

# Home Made

Have your cake, muffins, and tea biscuit home-made. They will be fresher, cleaner, more tasty and wholesome.

Royal Baking Powder helps the house wife to produce at home, quickly and economically, fine and tasty cake, the raised hot-biscuit, puddings, the frosted layer-cake, crisp cookies, crullers, crusts and muffins, with which the ready-made food found at the bake-shop or grocery does not compare.

Royal is the greatest of bake-day helps.

ROYAL BAKING POWDER CO., NEW YORK.

## QUAKE UP RUSSIAN RIVER

### Healdsburg and Other Valley Points Were in the Middle of the Trouble

Mr. and Mrs. J. N. Robertson, of Turner, Ore., have just received a letter from their cousins, Mr. and Mrs. Clem Mothorn, of Healdsburg, Sonoma county, California, in which there is a graphic description of the recent earthquake.

Healdsburg is a little town situated near Santa Rosa, and it was badly hurt. Chimneys went down by the hundreds and all weak structures collapsed. Along Russian River and Dry Creek bottom lands the earth opened in small and large fissures, through which subterranean water spouted. In places the ground was in ridges. Farm houses for miles around Healdsburg were destroyed, although no loss of life was reported in this town. Among some of the fine buildings in Healdsburg that were destroyed were the Odd Fellows' building, Grangers' building, a fine drug store and many fine brick blocks. Every family in town lost from \$25 to \$300, not counting the loss of the business men. A Red Cross society was organized in that town, and unfortunately from Santa Rosa were cared for. Mr. Mothorn, in his letter, says that

although much loss is sustained, both towns will be rebuilt finer and larger than ever. He says the true California spirit is asserting itself everywhere. He also enclosed a copy of the Healdsburg Tribune, which was published after the quake, and, although the office was nearly demolished, the enterprising editor had issued a small two-page sheet with the news of the quake and what the citizens were doing.

Mr. and Mrs. Mothorn went to Santa Rosa the day after the quake, and they say they will never forget the dreadful scenes there. Piles of dead were lying unburied, and everybody was at work who could do anything. The loss was very great there.

Mr. Mothorn's house was not badly hurt, although the chimney was completely destroyed, and the plaster knocked off the walls.

### For Weak, Languid People.

Weak, sickly people often remark, "If I could only get something that would nourish me and give me strength," they do not know why, but the food they eat is of no benefit to them, they gain no flesh and feel no stronger. The fact is the stomach is too weak to perform its work, and the little appetite they once had is soon gone. The blood becomes more thin and watery, bringing on faint sick spells with loss of memory and ambition. There is a remedy for all this that acts in the right way. It is called Dr. Gunn's Blood and Nerve Tonic, and is sold by all druggists for 75c per box, or 3 boxes for \$2. It turns the food you eat into rich, red blood, making flesh and strength, creating an appetite because the system demands sustenance.

### Nervous Troubles.

Are caused by improper circulation. Osteopathy sets the blood bounding to all parts of the body, building up nerve and muscle. All chronic diseases treated by Osteopathy. Dr. B. H. White is well known in Salem as an Osteopathic doctor.

### Postmaster Robbed.

G. W. Reuts, postmaster at Riverton, Ia., nearly lost his life and was robbed of all comfort, according to his letter, which says: "For 20 years I had chronic liver complaint, which led to such a severe case of jaundice that even my finger nails turned yellow; when my doctor prescribed Electric Bitters; which cured me and have kept me well for 11 years." Sure cure for biliousness, neuralgia, weakness and all stomach, liver, kidney and bladder troubles. A wonderful tonic. At J. C. Perry's drug store. 50 cents.

### Political Meetings.

There was a large Democratic meeting at Turner Tuesday evening, where Governor Chamberlain and Huckestein and Crawford for representatives spoke to a house crowded to the doors.

There was a large Socialist meeting at Aumsville Tuesday evening. That town always turns out to political meetings well, and is a very progressive community.

Woman suffrage meetings continue to be held at the churches, and are noted for the absence of the voting class.

### Deaths from Appendicitis.

Decrease in the same ratio that the use of Dr. King's New Life Pills increases. They save you from danger and bring quick and painless release from constipation and the ill growing out of it. Strength and vigor always follow their use. Guaranteed by J. C. Perry, druggist. 25 cents. Try them.

### Track and Field Meet.

Ralph Croaise, of the high school is in receipt of a communication from Bert Pilkington, of the Oregon Agricultural College, asking that Salem send representatives to the inter-scholastic track and field meet, to be held at Corvallis the first week in June, and which is to be open to high school teams only. It is probable that Salem will respond to the invitation, by taking steps to secure the assistance of a coach. There is some good track material at the high school, but it lies dormant. If only by a few men, the Salem high school will do well to be represented at this inter-scholastic track meet. Medals will be offered to the winners of first, second and third places in the various events.

### Baseball Game, Monday.

The high school baseball players will meet the State College on the University diamond Monday afternoon. Portland high school has also arranged a game with the locals for May 18th. The Allen preparatory school of Portland has also asked for a game, but no date has yet been agreed upon.

### Annual Conference.

The annual session of the Oregon conference of the Evangelical Association will be held in the Chemeketa street Evangelical church, beginning Thursday May 10th, at 9 a. m. Bishop William Horn, D. D., of Cleveland, Ohio, will preside. There will be two sessions a day, and a sermon each evening by one of the members of the conference. Rev. R. F. Jameson, of Jefferson, will preach this evening. The Sunday services will be announced later. The bishop's opening address will be delivered Thursday morning.

### Heroin.

Will overcome indigestion and dyspepsia; regulate the bowels and cure liver and kidney complaints.

It is the best blood enricher and invigorator in the world. It is purely vegetable, perfectly harmless, and should you be a sufferer from disease you will use it if you are wise.

R. N. Andrews, editor and manager Cocoa and Rockledge News, Cocoa, Fla., writes: "I have used your Herbine in my family, and find it a most excellent medicine. Its effects upon myself have been a marked benefit. D. J. Fry.

### The May Clarion.

The May number of the Clarion, the high school publication, is one of the best published under the management during the year. In the "Editorial Comments" the chief quiller says some good things in a bright, optimistic vein. "The Soliloquy of a Baseball" is a cleverly written sketch, and there are many good things in the issue. Verily, the Clarion peals forth gloriously.

### Tennyson's "Princess."

Tennyson's "Princess" will be given in a dramatic rendering by the members of the June graduating class of the high school. The different parts have been assigned, and rehearsals will soon be the order of the day.

Don't be fooled and made to believe that rheumatism can be cured with local applications. Hollister's Rocky Mountain Tea is the only positive cure for rheumatism. 35 cents. Tea or Tablets. Dr. Stone's drug store.

### THE EARTHQUAKE

#### It Was Observed in the Waldo Hills.

At 5 o'clock on the morning of April 18th, when Mr. and Mrs. O. L. Martin, of Macleay, went out to milk, they passed by their fish pond, and it was serene as usual. The water was rather low, and none was running out. But on their return to the house, 20 minutes later, they were surprised to see the water in great commotion, with a vibrating motion from south to north, which raised the whole mass toward the north end and caused the pond to overflow with a rushing, roaring sound. No causes occurred to them for this strange sight, and they say they felt no motion of the earth. Mrs. Martin went to a neighbor and described the circumstance, before the news came of the San Francisco disaster.

### A Fish Story.

Fish Warden VanDusen presented his report for the month of April yesterday afternoon to the state fish commission. It showed that the various hatcheries throughout the state were doing a great work in liberating Cutthroat and Steelhead fry, and collecting eggs. The total receipts for the month were \$12,215.80, and the disbursements \$1116. The patrol system, which has been maintained during the spring closed season on the Columbia, has proved effective in keeping the fishermen off the river. These were maintained by voluntary subscriptions. The Washington state officials also maintained a patrol boat, which was of much assistance to the Oregon officials in enforcing the law.

## Here's an "ELASTIC" Idea for Spring House-Cleaning

THE Globe-Wernicke Unit Book-Case Libraries are as easy to take down as they are to build up! You can move them from room to room or from house to house without taking out the books.

What a boon to housekeepers! Not to have to take out every book, dust it and put it back in the same old way on the same old shelf. *Globe-Wernicke Book-Case Units* are dust-proof—every unit has a glass door that is lined, and also an anti-binding equalizer that prevents the door jamming or sticking.

The opportunities for making an attractive home library with these cases are practically unlimited. A set of illustrated suggestions for home libraries mailed free to any enquirer. No other concern manufactures either the variety of styles, sizes and finishes that the Globe-Wernicke Company does.

WE SELL THESE CASES AT FACTORY PRICES

## CIRCUS DAY IS OVER

### The City of Tents Went up in the Morning and Down at Night, and Then Away

Once again the grounds at the depot present their accustomed undisturbed quiet appearance. Early this morning crowds of boys were on the grounds, searching for any coin that might have escaped from the hands of the collectors at the circus gates. Armed with sticks they were delving in the debris, and with eager eyes were searching for the shining coin, only to be fooled by occasional glittering bits of metals that had fallen from the panoply of some of the performers. Some, however, found a few dimes, and their success only less increased animation to the search carried on by their companions. Great as a circus performance is, it is also a great sight to see the large crew of men take down the immense canvas and pack away all the paraphernalia needed for the carrying on of a circus. Many were present after the close of the performance last evening to witness the downfall of the miniature city of tents.

### William Ware.

William Ware, an aged resident of Salem, died at his home on Perry street this morning at 6 o'clock, of old age. He was 83 years old. He has lived in this city for many years. His wife preceded him to the grave 14 years ago, and their only child, a son, died many years ago. For many years Mr. Ware was employed in the late J. A. Rotau's furniture store, but of late years he has retired from active business life. He was a member of the First Methodist church. The funeral will be conducted from the first Methodist church Thursday at 1 o'clock, Rev. W. H. Selleck officiating. The interment will be in the family lot at Lee Mission cemetery.

If the stomach is weak, resort to the Bitters at once. It will strengthen it and thus cure Indigestion, Dyspepsia, Constipation, Flatulency, Poor Appetite, Biliousness, and Cramps.

### MANUFACTURE OF PAPER.

#### Interesting Process Described by a Newspaper Reporter.

There are few articles manufactured that better illustrate the power of machinery than does the manufacture of paper. All the work is done by machinery which runs from early Monday morning through the entire week, day and night, until Saturday evening, and requires but a few workmen to supervise it. The work of a modern plant was recently reviewed by a Telegram representative. He found, among other things, that in making the better class of paper, for maps and lithographs, rags are used. These rags are gathered from all parts of the world by brokers in New York and are then reconsigned to the different paper mills.

They are first put into a thrashing machine, where the sand and dirt are thrashed out, and they pass to the sorting table, where the buttons are pulled off and seams ripped open in order to remove any dirt that may remain. A pair of heavy cutters cut the rags into pieces about one and one-half inches wide and then follows another dust cleaning effort.

They are now ready to go into a great, long, black boiler, eighteen feet long and six feet in diameter. Three tons of rags are put into the boiler at one time, a strong alkali solution is poured over them and the boiler closed up tightly. It is then subjected to a steam pressure of twenty pounds and caused to revolve continuously for twelve hours.

When thoroughly boiled they are taken out to dry for several days, preparatory to a further cleansing. The boiling not only helps to cleanse them, but also softens the rags. When thoroughly dry they are put into circular tubs, known as the washing engines. Here the rags continually circulate around the tub, each circulation bringing them between knives. The tubs are always filled with pure water, which, becoming dirty at each revolution, is thrown off and fresh water taken in. This is necessary in the bleaching process.

When in the washing engines for seven hours, a valve at the bottom is opened and the rags drawn through troughs to large vats in the cellar, which are so perforated as to allow all the liquids to escape. From the vats the rags go into a beating engine to be reduced to a fine pulp. Here the necessary color is produced by means of dyes. Then, passing through another engine, it is further refined by having all small lumps reduced.

The product now has the color and thickness of pale blue skimmed milk and is passed into the paper machine, to come out at the other end as a high class paper, already rolled and glazed. When the small lumps are reduced, the milk-like substance flows in a constant stream through a wire web onto

a screen the width of the paper produced. The wire web comes amount and the thickness of the makes the finished product even.

As the stream of pulp flows through the screen is continually from side to side, distributing to all parts and in so doing. This is the most wonderful paper making—the changing stream of milk-like substance sheet of wet paper, and moving the particles shaker table.

Now the paper is made. All necessary is to get rid of the water the necessary finish upon it, and the necessary sizes and pack it in sheets.

The wet sheet is dried by passing through many rolls. The first presses the water out of the sheet, as it passes on through press, is subjected to roll after roll until finally dried. After being dried is run through several more rolls to obtain smoothness.

The polish of the paper depends upon the number of rolls it passes through. The more rolls passed through the higher the polish, and after the sheet is wound into rolls weighing 400 and 600 pounds. Later this unwound to be cut into sheets of the size demanded by trade. Every sheet is examined that if there is any defect or the sheet is thrown aside, and reworked over.

From the time the machine is running until it stops there is a continual sheet of paper made. A break is a break, and when this happens a great deal of trouble is necessary then to clean the mill, tear all the paper from the mill, and start anew.

Water plays an important part in the making of paper. An ordinary mill uses about 500 gallons of water every minute of the day for four hours. That is the case with the mills are located on the bank stream—Reading (Pa.) Telegram.

Exposure. To cold draughts of air, to cutting winds, sudden changes of temperature, scanty clothing, exposure of the throat and neck, public speaking and singing, coughs and colds.

Ballard's Horehound Syrup is the best cure. Mrs. A. Barr, Houston, writes, Jan. 1, 1900: "One bottle of Ballard's Horehound Syrup cured a very bad cough. It is very good to take." Sold by D. J. Fry.

### THE BANK HABIT.

Possibly you who read this have never kept a bank account. If not, let us suggest that you try the experiment. You will find it helpful in many ways. Aside from the fact that your money will be safe from theft and fire, such a habit tends to thrift, economy, discipline, and a general understanding of business principles, all of which are essential to success. It also affords a convenient method for the payment of bills; and, as the checks are always preserved and returned to you, they serve as receipts for the amounts paid.
