One-Half the World

Wear glasses, but not half of that half wear the right glasses. The wrong glasses are often worse than none; they are a constant strain and a permanent injury to the eyes. Only scientific examination can determine what glasses your eyes require, you can't tell by trying on glasses.

Be on the safe side; let our optician give your eyes careful examination.

It doesn't cost anything—he can tell you just what you need—delays are dangerous. Our prices are reasonable, and we guarantee satisfaction.
