

DOCTOR'S ALL AGREE THIS TIME.

The most eminent writers on *Materia Medica*, whose works are consulted as authorities and guides in prescribing by physicians of all the different schools of practice, extol, in the most positive terms, the curative virtues of each and every ingredient entering into Dr. Pierce's Golden Medical Discovery. In fact it is the only medicine, put up for sale through druggists for the cure of all diseases of the mucous surfaces, as nasal catarrh, throat, laryngeal, and bronchial affections attended by lingering, or hang-on-coughs that has any such professional endorsement—worth more than any amount of lay or non-professional testimonials.

Do not expect too much from the use of Dr. Pierce's Golden Medical Discovery. It will not cure miracles. It will not cure consumption in its advanced stages. No medicine will. Nor is the "Discovery" so good for a sudden attack of acute cough, but for the lingering, obstinate, hang-on-coughs, accompanying catarrh, throat, laryngeal and bronchial affections, it is a most efficacious remedy. In cases accompanied with wasting of flesh, night-sweats, weak stomach and poor digestion with facility assimilation, and which, if neglected or badly treated are apt to lead to consumption, the "Discovery" has proved wonderfully successful in effecting cures.

Besides curing all the above distressing ailments, the "Golden Medical Discovery" is a specific for all diseases of the mucous membranes, as catarrh, bronchitis, pharyngitis, laryngitis, etc. It is also a most valuable remedy in all cases of indigestion, biliousness, and weak stomach. Even in its ulcerative stages it will yield to this sovereign remedy if its use be persevered in. In Chronic Catarrh of the Nasal passages, it is well, while taking the "Golden Medical Discovery" for the necessary constitutional treatment, to cleanse the passages freely two or three times a day with Dr. Sage's Catarrh Remedy. This thorough course of treatment generally cures the worst cases.

If you have bitter or bad taste in the morning, poor or variable appetite, coated tongue, foul breath, constipated or irregular bowels, feel weak, run down, despondent, frequent headaches, pain or distress in "small of back," gnawing or distressed feeling in stomach, perhaps nausea, bitter or sour "belings" in throat, and kindred symptoms of weak stomach and torpid liver, no medicine will relieve you more promptly or cure you more permanently than Doctor Pierce's Golden Medical Discovery. It is not only a part of the above symptoms will be present at one time and yet point to torpid liver or biliousness and weak stomach. Avoid all hot bread and biscuits, griddle-cakes and other indigestible food. Take the "Golden Medical Discovery" liberally and stick to its use until you are vigorous and strong.

Foul, impure blood can be made pure by the use of Dr. Pierce's Golden Medical Discovery, which purifies the blood, thereby curing, pimples, blotches, eruptions and other cutaneous affections, as eczema, tetter, or salt-rhine, hives and other manifestations of impure blood.

In the cure of scrofulous swellings, enlarged glands, open eating ulcers, or old sores, the "Golden Medical Discovery" has performed the most marvellous cures. In cases of old sores, or open eating ulcers, it is well to apply to the open sores Dr. Pierce's All-Healing Salve, which possesses wonderful healing potency when used as an application to the sores in conjunction with the use of "Golden Medical Discovery" as a blood-cleansing constitutional treatment. If your druggist don't happen to have the All-Healing Salve in stock, you can easily procure it by enclosing fifty-four cents in postage stamps to Dr. R. V. Pierce, 663 Main St., Buffalo, N. Y., and it will come to you by return post. Most druggists keep it as well as the "Golden Medical Discovery."

Not only does the wrapper of every bottle of Dr. Pierce's Golden Medical Discovery, the famous medicine for weak stomach, torpid liver or biliousness and all catarrhal diseases wherever located, have printed upon it in plain English, a full and complete list of all the ingredients composing it, but a small book has

GALENA COMES ASHORE.

Is Now Fully Half a Mile From Deep Water.

Astoria, Or., Nov. 16.—The British ship Galena, wrecked on Clatsop Beach, stood the storm of last night remarkably well, and is now about two ships lengths further up the beach than when she first struck. Captain Howell and a few of the members of the crew went down to the scene this morning, and will place safely her yards and everything heavy aloft. While this work is in progress they will live in one of the hunting lodges near the West Station, which is within a short distance of the wreck. The vessel was not insured, so her owners alone will have to look out for her safety.

A quarter of a mile from where she lays is deep water, and if she is kedged off that far it will be possible for a tug to get a hawser to her. An attempt of this kind would not be made before next June, when all conditions are usually favorable. One thing in favor of getting her off is the fact that there are no currents shown, by there being no drift logs on the beach.

Eastern Racehorses for the West.

Brooklyn, Nov. 16.—The racing season in the east practically closed at Aqueduct, L. I., today and tonight thousands of men and horses will be headed for Benning track, near Washington, the one stopping place in the flight to the winter Californias. Nearly all racing stables in the New England states will be represented in the western race tracks during the coming winter. The exodus will commence immediately from here and it is calculated that never before in the history of racing in this country will the east be better represented in the west than during the forth coming season.

Discussing Manual Training. New York, Nov. 16.—In the Cooper union here tonight there was an important and largely attended meeting of men well known in the educational field called together to discuss the question of extending the field of industrial education in this country. Amongst the speakers were Frank A. Vanderlip, president of Columbia, Alfred Mosely, of London, Treasurer P. Fish and Miss Jane Adams, of Chicago. It was decided to form a national organization to emphasize the importance of the industrial development of the United States and to publish the results of manual training which has done so much for countries abroad.

Building a Huge Locomotive. Erie, Pa., Nov. 16.—The American Locomotive company have announced the commencement of the construction of a locomotive for the Erie railroad which will be the largest and most powerful of its kind ever built. The monster will weigh 250 tons and will combine all of the best of the old mechanical features in locomotive construction with the very latest and most approved devices to ensure the highest grade of strength and speed.

Scarcity of Game in New York State. Salamanca, Nov. 16.—Owing to the rapidly declining number of deer in the Adirondacks and Catskills, and the fear the shortened game season in this state may be violated by hunters. Forrest, Fish and Game Commissioner James S. Whipple has appointed fifty addition gamekeepers to see that the law is lived up to. The season which closed yesterday was the poorest one in the history of the state.

With tricky dealers it is different. Something else that pays them a little greater profit will be urged upon you as "just as good" or even better. You can hardly afford to accept a substitute of unknown composition and without any particular record of cures in place of Dr. Pierce's medicines which are of known composition and have a record of forty years of cures behind them. You know what you want and it is the dealer's business to supply that want. Insist upon it.

Grading has been suspended for the past week on the Oregon electric line, that is being constructed by the Willamette Construction Company from Salem to Portland. About 40 teams were at work between Chemawa and French Prairie up to Monday, but the earth became too soft and they had to stop work. When the teams stopped the shovelers' gang soon caught up, and they, too, have been laid off. There is a bridge crew of about ten men under Foreman Royal working their way across Lake Labish, and another gang of about 30 men today finished clearing across the Evans farm, the other side of Chemawa. They will move today to the Whitney place, west of Aurora, where the next body of timber is to be cleared away for the graders. A force of 100 men are at work on the bridge at Wilsonville. There will be no cessation of work on the line this winter, and the construction engineers hope to have the cars running through to Portland by the middle of next summer. There will be a heavy traffic ready for the hoed as fast as it is completed.

Scarcity of Furs. New York, Nov. 16.—From present indications this fall and winter will be exceptionally good for the fur trade notwithstanding the fact that in all sections there is a considerable increase in price. Owing to the comparative failure of the seal fishery this year sealskin has risen nearly 40 per cent in price while mink, ermine, fox sable and marten are also commanding higher prices this year owing among other reasons—to the light season of the Hudson Bay company. The supply of otter and chinchilla is extremely small and high prices will be demanded as European markets have drawn heavily on the supply.

Horseless carriages—Wireless telegraphy—Now lardless cookery

Improvement is the order of the age. There was a time when Lard was considered the only shortening. To-day, the only people who use lard for shortening and frying purposes are those who are not familiar with the virtues of *Cottolene*. It pays to be abreast of the times. *Cottolene* is not only superior to lard from a health standpoint, being a vegetable rather than an animal product, but it will make more palatable food than lard; and it is more economical than lard because, being richer, one-third less is required than of lard or cooking butter.

essentially a product of nature and contains only that which is digestible, healthful, and a real means of sustaining life.

If your grocer is an up-to-date, progressive man, he will have *Cottolene* in stock. More than that, if he has ever used it in his own family, he will recommend it in preference to lard or cooking butter. If he does not do this, it is only because he is unfamiliar with the virtues of *Cottolene*. Prove our claims to your own satisfaction by giving the product a fair test.

Give *Cottolene* a good, fair test, use it according to directions, and note the benefit to your digestion. You'll never go back to Lard.

Lard cooked food is not digestible because lard is a hog-fat product. *Cottolene* makes food more digestible and healthful because it is es-

COTTOLENE was granted a GRAND PRIZE (highest possible award) over all other cooking fats at the recent Louisiana Purchase Exposition, and food cooked with COTTOLENE another GRAND PRIZE.

"Home Helps" a book of 300 choice recipes, edited by Mrs. Rorer, is yours for a 2 cent stamp, if you address The N. K. Fairbank Company, Chicago.

A NEW FEATURE—The patent air-tight top on this pail is for the purpose of keeping COTTOLENE clean, fresh and wholesome; it also prevents it from absorbing all disagreeable odors of the grocery, such as fish, oil, etc.

Nature's Gift from the Sunny South

CAPITAL Business College

SALEM, OREGON
W. I. STALEY, Principal

A live business training school, having the confidence and endorsement of business men. It sends its graduates to every part of the state, and is unable to supply the calls for students who have completed the work of both courses, Business and Shorthand.

Young Men of Energy Are Wanted

Who will remain with us long enough to become competent in stenography, bookkeeping and kindred branches. All such may be assured of good places. During the last five months we have been unable to supply one-third of the calls for this class of help, and the rapid development of the Northwest will make an ever-increasing demand for help.

New Classes Will Be Organized

Next week to accommodate students coming in at this time, and it is hoped that as many as possible of those who expect to begin a course soon will arrange to enter next week. Twenty-five students enrolled with us last week, and twenty this week. If you want to increase your opportunities, BEGIN NOW.

We Are Always Glad to Talk

With young people interested in our work, and hope that any such will not hesitate to call. Our catalogue may be had for the asking.

A Night School Is Held

On three nights of each week to accommodate any who want shorthand, typewriting and spelling and are unable to attend day sessions.

A Business Education

Is worth to anyone more than it costs in time and money, and if one wishes to get into business it is absolutely essential. INVESTIGATE NOW.

That Cow

If you keep a family cow nothing is too good for her, and we make a specialty of catering for this class of trade. Besides all the staple feeds, we carry

New Process Oil Meal

Sidney Shorts—Very Extra

Fresh Carrots

Cow Kure

and many other specialties to induce health and plenty of milk.

Owing to the comparative failure of the seal fishery this year sealskin has risen nearly 40 per cent in price while mink, ermine, fox sable and marten are also commanding higher prices this year owing among other reasons—to the light season of the Hudson Bay company. The supply of otter and chinchilla is extremely small and high prices will be demanded as European markets have drawn heavily on the supply.

Danderine

GREW THIS HAIR And we can PROVE IT

MISS DOROTHY CLARK, 2190 Greenway St., Chicago.

Put the scalp clean and normal condition, and the hair will take care of itself every time. The scalp is the soil in which the hair grows. It, also, governs the growth of the hair, and it must be kept fresh and healthy to insure a good crop of hair. The hair is a product of the scalp, and all the treatments in Christendom will do no good, unless they are specifically efficacious in the cure of the disease peculiar to the scalp. NOW at all druggists, three sizes, 25c., 50c., and \$1.00 per bottle. NEWLTON DANDERINE CO., Chicago.

Blew Roof Off—The high wind yesterday blew the roof off the large barn of David E. Swank, near Aumsville.

Provide Your Own Protection

Cut down your insurance rates by installing immediately a complete fire alarm system in your house, thus insuring you against possible loss by

FIRE

Protect yourself, family and property by adopting the automatic fire alarms, burglar alarms, sprinkling systems and fire extinguishers in your household.
