

USE ELECTRIC POWER

Station B of the Portland General Electric Company, at Oregon City, Oregon.

With Electric Power
your expense stops
when work ceases

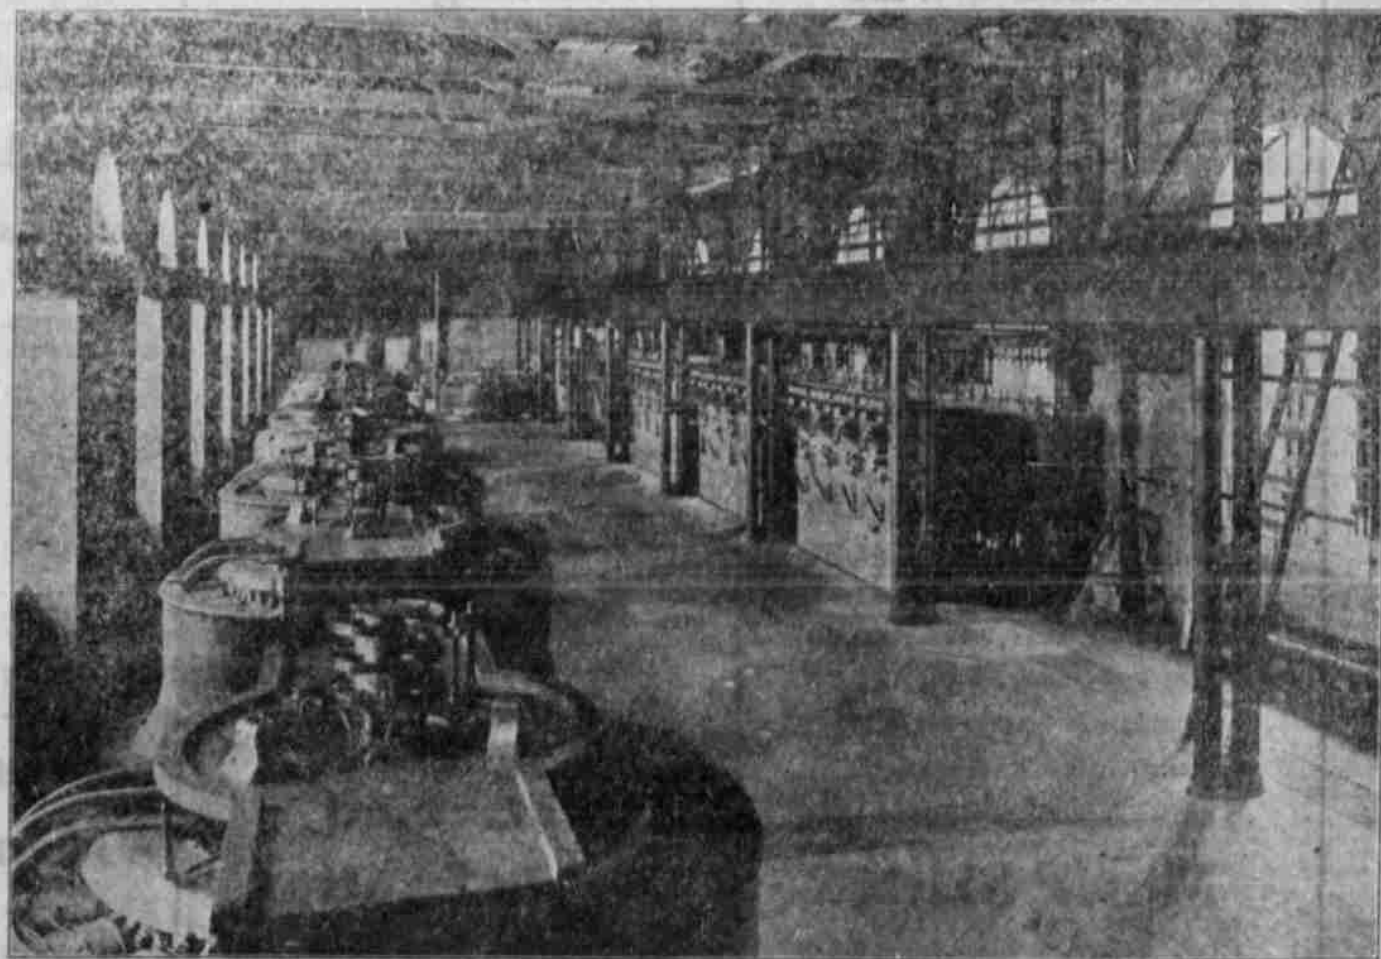

Our rates are the same as prevail in Portland for both light and power. If you have a power problem consult us. We will cheerfully furnish estimates and skilled electrical engineering advice without cost.

Our combined power capacity in the Willamette Valley system at this time is the magnificent total of

55,000 HORSE POWER

It will be but a short time before Salem will be linked to this tremendous reservoir of power by a double transmission line with its own steam plant and water power plant in reserve.

Our monthly bulletin telling of electrical development and electrical devices is yours for the asking
