MIDSUMMER TERM OF COURT.

That was a bright stroke of enterprise of the last legislature to provide a term of court at Salem in the middle of July.

Jurors and lawyers sweeter and sweat and lose their dispositions, and clients suffer, over their cases being tried out in the heated term.

The farmers and fruit growers must leave their homes at the busy time of haying and harvest and serve at \$2 per day.

It would seem as though, when there are only about two months in the year that we must perfectly uncomfortable, courts could be held during the ten comfortable months.

For justice go without meals, without baths, and even without cool water to drink IS A HARSHIP NO AMERICAN SHOULD ENDURE.

But charge it all up to the legislature. The judges are humane and would give juries all the comforts possible.

GIVE THE BOYS A CHANCE.

There are those who would not allow boys to ride a bicycle on any path or sidewalk.

There are others who would never allow boys to go swimming in the river, and would arrest EVERY KID WHO GOT INTO A CREEK WITHOUT A FIFTEEN DOLLAR BATHING SUIT ON HIM.

The disposition to be severe with the rising generation, and enforce laws against them on all kinds of pretexts makes more bad boys and criminals than all other processes.

Give the boys a chance to ride their wheels. Punish the scorchers, and the boys who run over some one, but give even the boy a chance to live and get around town.

THE SQUEAMISHNESS THAT FEELS POLLUTED AT THE SIGHT OF A BUNCH OF BOYS IN THE CREEK OR RIVER IN NATURE'S GARMENTS cannot be protected against contamination in a wicked and inconsiderate world.

Give the boys a chance, especially this hot weather. Active young lads cannot be altogether suppressed without driving them to secret vice, that are infinitely worse.

PROTECTING HONEST LABORING MEN.

Salem's Chief of Police has decided that laboring men who come to Salem to look for work shall not be treated as tramps and criminals, so long as they violate no law.

It seems the night police and other policemen, appointed by a faction of the city council, have taken a different view, and have arrested men who arrived in the city, but had no employment.

In view of the great scarcity of labor, and the movement of large numbers of unemployed men from one part of the state to another, THE POLICY OF CHIEF CORNELIUS WOULD SEEM TO BE THE RIGHT ONE.

The city council's part of the Salem police force has adopted a policy of driving out of the city every unemployed man who cannot give an account of himself.

WHY NOT make your idle money earn interest?

If deposited in our Savings Department it will earn three per cent interest, and be available when you need it.

Interest compounded semi-annually, on the first day of January and July.

Savings Department Capital National Bank

Thin Blood

Experience count anything with you? Then what do you think of 60 years' experience with Ayer's Sarsaparilla! Sixty years of curing thin blood, weak nerves, general debility! We wish you would ask your own doctor about this. Ask him to tell you honestly what he thinks it will do for your case.

THIS IS DONE ON THE THEORY THAT HE IS A TRAMP AND A CRIMINAL AND A FIT SUBJECT FOR ARREST ON GENERAL PRINCIPLES.

This policy, if adhered to, will make men commit crimes, and set fire to houses and barns and become desperadoes generally.

This paper does not consider it necessary to advocate running every unemployed laboring man who comes here to hunt work out of town as a tramp and criminal.

Not every man who steals a ride in town on a freight train, or who rides a break-beam is a criminal.

THERE ARE GREATER LAW-BREAKERS COME TO SALEM IN PALACE CARS, and even sons of prominent Salem citizens have traveled on the break-beam.

Printers, mechanics and honest laboring men, with money in their pockets, play tramp, and beat their way on the trains.

It is not right to fine laboring men who drop off here to hunt work, who commit no crime, and show a disposition to get honest employment.

It is a crime to order such men from one community to another like hunted criminals, and then protect the big criminals who rob banks.

An officer who indiscriminately orders "all the tired tourists to move on" is not a good advertisement for a town. There is no law for it, and a community that would enact such a law would hardly be civilized.

It would seem that a political boss, who has been responsible for as much rotten swaying as WAS DONE ON SOUTH COMMERCIAL STREET WOULD BE A FITTER SUBJECT TO RUN OUT OF THE CITY.

The laborer is glad of a chance to get employment. He has as much right to come and go, whether he travels in a la break-beam or on a tie pass, as the man who pays for a seat on the Pullman and rides on a free pass.

The city government is in very small business when its police will visit every train to see that no unemployed man arrive with the intention of looking around, without being arrested or ordered to move on.

A REAL TRUST IN JAIL.

If you want to read about a real, living, conspiring, grasping trust being actually fined and sent to jail for violation of the anti-trust laws, buy a copy of Collier's Weekly for July 14, and read of the woeful fate of the Toledo ice trust.

When the hot weather came on and the people began to suffer from heat and poor drinking water in Toledo, these vampires held a meeting and decided to double the price of ice in that city.

Five men controlled the ice business in Toledo and they all entered the conspiracy to "blow the public in its day of greatest need." The poor would have been prohibited from using ice on account of the exorbitant prices agreed upon by the trust.

But, thank goodness, Toledo had an honest district attorney, several fearless newspapers, and a judge who belonged to no political machine and who began an investigation of the trust's action.

It was found that the trust had entered into an unlawful conspiracy to raise the price of ice without any apparent cause. They said there had been an ice famine on the great lakes. As well say the Sahara desert was suffering from a sand famine.

So the members of the trust were found guilty and sentenced to pay a fine of \$5000 each and serve one year each in the Toledo workhouse.

The trust was appalled. Its members were diamonds, owned red automobiles, wore four or five different suits of clothes during the day to be in fashion, and were altogether quite proper folks.

A year in the Toledo workhouse! Such infamy from a Toledo court which belonged to the "system"!

Way, the workhouse was intended for vagrants, drunks, wife-beaters, common thieves!

Five respectable "gentlemen" go there for a year to revel in the filth and vermin! It astounded Toledo, but the judge had spoken the words and meant what he had said.

So the members of the ice trust are looking through the bars and the poor are enjoying ice at reasonable prices in Toledo—East Oregonians.

The Determining Factor.

Helen—Sometimes I like waiting and sometimes I do not. Ethel—It depends on your mood! Helen—It depends on my partner.—New York Press.

X-RAYS

The Mitchell family is being snuffed out, morally and mentally.

This is a red letter day in Oregon, not a mile of railroad has been built.

Much of the praise given public men by their alleged admirers is much like kissing—only lip service.

It is not every man who comes into town on a break-beam is a hobo. Chief Cornelius is pre-eminently correct.

and a tourist is a hobo with money, and a tourist is a hobo without money. Why not order both to "move on"!

Even the ancient and honorable guild of printers hit the brake-beam sometimes instead of counting ties.

There are some people in Oregon whose souls would have as much room in a grout's bladder as a bull frog in the Pacific ocean.

If a person travels on a government pass, is he any better than a hobo? The horse editor would like to have the difference explained. Both beat the railroad company.

Crefield started, under the name of religion, to cloak his vile practices, a cult founded in sin, conceived in iniquity, and resulting in two deaths, and a job lot of insanity.

Ethel Mitchell, killing her brother, is an illustration of how far, so-called, religion may lead its dupes. Here is a doctrine that overlooks and forgets the divine commandment "Thou shalt not kill."

The Journal prides itself on giving notice that several hundred feet of railroad has been built in the limits of Salem. This is not a great starter for the million miles of location, but it shows Salem is progressive.

"Behold what a blaze a little fire kindleth." If the law had been honestly and justly with Crefield, he would have been in the penitentiary, Mitchell would have been alive, and Esther Mitchell not a murderess and fratricide.

Esther Mitchell, having killed her brother will now probably be sent to the insane asylum. All her actions for the past three years shows she was insane. Now, who is to blame for the murder of Mitchell the authorities or Esther Mitchell.

The horse editor repeats his suggestion of a few days ago about congress appropriating three million dollars for examining the slaughter houses of the country. That is enforce the laws—send the presidents, directors and managers found guilty to the pen, instead of fining them, and the packing houses would be models of cleanliness—and not cost the people a cent.

The dispatches state that Mrs. John Underwood was attacked by a mountain lion. Being knocked down she began to sing. The lion was so charmed that he stood with one paw on her breast, while she sang everything she knew from the doxology to "There'll be a Hot Time in the Old Town Tonight." The lion stood for it until daylight, when the husband appeared on the scene and killed the lion. If he had been compelled, like the lion, to listen to the singing, he would probably have shot the woman.

A Precaution.

A girl baby was brought to a Seattle clergyman, according to the Post-Intelligencer of that city, to be baptized. He asked the name of the infant.

"Dinah M." the father responded.

"But what does the M stand for?" asked the minister.

"Oh, if she turns out nice and sweet and handy about the house, like her mother, I shall call her Dinah May. But if she has a fiery temper and a bombshell disposition, like mine, I shall call her Dinah Might."

Croup

Is a violent inflammation of the mucous membrane of the wind pipe, which sometimes extend to the larynx and bronchial tubes; and is one of the most dangerous diseases of children. It almost always comes on in the night. Give frequent small doses of Ballard's Horehound Syrup and apply Ballard's Snow Linctum externally to the throat. 25c, 50c and \$1. For sale by D. J. Fry.

LAND SHARKS' WORK

Timber Locators Are Turned Down in the John Day and Harney Countries

They will not quit.

Reports say that the timber land shavers are at it again. This time the sharks are confining their activities to the John Day and Harney countries.

Several hundred people have recently come into Oregon from the eastern states and have gone into the great region watered by the John Day and its tributaries and have taken up timber lands. It is likely their work will have been done for naught and furthermore some of them may be indicted for fraud.

However, the timber cruisers, who located the lands and sold their information to the locators are the persons who are in the greatest danger.

The locators say that the cruisers have charged them \$100 to \$200 per location and have then put them on the map at distances from five to ten miles from the spot they are asked to swear they have seen.

It is said that government detectives, who have been on the ground taking notes, claim to have sufficient evidence that many of the locators sold their claims before they went into the timber.

In that locality all locations have been stopped, papers withheld and filings declined.

It is understood that an investigation will be made at once and the whole affair shown up. The cruisers, it is said, placed many locators in the forest reserve and of course these filings were promptly thrown out.

It is possible that some sensational developments are in store.

Hot Weather Fish Story.

Ellensburg Capital.

It will be remembered that last year the Hayes brothers did some boring for artesian water on their farm in Johnson canyon. After they had gone down less than 100 feet they gave up the idea, although they had struck water which came up to the surface. They covered these holes—they bored one of 10 inches and another of 6 inches diameter—for the safety of stock and have done nothing with them since. Lately a remarkable discovery has been made. W. T. Sheldon, who

THE LIVER QUARANTINE

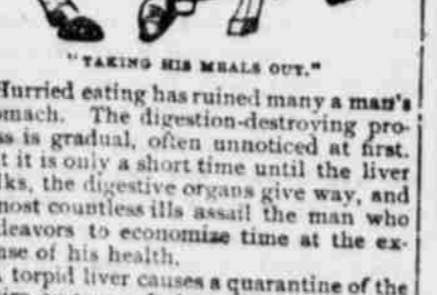

hurried eating has ruined many a man's stomach. The digestion-destroying process is gradual, often unnoticed at first. But it is only a short time until the liver balks, the digestive organs give way, and almost countless ills assail the man who endeavors to economize time at the expense of his health.

A torpid liver causes a quarantine of the entire system. It locks in the diseased germs and body poisons and affords them full play, inviting some serious illness.

In families where August Flower is used, a sluggish liver and constipation are unknown, so are all stomach ailments, as well as indigestion, dyspepsia, heartburn, headaches and kidney and bladder affections. No well-regulated family should be without this standard remedy.

Two sizes, 25c and 75c. All druggists.

The Best Guaranty of Merit Is Open Publicity.

Every bottle of Dr. Pierce's world-famed medicines leaving the great laboratory at Buffalo, N. Y., has printed upon its wrapper all the ingredients entering into its composition. This fact alone places Dr. Pierce's Family Medicines in a class all by themselves. They cannot be classed with patent or secret medicines because they are neither. This is why so many unprejudiced physicians prescribe them and recommend them to their patients. They know what they are composed of, and that the ingredients are those endorsed by the most eminent medical authorities.

The further fact that neither Dr. Pierce's Golden Medical Discovery, the great stomach tonic, invigorator, heart regulator and blood purifier, nor his "Favorite Prescription" for weak, overworked, broken-down, nervous women, contains any alcohol, also entitles them to a place all by themselves.

Many years ago, Dr. Pierce discovered that chemically pure glycerine, of proper strength, is a better solvent and preservative of the medicinal principles residing in our indigenous, or native, medicinal plants than is alcohol; and, furthermore, that it possesses valuable medicinal properties of its own, being demulcent, nutritive, antiseptic, and a most efficient antiferment.

Neither of the above medicines contains alcohol, or any harmful, habit-forming drug, as will be seen from a glance at the formula printed on each bottle wrapper. They are safe to use and potent to cure.

Not only do physicians prescribe the above, non-secret medicines largely, but the most intelligent people employ them—people who would not think of using the ordinary patent or secret medicines. Every ingredient entering into the composition of Dr. Pierce's medicines has the strongest kind of an endorsement from leading medical writers of the several schools of practice. No other medicines put up for like purposes has any such professional endorsement.

Dr. Pierce's Pleasant Pellets cure constipation. Constipation is the cause of many diseases. Cure the cause and you cure the disease. One "Pellet" is a gentle laxative, and two a mild cathartic. Druggists sell them, and nothing is "just as good." Easy to take as candy.

has a farm near by had occasion recently to lift these covers, and he was surprised to see scores of fish rush from the surface into the depths. He called the attention of others to the strange condition and many times have since seen them. No one has gone to the trouble of catching any, but Mr. Sheldon says they look like trout and he believes they are. The question naturally presents itself, where did these fish come from? Mr. Sheldon's theory will doubtless be accepted. He thinks the drill holes connect with an underground lake or river.
