

## You May Need It

Ask your doctor about the wisdom of your keeping Ayer's Cherry Pectoral in the house, ready for colds, coughs, croup, bronchitis. If he says it's all right, then get a bottle of it at once. Why not show a little foresight in such matters? Early treatment, early cure. We have no secrets! We publish the formulas of all our preparations. J. C. Ayer & Co., Lowell, Mass.

**Anniversary of Pythianism.**  
Washington, Feb. 19.—Members of the Knights of Pythias throughout the land are today celebrating the second anniversary of the establishment of the order. They believe they have good cause for jubilation in the rapid growth and flourishing condition of the order throughout the country. Since it was founded by Justin H. Rathbone, in this city, four decades ago, the Knights of Pythias have spread to every state and territory in the Union, to Alaska, Cuba, Hawaiian Islands, Mexico, and the province of Quebec. The membership is now increasing. At the annual banquet of the local chapters here tonight some of the chief officers of the order will speak.

**TREASURY DEPARTMENT.** Office of the Supervising Architect, Washington, D. C., February 8, 1907. SEALED PROPOSALS will be received at this office until 3 o'clock p. m. on the 15th day of March, 1907, and then opened, for the Construction of approaches and Improving the Grounds at the U. S. Post-office, at Salem, Oregon, in accordance with drawing and specification, copies of which may be had at this office or at the office of the Custodian at Salem, Oregon, at the discretion of the Supervising Architect. James Knox Taylor, Supervising Architect. 2-16-6t-eod

**Illinois State Farmer's Convention.**  
Quincy, Ill., Feb. 19.—There were over 800 delegates present at the annual convention of the State Farmers' Association today. A. V. Chemershorn, of Kilmunday, the president, referred to the great progress the association was making and the benefits it was conferring on the state. There are several new features in connection with this year's convention, including a dairy school and a corn school. There are also exhibits of poultry, horticulture, domestic science and school exhibits. Delegates from the Domestic Science Association will give demonstrations in cooking each day, and those attending the convention will have the use of the farmers' institute library. The proceedings will last until Thursday night.

It's the highest standard of quality, it's a natural tonic, cleanses and tones your system, reddens the cheeks, brightens the eyes, gives flavor to all you eat; Hollister's Rocky Mountain Tea does. For sale at Dr. Stone's store.

**For a National Stamping Law.**  
New York, Feb. 19.—An organization of jewelry and silverware manufacturers has been formed to secure the enactment in all states of statutes which will conform to the national stamping law passed by congress last winter, to become effective on June 13, 1907. The bill, which the legislatures of 40 states will be asked to pass, provides that all articles made of gold must bear a stamp showing the quality, and the metal must not show on assay divergence from the standard of more than one-half carat. In gold watch cases and other flat articles the maximum divergence allowed is 3-100 of a carat. In plated articles the stamp must show the quality of the plating.

## THE HANDY WOMAN.

The Art of Rolling an Umbrella to Look Like New.

Ever notice the difference between the neat and handy woman's umbrella and that of the careless, haphazard woman who dops along any old way.

After a rainstorm, when the neat woman's umbrella is wet and dripping, she opens it part way and puts it handle end down in a convenient place to dry. If she spread it out fully the silk would crack and split as it got dry. If the point end were down the water would run into the ribs at the top of the umbrella and rust them.

When the umbrella is quite dry the neat woman opens it slightly and shakes it vigorously to get all the wrinkles out and leave the folds free. Next she holds the umbrella horizontally in front of her, turning it slowly, getting each fold in place. That done, she holds it perpendicular, point upward, and prepares to roll it. Leaving the folds as she placed them, with her left hand she clasps it firmly at the top just where the silk begins. Her right hand grasps the lower ends of the steel ribs and holds them in place. The picture shows you how to do it. Then, with the fold on which the strap is sewed next you, begin to turn the umbrella from left to right. Again the picture shows you how this is done. As the rolling proceeds slide your left hand slowly down along the folds to keep them in place. Remember to

ROLLING AN UMBRELLA.

keep your grasp on the lower ends of the ribs as you turn the umbrella. Then when your left hand has slid down till it reaches the right fasten the strap neatly, and there you are!

## Woman's Universal Instrument.

It is a hairpin. It is indiscriminately glove and shoe buttoner, letter opener, knot loosener. In a pinch a key ring can be made of it. Not every woman knows, however, that nimble fingers can take two hairpins and make of them a "dandy" frame to hold a rare plaque or plate against the wall. If a city woman wanted such a small frame she would say to herself, "I'll get one at the ten cent store." But in the country there is no ten cent store, and the woman's brain and nimble fingers must serve her instead.

Very well. Let her take two long hairpins and pull them out straight. With a pair of small pliers she can bend each of the four ends into the form of a hook. Then she twists the wires together in the middle, bending the ends far apart. Careful manipulation will fix the four arms of the twisted pins at just the right distance apart, with the hooked ends all turned one way. When the frame is finished the plate may be put into it. The hooks will hold securely. After that tie a ribbon loop to the hairpin frame at the back, drive a tack into the wall and suspend your plate from it.

Finally, hatpins have occasionally been used by justifiably angry young

FRAMING A PLAQUE.

women to repel the advances of mashers. On a pinch a long hairpin might be advantageously employed for the same purpose.

## Tools Useful For Women.

The Japs excel all the rest of the world in respect to manual training, and we of the west have much to learn from them. There are several simple mechanical tools every girl and woman should be taught to use. For one thing, every mother's daughter should have a penknife and, what is more, keep it sharp and in good order. It is a disgrace not to be able to sharpen a pencil. A sharp penknife is the best implement for ripping long and difficult seams and for cutting pasteboard or leather. Other tools every woman should know the expert use of are a hammer, a screwdriver, a pair of pliers and a gimlet. Many a time a woman finds the task of screwing a strong clothes hook into wood too much for her. In such case if, as a starter, she first bores a shallow hole into the wood with a small gimlet the rest of the work will be easy.

## The Farmer's Wife

Is very careful about her churn. She soaks it thoroughly after using, and gives it a sun bath to sweeten it. She knows that if her churn is sour it will taint the butter that is made in it. The stomach is a churn. In the stomach and digestive and nutritive tracts are performed processes which are almost exactly like the churning of butter. Is it not apparent then that if this stomach-churn is foul it makes foul all which is put into it?

The evil of a foul stomach is not alone the bad taste in the mouth and the foul breath caused by it, but the corruption of the pure current of blood and the dissemination of disease throughout the body. Dr. Pierce's Golden Medical Discovery makes the sour and foul stomach sweet. It does for the stomach what the washing and sun bath do for the churn—absolutely removes every tainting or corrupting element. In this way it cures blotches, pimples, eruptions, scrofulous swellings, sores, or open eating ulcers and all humors or diseases arising from bad blood.

If you have bitter, nasty, foul taste in your mouth, coated tongue, foul breath, are weak and easily tired, feel depressed and despondent, have frequent headaches, dizzy attacks, gnawing or distress in stomach, constipated or irregular bowels, sour or bitter risings after eating and poor appetite, these symptoms, or any considerable number of them, indicate that you are suffering from biliousness, torpid or lazy liver with the usual accompanying indigestion, or dyspepsia and their attendant derangements.

The best agents known to medical science for the cure of the above symptoms are the leading physicians and practitioners of all the several schools of medical practice, have been skillfully and harmoniously combined in Dr. Pierce's Golden Medical Discovery. That this is absolutely true will be readily proven to your satisfaction if you will but mail a postal card request to Dr. R. V. Pierce, Buffalo, N. Y., for a free copy of his booklet of extracts from the standard medical authorities, giving the names of all the ingredients entering into his world-famed medicines and showing what the most eminent medical men of the age say of them.

The above cut shows our brick-lined Torrid Zone Furnace. Guaranteed gas and dust proof. Economical and durable; for the particulars inquire at
