THE COLLECTORSHIP AGAIN.

The Oregonian persists in the error of representing that the editor of the Capital Journal is a flaming, roaring, volcanic aspirant for the office of collector of customs at Portland.

That, too, in spite of the assurance that this up-country editor has never done anything to put himself INTO THE INDICTABLE CLASS and hence is not eligible for a high federal office in Oregon.

Does the Oregonian fear something will happen? WHAT IS IT AFRAID OF ANYHOW? If it don't let up it may attract the attention of President Roosevelt to some one besides the man it has selected for the place.

We suppose we ought to feel flattered to receive so much attention from the Warwick of Oregon politics and it may be that he will give us a clever endorsement to the President.

If he would do that up in nice style we would cheerfully support the editor of the Oregonian for United States senator.

We would even be willing to stipulate there should be NO RAKE-OFF ON THE OPIUM TRANSACTIONS for campaign funds for any other candidate, as there was in Jim Lotan's day.

If the Oregonian would allow some good reliable up-country editor to have that place it would go far to remove the impression that the Oregonian building was being converted into the monopolistic headquarters of a professional office-peddling machine.

We do not mind such a pleasantry as calling us the "bellowing editor" if he will just send a marked copy to the distinguished cow-puncher who has wandered from the Bad Lands of Dakota to the throne of this empire.

To read the Oregonian editorial President Roosevelt would think WE WERE A BAD MAN. But not even the Oregonian will claim that we have ever stolen public lands, looted a bank or defaulted in office.

This writer really desires to enter a protest at being mixed up in such a prominent manner with men like the present Collector Patterson, Senator Booth, of the Booth-Kelly Lumber company, and others.

What will President Roosevelt

Catarrh

Is a constitutional disease originating in impure blood and requiring constitutional treatment acting through its radical and permanent cure. Be sure to take Hood's Sarsaparilla

Nasal and other local forms of catarrh are quickly relieved by Catarrh, which allay inflammation and deodorize discharge.

Hood's Sarsaparilla, all druggists, \$1. Catarrh, mail order only, 50 cts. For testimonials of remarkable cures send for our Book on Catarrh, No. 4. C. I. Hood Co., Lowell, Mass.

What age do you expect to reach—60 or 70 or 80?

If you live that long, there are likely to be some years at the latter end when you will not be able to earn a living for yourself and family.

A man's productive powers are curtailed, and usually cease entirely with old age. This makes him dependent for support upon his friends or the state, unless he has saved while younger.

Begin to save now during the productive years of your life. Open a savings account and deposit regularly a part of your earnings, which will keep you and yours in old age.

Boy's School Suits...

Parents should bring in their boys and fit them out while our stock is complete.

Our long experience in the clothing business has taught us what kind of boys' suits gives the best satisfaction.

G. W. Johnson & Co.

think of us when he sees our name associated with such a group of distinguished and prominent Republicans as

- JOHN M. HALL, T. T. GEER, J. M. SHELLEY, SENATOR BANCROFT, JACK MATTHEWS, J. T. BRIDGES, J. N. WILLIAMSON, GEO. C. BROWNELL, GENERAL ODELL, P. S. MALCOLM, SENATOR MAYS, HENRY MELDRUM, DAN TARPLEY, BINGER HERMANN.

Wonder, after bawling us out in such company, if we can hope to come within a thousand miles of that office, to say nothing of getting within the thirty-second degree?

DEVELOPMENT OF WESTERN OREGON.

All western Oregon is deeply interested in the development of the dairying industry.

It has been stated by the experts brought here from the east by the Harriman system that this is naturally the greatest and best natural dairy region in the world.

The expert of the Iowa agricultural college since his arrival at Des Moines has expressed those views to the Iowa newspapers.

The Harriman industrial bureau has taken up the matter and will devote a pamphlet to the dairying possibilities of western Oregon.

The Capital Journal article recently published has been copied widely and has attracted a great deal of comment.

The following letter from Dr. Jas. Withycombe, of the U. S. experiment station in Oregon, refers to that article as follows:

"Acknowledge with thanks receipt of your splendid article on dairying in the issue of your paper of the 29th.

"As you say conditions are very favorable for dairying in western Oregon. In fact, to give you an idea as to the possibilities of growing forage plants, I may mention our experience at the station farm this summer.

"We harvested one hundred tons of vetch and clover hay from 25 acres, mostly white land. Our alfalfa has yielded 4 crops aggregating twenty-seven tons, sixteen hundred pounds per acre of green feed and there is a good fifth crop, six inches high, at the present time. A piece of thousand headed kale was planted about the first of August and by late fall this will yield at least forty tons of green feed per acre. This forage plant will grow practically all winter and remain good feed several degrees below freezing.

There is also a field of turnips that was sown the first of July and from present indications will yield at least thirty tons per acre this fall. Corn forage for the silo will yield from ten to fifteen tons per acre, thus showing the possibilities of immense productions of forage for dairy cows in this section.

"In conclusion permit me to congratulate you on the splendid work of the league in the promotion of the various industries of the state."

Send the children to the public schools.

If you haven't any of your own take a look around the neighbor-

hood and SEE IF THE CHILDREN ARE ALL IN SCHOOL.

The place for the children is in the public schools, if they are not attending some other school.

This state has a compulsory education law, but it is not enforced, and we should all take an interest in this law.

The future citizen who is uneducated, who cannot read or write, is THE FUTURE DANGER OF THE REPUBLIC.

This city has a splendid public school system. There are many fine private schools.

The state furnishes free textbooks to those unable to buy them.

The Capital Journal believes the community should furnish clothes and food if necessary to keep children in school.

Let all our readers take this to heart: Seeing to it that one child goes to school that would stay out but for your efforts is THE GREATEST MISSIONARY EFFORT in the world.

It beats worrying about the hereafter to do something practical for the Right-Here-Now. Let our readers see to it that children are in school.

Cures Chills and Fever.

G. W. Wirt, Nacogdoches, Texas, says: "His daughter has chills and fever for three years; he could not find anything that would help her till he used Herbine. His wife will not keep house without it, and cannot say too much for it." 50c. Sold by D. J. Fry's drug store.

Judge Webster Took a Header.

Judge Daniel Webster had the misfortune to fall from his bicycle yesterday, when riding home at luncheon time. In making the turn at the intersection of Winter and Mill streets the fore wheel struck an obstruction, and the rider was sent headlong over the handlebars, striking on the sidewalk. The judge suffered several bruises on the nose and lips. Dr. Byrd was summoned, and found it necessary to take several stitches in a gash under the chin.

A Young Mother at 70.

"My mother has suddenly been made young at 70. Twenty years of intense suffering from dyspepsia had entirely disabled her, until 6 months ago, when she began taking Electric Bitters, which have completely cured her and restored the strength and activity she had in the prime of life," writes Mrs. W. L. Gilpatrick, of Danforth, Mo. Greatest restorative medicine on the globe. Sets stomach, liver, and kidneys right, purifies the blood, and cures malaria, biliousness and weakness. Wonderful nerve tonic. Price 50c. Guaranteed by J. C. Perry's drug store.

Boundary Line Suit.

The supreme court has set the case of J. E. Murphy against Charles Lembke, John W. Culver and the City of Salem, involving the boundary line of the city, for hearing October 17th.

Cures Winter Cough.

J. E. Gover, 191 N. Main St., Ottawa, Kan., writes: "Every fall it has been my wife's trouble to catch a severe cold, and therefore to cough all winter long. Last fall I got her a bottle of Horehound Syrup. She used it and has been able to sleep soundly all night long. Whenever the cough troubles her, two or three doses stops the cough, and she is able to be up and well." 25c, 50c and \$1.00. Sold by D. J. Fry's drug store.

SALEM BUSINESS COLLEGES

Flourishing Institution's That Like By Merit

Each year brings Salem more and more to the front as an educational center. Not only are the local schools largely attended but the students come from various points of the state and in many cases from other states. This is an encouraging sign and the principals of the business colleges more especially are much pleased at the results of their advertising.

At both the Capital Normal and the Capital Business college the attendance is larger than it has ever been at the same time in former years.

New students are enrolling daily and in some instances many inquiries have come from neighboring states concerning the scope and nature of the work.

It is difficult to get at the enrollment of a business school as the studies can be taken up at any time and the student body is constantly changing.

The Capital Business college under the principalship of W. I. Staley has opened under favorable auspices. There are three instructors and the work is done under the most approved modern business methods. The work for the fall term is in full swing and new students are coming in each day. "Our enrollment for this year," said Professor Staley, will be much larger than a year ago. In fact all the schools of the city will have more than an average attendance. This is a good year; there has been plenty of work and all circumstances have worked for the benefit of the schools."

Principal J. J. Kraps, of the Capital Normal and Business institute, is equally pleased with the prospects for the coming year. He has associated with him Professor J. W. L. Smith, a teacher of broad experience. The school has branched out and has added what is known as the business institute, and it issues a monthly publication of interest to those in educational work.

"Our attendance is largest during the months of December and January," said Principal Kraps, "and our summer school this year was especially well attended. We will have from 150 to 200 students here."

A Badly Burned Girl, or boy, man or woman, is quickly out of pain if Bucklin's Arnica Salve is applied promptly. G. J. Welch, of Tekonsha, Mich., says: "I use it in my family for cuts, sores and all skin injuries, and find it perfect." Quickest pile cure known. Best healing salve made. 25c at J. C. Perry's drugstore.

Varsity Reception. The joint reception of the Christian associations of the Willamette University was held at Lausanne Hall last evening, and was a delightful affair. The rooms were artistically decorated with ferns and flowers, and an abundance of autumn foliage. The reception was given for the purpose of making every one acquainted with each other. Mr. Charles McKnight made the address of welcome on behalf of the old students in welcoming the new. Miss Vera Byars and Dr. R. A. Heritage each rendered several vocal selections, which were much enjoyed. Refreshments were served in the dining room, at which a number of co-eds assisted in serving.

Sure Cure for Piles. Itching Piles produce moisture and cause itching, this form, as well as Blind, Bleeding or Protruding Piles are cured by Dr. Bo-san-ko's Pile Remedy. Stops itching and bleeding. Absorbs tumors. 50c a jar, at druggists, or sent by mail. Treatise free. Write me about your case. Dr. Bosanko, Phila. Pa.

Comes Well Recommended. J. Frank Fouche, if the press and critics are to be believed, will delight his audience next Monday evening in Tioga hall. Much interest has been shown in local circles and a large audience is promised.

SEPTIC SEWER ACCEPTED

Lincoln School Improvement Inspected By the Board

Members of the Salem board of education went out to Lincoln school Friday evening and inspected the new septic sewage system that has just been put in by M. J. Petzel, the Salem plumbing contractor. They found it a first-class job, and, excepting a few minor finishing touches, all completed according to contract. The work will be accepted and paid for at the meeting of the board this evening. Messrs. Lee, Eppley and Smith went over the work in detail, from the basement of the school house to the end of the tile drain, and examined every detail, while Dr. Byrd and E. M. Croisan could not be present. They will report at the meeting of the board this evening. These gentlemen deserve the thanks of the school district for devotion to the business interests of the taxpayers. The board complimented Janitor Nye for the work he has done in clearing up the grounds and removing the rubbish and old outhouses, grading up the lot and general care of the premises.

High School Matters. The student body of the Salem high school met for a business session yesterday, and elected the following officers to represent the associated student body for the ensuing year.

President, Charles Harrison. Vice-president, Miss Rebecca Miles. Secretary and treasurer, Miss Edith Ragan.

Sargent-at-arms, Glen Niles. Members of the executive committee from the student body, Ralph Moores, Miss Mildred Perkins. From the faculty, Prof. E. T. Marlette, Miss Sophia Townsend.

President Charles Harrison is a member and chairman of the executive committee. The executive committee has charge of all matters pertaining to the high school student body, pays all bills, makes all contracts, and regulates the general business of the school.

The membership fee to the Associated Student Body was placed at \$1.50 per year. The competent corps of officers and the various committees have taken up their duties with zeal, and, under their efficient management, the high school is assured a prosperous year.

"Chip, the Waif." Next week, at the Klinger Grand theatre, a new system will be inaugurated. The Brigham-Cooper Company will present two different plays each week, instead of one, as before. Beginning next Monday the sensational comedy-drama, "Chip, the Waif," will be presented on Monday, Tuesday and Wednesday nights. On Thursday night the company will present "A Woman's Devotion." This play will be presented Thursday, Friday, Saturday and Sunday nights. This change will undoubtedly be popular with the Klinger Grand patrons. "Chip, the Waif," which will be presented for the first time next Monday, is a most interesting play of the kind that pleases. Every member of the stock company is to be seen to advantage, and there will be several new mechanical effects connected with the production, one being the explosion of a dynamite buoy placed in the river with the intention of wrecking the steamer. The scene is said to be very realistic, as the buoy explodes and the steamer is seen to pass by in perfect safety. Tonight and tomorrow night for the last times, "The Hand of a Friend."

Blood Poisoning. Results from chronic constipation, which is quickly cured by Dr. King's New Life Pills. They remove all poisonous germs from the system and infuse new life and vigor; cure sour stomach, nausea, headache, dizziness and colic, without griping or discomfort. 25c. Guaranteed by J. C. Perry's drugstore.

A Live Wire

Every nerve is a live wire connecting some part of the body with the brain. They are so numerous that if you penetrate the skin with the point of a needle you will touch a nerve and receive a shock—pain is called. Aches and pains come from a pressure, strain or injury to a nerve; the more prominent the nerve the greater the pain. When the pain comes from a large nerve it is called Neuralgia

whether it be the facial nerve or the heart, stomach, sciatic or other prominent nerve branch. To stop pain, therefore, you must relieve the strain or pressure upon the nerve. Dr. Miles' Anti-Pain Pills do this.

"I suffered intense pain, caused by neuralgia. I doctored and used various medicines without getting relief until I began taking Dr. Miles' Anti-Pain Pills. They did me more good than all the medicines I ever used. They never fail to cure my headaches, and their use never leaves any bad after-effects."

MRS. W. M. BECKMAN, 307 W. 4th St., Erie, Pa. Dr. Miles' Anti-Pain Pills are sold by your druggist, who will guarantee that the first package will benefit. If it fails, he will return your money. 25 doses, 25 cents. Never sold in bulk. Miles Medical Co., Elkhart, Ind.

Japanese Purchase of Crude Oil

A contract has been signed between three of the leading oil companies of California, viz, Union Oil company, Los Angeles; Associated Oil company, of San Francisco, and Graciosa Oil company, of California, and the Toyo Kisen Kaisha (Oriental Steamship company) of Japan for the delivery of 500,000 barrels of crude oil per annum for ten years. It is understood that this oil is to be used as fuel for various Japanese steamers. It is further intimated that still greater oil transactions have been inaugurated by Henry Crocker, of California, in connection with prominent Japanese and with the Graciosa Oil company. As a result it is expected that three large refineries will be erected in Japan, one at Yokohama, one at Kobe, and another at Moji. The new tariff gives a 20 per cent duty on crude oil as a duty on refined oil of about 10 per cent. This difference in duty between the crude and refined together with the market advantage for the by-products, makes a very comfortable working margin for the refineries located in Japan; the very large transaction in California oil will necessitate the operation of a line of tank steamers between California and Japan; and it is understood that contracts have been arranged for the construction in Japan, and the operation under the Japanese flag, of five large tank steamers for carrying this crude to the Japanese refineries. This means a remarkable advantage to the California oil fields; but it signifies a great deal more for the Japanese merchant marine and the industrial expansion of Japan. If the Japanese government supports this new industrial development with the same national spirit that gives to all other important enterprises, it will result in the government practically sustaining and assisting in the development of a great Japanese oil industry. The steamers for carrying this oil will be constructed under a Japanese subsidy; the industry will be further protected by a tariff, and no doubt further aid will be given in transportation of the products into the markets of China, if it shall become necessary.—Consul Miller of Yokohama.
