#### The Standard Trial Farce.

Findlay, O., Oct. 12.—The state is today trying to show the connection between the Standard on its subsidiary companies. The Ohio and Manhattan Oil Companies, the Buckeye pipe line and Solar Refining Company are involved, the records of each being presented in an effort to show that one man controls all.

The court records, showing the transfers of land to the Standard, were read in court this morning, as part of the evidence of the existence of a trust.

Deputy Oil Inspector Shafer, of this city said the Standard has a distributing station on property bought of F. L. McManus. The state is trying to show by Shafer's testimony that the relations of the Solar Refining Company with the Standard were too close to permit competition, although the two are ostensibly competitors.

The state scored heavily against the Standard today, and established relations between the soap oil purchasing agency and the Standard. It showed there was no competition in Findlay between the Standard and Solar refiners. J. C. Seeps, local purchasing agent, whose office is with the Buckeye Pipe Line, testified he received information of credit balances on the private lines of the Buckeye Co. The state is contending this admission proves the original trust agreement is still in force. Adjourned until Monday morning.
