, as it was the first bicycle to use a larger than a 22-tooth front sprocket. By the use of large sprockets the rider has less friction in his chain, less friction on the sprockets and less pull on the chain in doing the same amount of hard riding. These improvements enable the rider to use a higher gear with the same amount of energy.

Racycles, \$40 and up; Yales, \$35; Cornell, \$30; Princeton, \$25.

Better have your bicycle fixed up for the coming season. We use nothing but the very best material in our repair work, and do the best work.
