No More Cold Rooms

If you only knew how much comfort can be derived from a PERFECTION Oil Heater—how simple and economical its operation, you would not be without it another day.

You can quickly make warm and cozy any cold room or hallway—no matter in what part of the house. You can heat water, and do many other things with the

PERFECTION Oil Heater

(Equipped with Smokeless Device)

Turn the wick as high or low as you can—there's no danger. Carry heater from room to room. All parts easily cleaned. Gives intense heat without smoke or smell because equipped with smokeless device.

Made in two finishes—nickel and japan. Brass oil fount beautifully embossed. Holds 4 quarts of oil and burns 9 hours. Every heater warranted. If you cannot get heater or information from your dealer, write to nearest agency for descriptive circular.

THE Rayo Lamp cannot be equalled for its bright and steady light, simple construction and absolute safety. Equipped with latest improved burner. Made of brass throughout and nickel plated. An ornament to any room whether library, dining-room, parlor or bedroom. Every lamp warranted. Write to nearest agency if not at your dealer's.

STANDARD OIL COMPANY

Great Exodus of Chinamen from San Francisco.

San Francisco, Nov. 21.—Upwards of 1500 Chinamen left here on the Empress line for Chinese ports. The cause of such a large number of Chinamen going home to celebrate the new year is that times in this country have been prosperous with them. Chinamen are arriving from all over the states and the Orient company has all steerage accomodations booked up to the end of this month.

Unfortunately there is no rosy future without thorns.

HOT RATIONS

That's what you want these chilly days, and at our place you get nothing cold, and always the best the market affords.

White House Restaurant

The Fashion Stables

Formerly Simpson's Stables.

Up-to-date livery and cab line. Funeral turnouts a specialty. Tally-ho for picnics and excursions. Phone 44. CHAS. W. YANNKE, Prop. 247 and 249 High Street.

Victor Point.

The weather is the principal topic of conversation, and flat boats and gum boots are greatly in demand.

The Revs. McElry have shaken the mud off their shoes against us and departed, leaving us to our fate, after a two weeks' vain endeavor to induce some poor soul to turn from the error of his, her or its ways. They are, however, excellent people and have made many friends during their sojourn with us.

Ella Savage has gone to Salem to remain until the holidays.

F. M. Miller has the paper hangers this week.

Mrs. Dorn is visiting friends in Portland.

Be sure to attend the Thanksgiving ball and supper to be given by Waldo Circle, No. 561, on the 29th. Good music and good order, as well as a good supper will be the order of the evening.

J. J. Krenze gave a dance on the evening of the 17th, which was a very pleasant affair, and was largely attended by the young people of the neighborhood.

Don't forget the Victor Point band concert on the evening of the 23d.

The stork has made his annual visit to the home of G. W. Slagel, and left a fine daughter.

The heavy windstorm of last week did considerable damage in this neighborhood, by blowing down fences, uprooting apple trees, etc. It also blew the large engine house of Krenze Bros. off its foundation. Several telephone poles were blown down also and the wires broken, stopping all communication with Salem for several days.

W. H. Rogers made a visit to Portland last week, accompanied by Alice Dorn. He will soon have his goods in and be prepared to furnish his patrons with the "needful" at lowest prices.

TALKS ABOUT EARTHQUAKES

Famous Astronomer Tells What He Thinks He Knows.

Professor T. J. J. See, the famous astronomer of the naval observatory at Mare island, recently delivered an address on "The Cause of Earthquakes" before a general university audience in the chapel under the auspices of the Sigma Xi science honor society at Stanford.

Earthquakes are due, he said, to the development of steam pressure just under the earth's crust, chiefly by the penetration of sea water from the leakage of the ocean beds. The earth has a temperature of about 2000 degrees at a depth of twenty miles, and when the steam pressure ten or fifteen miles deep has become great enough it shakes the crust and obtains relief at the margins of the sea by the pushing up of mountains. All mountain chains are formed in this way, and that is why they are always parallel to the sea shore.

As the outcome of his studies of all the principal earthquakes in the world, Professor See said he had reached the conclusion that there is no danger of another serious earthquake at San Francisco for a long time, say at least fifty or seventy-five years. It will take that length of time for the steam pressure to again accumulate under the bed of the sea. for the leakage is through solid rock over ten miles thick, and thus extremely slow. But Dr. See holds that earthquakes may always be expected along a coast near a deep sea because the great pressure arising from the depth of the ocean forces water down into the earth. Thus the sea near the west coast of South America is nearly five miles deep, and the result is terrible earthquakes and sea waves in that region. The eastern coast of America and northern Europe have shallow water and are comparatively free from danger of earthquakes, but not wholly so. California is much less afflicted than many countries, and if the people knew the cause of these disturbances and adequate precaution is taken to have good buildings on hard ground earthquakes are but little to be feared.

The only countries wholly free from earthquakes are the great inland deserts, like Saharah, where no one can live on account of the drought. The thing, therefore, to do is not to flee from earthquakes, but be prepared for them. It is said that the object in establishing the new seismological society in San Francisco is to educate the public, so that in future practically all danger may be avoided.

X-RAYS

Rev. Dr. Wilson, of Portland, preaches the gospel, but advocates the breaking of the commandment "Thou shalt not kill."

* * *

This doctrine of obeying unwritten laws is liable to lead humanity back into the savagery from which it came, and from which it is not yet entirely segregated.

The ordinance regulating saloons was Monday night referred to the committee on fire and water. Is civilization going back to the Indian idea of strong drink—"firewater."

* * *

Professor See, the astronomer, quit star gazing recently to relieve his mind of an overload of knowledge about earthquakes. The professor says the quakes are caused by steam, and that after a quake it will take a long time for more steam to form. The learned professor does not dwell on the fact that as the steam does not escape, it must still be at the old stand ready for business.

How's This?

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure. F. J. Cheney & Co. Toledo, O.

We, the undersigned, have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligations made by his firm.

WALDIND, KINNAN & MARVIN,
Wholesale Druggists, Toledo, O.

Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Testimonials sent free. Price 75c per bottle. Sold by all druggists.

Take Hall's Family Pills for constipation.

Fears Kaiser Will Win Uncle Sam.

London, Nov. 21.—The Westminster Gazette today urges the government to select a man of supreme ability for ambassador at Washington. The paper declares that Great Britain's former influence and prestige at Washington have been usurped by the German embassy, adding that Mr. Roosevelt is in more close and more confidential communication with Emperor William than with any other ruler or statesman.

Electrically Produced Steel.

At the Lindenberg electric works high grade steel is produced from the most ordinary scrap iron rubbish of the cheapest kind and quality, and its condition is quite immaterial, as by the process all damaging substances, such as sulphur and phosphorus are practically eliminated being reduced to one one-hundredth of 1 per cent. The cost of this scrap iron varies from 45 marks ($10.71) to 60 marks ($14.28) for 1000 kilos (2200 pounds), and the loss of material in slag and refuse varies between 6 and 8 per cent.

This rubbish is first melted in a tilting furnace or oven, constructed similarly to those ordinarily used in our American smelting works. After being thoroughly reduced to a fluid state it is poured and conveyed in a retort by a traveling crane to the Heroult patent electric oven, which has a capacity of from one and a half to two tons. In this oven the necessary quantities of carbon, manganese, chrome, silicum, nickle, tungstate, arsenical iron, etc., are added to produce any kind or quality of steel desired. The whole process of production takes from two to two and a half hours.

The developing bath is heated by an electric current of 100-volt tension, which is brought into connection with the oven by means of a coal electrode and carried back to the current by a second coal electrode, both of these electrodes being suspended perpendicularly through the top of the oven, and adjustable so as to nearly but not quite, come in contact with the melted mass. The current leaps from the electrode in a wide, mighty voltaic arc, and passes through the mass to the second electrode, thus producing the requisite degree of heat sufficient for the purifying and finishing process.

The casting molds for the electric steel are the same as are used in any other factory. The cost of production depends upon many points which will become clearer after further experience with the new process. Raw material, fuel, electric current, wages, etc., depends largely upon the locality, etc., and the improvements in the process that may be made make it difficult to quote reliable figures; but it is safe to say that an average quality of steel, as heretofore produced by the crucible process can be made by the electric process for from 90.66 marks ($23) to 100 marks ($24) per ton.

The electric steel produced at the Lindenberg works surpasses greatly that of any crucible steel ever made both in quality and chemical purity. By this process the steel is freed and kept clear of all gas and bubbles, which has never been possible by the old methods. This advantage of the electric steel over the steel manufactured by the old system is because of its superior purity, and permits the introduction of from 20 to 30 per cent more carbon than in the crucible steel. It can be forged easier, is not easily affected, like the crucible steel, by the damaging influence of overheating; it is stronger and more firm, and offers a much greater resistance wear and tear. The new system also gives added independence on account of the very ordinary material used for producing the steel. Such advantages have never been reached by any other system and it has only recently been given to the public. This is accounted for by the fact that the inventor has kept the success a secret until he was enabled to demonstrate to the public a complete, successful working plant.—Consul Eager of Barmen.

A minister of the gospel is in the embarrassing position of being expected to say a good deal more than any ordinary man can say without being either a plagiarist or a fool.

A Natural Laxative

Inward cleansing is as necessary as outward bathing. To keep the bowels free and regular is of even greater importance than to keep the skin-pores from becoming clogged. The neglect of either invites disease. Everyone needs a natural laxative occasionally, to free the bowels of accumulated impurities. For this purpose take

BEECHAM'S PILLS

the greatest boon ever offered to those who suffer from the ills that follow constipation. For over fifty years Beecham's Pills have been famous as a Stomach corrective, a Liver regulator and Bowel laxative. They never gripe nor cause pain. Powerful purgatives are dangerous. Avoid them. Use Beecham's Pills. They give relief without doing violence to any organ. Their action is in harmony with physical laws. Take them regularly and the necessity for their use becomes less frequent. They are a natural laxative and a positive cure for Constipation, Biliousness, Indigestion, Sick Headache and Dyspepsia.

Sold Everywhere in Boxes. 10c and 25c.

Backache, "The Blues"

Both Symptoms of Organic Derangement in Women—Thousands of Sufferers Find Relief.

How often do we hear women say: "It seems as though my back would break," or "Don't speak to me, I am all out of sorts"? These significant remarks prove that the system requires attention.

Backache and "the blues" are direct symptoms of an inward trouble which will sooner or later declare itself. It may be caused by diseased kidneys or some derangement of the organs. Nature requires assistance and at once, and Lydia E. Pinkham's Vegetable Compound instantly asserts its curative powers in all those peculiar ailments of women. It has been the standby of intelligent American women for twenty years, and the best judges agree that it is the most universally successful remedy for woman's ills known to medicine.

Read the convincing testimonials of Mrs. Holmes and Mrs. Cotrely.

Mrs. J. C. Holmes, of Larimore, North Dakota, writes:

Dear Mrs. Pinkham:—

"I have suffered everything with backache and female trouble—I let the trouble run on until my system was in such a condition that I was unable to be about, and then it was I commenced to use Lydia Pinkham's Vegetable Compound. If I had only known how much suffering I would have saved I should have taken it months sooner—for a few weeks' treatment made me well and strong. My backaches and headaches are all gone and I suffer no pain at my monthly periods, whereas before I took Lydia E. Pinkham's Vegetable Compound I suffered intense pain."

Mrs. Emma Cotrely, 109 East 12th Street, New York City, writes:

Dear Mrs. Pinkham:—

"I feel it my duty to tell all suffering women of the relief I have found in Lydia E. Pinkham's Vegetable Compound. When I commenced taking the Compound I suffered everything with backaches, headaches, and female troubles. I am completely cured and enjoy the best of health, and I owe it all to you."

When women are troubled with irregular, suppressed or painful periods, weakness, displacements or ulceration, that bearing-down feeling, inflammation of the female organs, backache, bloating (or flatulence), general debility, indigestion and nervous prostration, or are beset with such symptoms as dizziness, faintness, lassitude, excitability, irritability, nervousness, sleeplessness, melancholy, "all gone" and "want-to-be-left-alone" feelings, blues and hopelessness, they should remember there is one tried and true remedy, Lydia E. Pinkham's Vegetable Compound at once removes such troubles.

No other medicine has such a record of cures of female troubles. No other medicine in the world has received this widespread and unqualified endorsement. Refuse to buy any substitute.

FREE ADVICE TO WOMEN.

Remember, every woman is cordially invited to write to Mrs. Pinkham if there is anything about her symptoms she does not understand. Mrs. Pinkham is the daughter-in-law of Lydia E. Pinkham, her assistant before her decease, and for twenty-five years since her advice has been freely and cheerfully given to every ailing woman who asks for it. Her advice and medicine have restored to health innumerable women. Address, Lynn, Mass.

Ask Mrs. Pinkham's Advice—A Woman Best Understands a Woman's Ills

His Case Exactly.

"I did think," said Peckham, "that after I was married I might have my own way once in a while."

"Oh!" replied Meekly, "you poor misguided man!"

"Not me. I'm a Mrs.-guided man."—Philadelphia Press.

Hawaii Demands European Labor.

San Francisco, Nov. 21.—Frank P. Sargent, commissioner general of immigration, sailed from here today for Hawaii to supervise the landing there over a thousand Portugues, Spanish and French immigrants who have been induced to settle in Hawaii. There is a strong feeling against Japanese and Chinese labor and the Hawaiians appealed to President Roosevelt who took the matter up and decided to induce settlers who would remain on the island. Arrangements have also been perfected to take Italians to the number of 1000 to Honolulu in addition to the number to arrive on the 30th
