

FOOL WITH A FAD

Servant Comes From the
East to Tell What He
Dont Know

Professor Omori, of the Imperial University at Tokio, after lengthy investigations of the earthquake results in Humboldt County, has returned and now tabulating his notes and arranging his observations for his report to the Japanese government. The lecture that Professor Omori was to have on the subject of the recent earthquake in California will have to be postponed, as he has not yet investigated the entire field and does not at liberty to speak on the subject until he has examined all the area. Professor Omori has been giving all his attention to the results of the earthquake and says that he has located the zone of greatest shock.

"The earthquake was strongest," he said, "in a zone extending from Point St. George to Point Arena. Although there are not many buildings in this zone, effect on the lands and the buildings that were affected, shows this to be the center of the seismic disturbance. To determine this center is one of the most important points in the investigations, as no definite cause can be assigned or deductions drawn, because the center of the shock has been determined. Hence I have been giving all my time to this object, and I think I have succeeded in locating the center of greatest shock. The buildings in this zone were totally demolished by the shock and great fissures were made in the earth. At one place along the coast it was evident that

CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of *Pat H. Fletcher*. Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but Experiments that trifle with and endanger the health of Infants and Children—Experience against Expert.

What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Purgative, Drops and Soothing Syrups. It is Pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. It cures Diarrhea and Wind Colic. It relieves Teething Troubles, cures Constipation and Flatulence. It assimilates the Food, regulates the Stomach and Bowels, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

GENUINE CASTORIA ALWAYS

there had been a great mountain slide and one of the hills near the ocean slid into the water.

Cause of Shocks.

"As to the cause of the earthquake which shook California, it is difficult to speak with any certainty. There is no doubt that it was caused by a slip somewhere in the strata of the earth beneath the zone of disturbance. The movement although great to us, was comparatively slight in proportion to the size of the earth, and is probably a result of the cooling of the crust of the earth. There are generally assigned two major causes for most of the earthquakes. One is the cooling of the earth's crust and the other is the redistribution of matter. By that I mean the sand and other soil that is carried down the mountains by the rivers; the movement of the sand in the ocean, and the soil and rock that is carried along by glaciers. When a portion of the earth's crust is in a state of unstable equilibrium and any amount of this redistribution of matter goes on, the effect is likely to be an overbalance and the strain becomes so great that somewhere down beneath the surface of the earth there is a slip in the strata, and conditions become once more stable. This phenomenon is called an earthquake, although the whole earth does not quake. The general name for this force is 'mountain making force.'

Some Secondary Causes.

"There are secondary causes of earthquakes, which undoubtedly have a great effect, as has been shown by careful observations. Chief among these can be mentioned the weight of the tides. All the earthquakes were carefully tabulated for a number of years in Tokio, and it was found that the greatest number occurred at that time in the lunar day, when the tide was highest. Another cause is the barometric pressure. It was also found that the earthquakes occurred at that time in the day when the pressure of the atmosphere was the greatest. The season of the year has also some

unknown influence over the earthquakes. Of the ordinary earthquakes that do not cause any destruction there are less in the summer and more in the spring, and of the destructive ones there are greater number in the summer. These observations apply to the region about Tokio, and it is well to bear in mind that each region has its own laws, and the observations taken at Tokio would in no way apply to California. The earthquake here was in the spring and comes strongly under the class of destructive earthquakes.

"By the series of observations I have determined the direction of the earthquake in this city. The shock proceeded in a general direction of northeast by east. This can be easily determined by the way the walls fell and the effect on statuary. There were a number of secondary tremors, which moved in many directions, but the course of the great shock was in a northeasterly direction."

Sign of Safety.

In discussing the smaller earthquakes which have been making themselves felt since the big one, Professor Omori said that they were a sign of safety from any more big ones.

"The smaller ones," he said, "are the after-tremors of the big one, and must be expected. As long as we have them the pressure is relieved gradually and there is no longer a danger of a great shock. It is when we do not have such small ones that we had better look out for the big ones. Every earthquake of any size is always followed by the succession of smaller shocks, and in those districts that have not experienced an earthquake for some years and a big one is approaching, it is often preceded by a series of light shocks, by means of which it is often possible to predict the occurrence of the larger one.

"It is safe to say that San Francisco will not be troubled by another earthquake for a number of years possibly not during the life of the present generation. The earth has settled in this location and has slipped into a state of stable equilibrium, and it will take years of action on the part of the mountain-making force to so distribute the matter that another great shock will be necessary to readjust matters. There is no certainty in predicting, and it is possible that there may not be another disturbance in this zone for a much longer period."

Go to Bodega Head.

Professor Omori will leave in a few days for a trip in the vicinity of Bodega Head, and will examine all that portion of the territory carefully. After he has finished he will tabulate his statistics, which will fill a number of note books, and the lecture he will deliver before he departs for Japan will be based mainly upon his observations in California.

Professor Omori expressed his surprise in the way San Francisco has progressed during the time he has been away. Although only absent seventeen days he said he would hardly know the place.

It is with a smile that he recounted the attack made upon him by some of the striking sailors while he was in Eureka. They were evidently under the impression that he was one of the Japanese sailors engaged to help break the strike. Coming up to him in a threatening manner, they asked him a question which he was unable to understand, but, being anxious to please, he answered in the affirmative and received a heavy blow on the side of the face which knocked him to the earth.

"It was not serious," said Omori, meditatively fingering a large swelling on his cheek.

Professor Omori will leave for Japan about August 4th.—San Francisco Chronicle.

Dan Tarpley and Bride

Will Not Go to Sea.

Portland, Aug. 1.—Dan W. Tarpley and his bride did not charter a tug and put out to sea in order to have a second marriage performed, nor is it likely that they will do so, in view of the fact that such marriages are declared by well-known lawyers to be legal.

The young couple are enjoying their honeymoon at the cottage on Glisan street, and have about concluded that Idaho is the nearest point where the union of first cousins is legitimate.

"I am glad we don't have to go to sea," said Mrs. Tarpley, in discussing the matter yesterday, "as we might get drowned, become seasick or some think equally dreadful happen. We won't be in any hurry about it until we find out definitely what to do." Mr. Tarpley was not at home and could not be interviewed, but it is understood that he coincides with his wife's views in the matter of waiting until sure of the way next time.

Bad Stomach Makes Bad Blood.

You can not make sweet butter in a foul, unclean churn. The stomach serves as a churn in which to agitate, work up and digest the food as it is being digested. If it be weak, sluggish and foul the result will be torpid, sluggish liver and bad, impure blood.

The ingredients of Dr. Pierce's Golden Medical Discoveries are just such as best serve to correct and cure all such derangements. It is made up without a drop of alcohol in its composition; chemically pure, triple-refined glycerine being used instead of the commonly employed alcohol. Now this glycerine is of itself a valuable medicine, instead of a deleterious agent like alcohol, especially in the cure of weak stomach, dyspepsia and the various forms of indigestion. Prof. Finley Ellingwood, M. D., of Bennett Medical College, Chicago, says of it:

"In dyspepsia it serves an excellent purpose. It is one of the best manufactured products of the present time in its action and reliability. It is especially if there is ulceration or catarrhal gastritis (catarrhal inflammation of stomach). It is a most efficient preparation. Glycerine will relieve many cases of pyrosis (heartburn) and excessive gastric acidity. It is useful in chronic constipation, especially the flatulent variety, and in certain forms of chronic constipation, stimulating the secretory and excretory functions of the intestinal glands."

When combined, in just the right proportions, with Golden Seal root, Stone root, Black Cherry bark, Queen's root, Blood-root and Mandrake root, or the extracts of these, as in Dr. Pierce's Golden Medical Discovery, there can be no doubt of its great efficacy in the care of all stomach, liver and intestinal disorders and derangements. These several ingredients have the strongest endorsement in all such cases of such complaints, medical leaders as Prof. R. Bartholow, M. D., of Jefferson Medical College, Chicago; Prof. Robert A. Hale, M. D., of Medical Department, University of Pa.; Prof. Laurence Johnson, M. D., Medical Department, University of New York; Prof. Edwin M. Hale, M. D., Hahnemann Medical College, Philadelphia; Prof. John M. Jackson, M. D., and Prof. John King, M. D., Authors of the American Dispensatory, and scores of others among the leading medical men of our land.

Who can doubt the curative virtues of a medicine the ingredients of which have such a professional endorsement? Constipation cured by Doctor Pierce's Pleasant Pellets. One or two a dose.

State News

A development league has been formed at North Powder.

S. Pogstad, of Portland, is building a three-story hotel in North Bend.

Mrs. Geo. W. Parker, one of the pioneer women of Baker county, died at her home in Baker City Saturday.

An Eastern man is trying to purchase land at North Bend, to start a distillery to manufacture denatured alcohol.

The Turner baseball team defeated the Jefferson team on the latter's ground Sunday by a score of 5 to 2. There was a purse of \$100.

The North Bend Powder Company has commenced work on its new electric light plant at Porter, a few miles below North Bend. A 450-horse power engine, furnishing a capacity of 5000 lights, will be installed.

Lee Martin, of Dilley, aged 72 years, met with a serious accident Saturday while riding on a wagon. In some manner his leg was forced against the end of a piling, and broken in three places. Owing to his age, recovery is doubtful.

Stop That Cough.

When a cough, a tickling or an irritation in the throat makes you feel uncomfortable take Ballard's Horehound Syrup. Don't wait until the disease has gone beyond control. Mr. and Mrs. J. A. Anderson, 354 West 5th St., Salt Lake City, Utah, write:

"We think Ballard's Horehound Syrup the best medicine for coughs and colds. We have used it for several years; it always gives immediate relief, is very pleasant and gives perfect satisfaction." 25c, 50c, \$1. For sale by D. J. Fry, Salem, Or.

Believe Outlaw Was Her Husband.

Oregon City, July 31.—Chief of Police Burns has received a letter from C. E. Crider, written for Mrs. Frank Smith, of Chandler, Okla., in which the author expresses the belief that the Oregon desperado, who was killed at New Era, was the husband of the Oklahoma woman. Both Crider and Mrs. Smith claim that the description of the outlaw tallied closely with that of the Smith woman's husband, who has been absent from his home for some time, and was last heard from in Oregon. Crider enclosed a stamp picture of the Oklahoma Smith. The resemblance to the dead outlaw is not considered sufficiently strong to positively identify him as the murderer of Police Officer George Hanlon, Sheriff J. R. Shaver and Captain O. D. Henderson.

Dan Tarpley and Bride

Will Not Go to Sea.

Portland, Aug. 1.—Dan W. Tarpley and his bride did not charter a tug and put out to sea in order to have a second marriage performed, nor is it likely that they will do so, in view of the fact that such marriages are declared by well-known lawyers to be legal.

The young couple are enjoying their honeymoon at the cottage on Glisan street, and have about concluded that Idaho is the nearest point where the union of first cousins is legitimate.

"I am glad we don't have to go to sea," said Mrs. Tarpley, in discussing the matter yesterday, "as we might get drowned, become seasick or some think equally dreadful happen. We won't be in any hurry about it until we find out definitely what to do." Rheumatism.

When pains or irritation exist on any part of the body, the application of Ballard's Snow Liniment gives prompt relief. E. W. Sullivan, Prop. Sullivan House, El Reno, O. T., writes, June 6, 1902: "I take pleasure in recommending Ballard's Snow Liniment to all who are afflicted with rheumatism. It is the only remedy I have found that gives immediate relief." 25c, 50c, and \$1.00. For sale by D. J. Fry, Salem, Or.

CLASSIFIED

FOR SALE.

For Sale.—A good stock ranch, good house, barn and outbuildings, plenty of good well and spring water, good orchard; situated at the north end of Howell Prairie. Address G. L. Binton, Gervais, Route 1. 7-11-1m*

7-23-3m*
PHYSICIAN AND SURGEON.
Frank E. Slater, M. D.—Physician and surgeon. Office over Fry's drug store. Hours 10:30 a. m. to 4 p. m. Office phone Main 1237. Residence, North Capital street, phone 617. Diseases of children a specialty.
