LOVE LED THE WAY WITH ROSES.

Love led the way with roses and the sunshine in her hair,
And her lifting songs were blended with the perfume in the air.
One by one she dropped her blossoms, drenched with dew drops at my feet—

Throwing backward smiles and laughter, just for me, alone, to greet,
And the way grew sweet to wander, for we'd said good-bye to care—
When she led the way with roses and the sunshine in her hair.

Love led the way with roses, and the roses, whisp'ring said:
'With our petals we will paint her lips and cheeks a blushing red;
We will keep her like the lily, keep her heart as pure and white
As the dew sent down from heaven through the shadows of the night.'
And her cheeks, they found the color of the blossoms, rich and fair,
And the dew drops found her heart—the day love led the way with care.

Love led the way with roses, and she laid them at my feet
Till her arms were empty, lonely, with no smiles for me to greet.
The blossoms took the blushes that were mirrored in her face,
And left her with the whiteness of the lily in their place.
Love led the way with roses—and the way was sweet we pressed—
So love must sleep with roses—sleep with white ones on her breast
F. Griffin, in Milwaukee Sentinel. —Will

NO LIMIT TO HUMAN ENDEAVOR.

"At the end of last year the banks were offering special attractions to depositors, as with the bank rate at 5 per cent they were giving 4 per cent to their customers, a higher rate than could be got by investment in securities of anything approaching the highest class."

Data are accumulating which WILL COMPEL A REVISION OF MANY OF THE VIEWS OF ECONOMISTS CONCERNING WHAT THEY ARE PLEASED TO TERM FAMILIAR PHENOMENA.

A few years ago they had settled, to their own satisfaction at least, that the exceedingly low price of what are termed gilt-edged securities indicated that the ability of the world to create capital was increasing more rapidly than the ability to profitably employ that which had been created.

In other words, the low rate of interest was proving the correctness of the assumption of John Stuart Mill, that a stage in industrial development may be reached in which capital is so abundant that it will in practice scarcely "earn its keep."

Now, without any extraordinary change in methods of production, or apparent increase in human desires, we have reached a stage which lends color to the opposing view that IT IS IMPOSSIBLE TO PLACE A LIMIT TO HUMAN ENDEAVOR, and that if there are no obstacles placed in the way mankind will continue to expand its efforts indefinitely and that the stand-still stage, which unprofitable capital suggests, will never be reached.

THE CHRIST OF THE ANDES.

Not many years ago Chili and Argentina were on the verge of war. An old boundary dispute had broken out anew, and was intensified by the discovery of an unsuspected value in the eighty thousand square miles of territory involved.

The two nations grew more hostile. Each was goaded by the other's warlike preparations to make more provision for a war believed to be inevitable.

THEIR STANDING ARMIES WERE INCREASED TO A BURDENSOME SIZE, AND THEIR NAVIES WERE ENLARGED BY NEW AND EXPENSIVE SHIPS.

The tax for these wasteful preparations amounted to five dollars per capita in the two nations.

To the honor of Christian men in both nations, let it be remembered that these demonstrations did not go on without protest.

On both sides of the line clergymen of the Roman Catholic church, as well as the representatives of the English government in both countries, labored earnestly and kindly for the averting of so great a disaster.

Bishop Benavente of Argentina and Bishop Jara of Chili were foremost in their pleas for peace.

They journeyed back and forth in their respective countries, rousing the clergy and laity by their pleading for the tangible expression of abiding peace between the nations, in the form of a monument on the boundary line.

It was this movement that gave focus to peace sentiment. The plan to erect a statue of Christ between the nations rebuked the clamor for war.

At last the boundary dispute was referred by agreement to the King of England; and his decision, which awarded to each nation a part of what it had contended for, gave general satisfaction.

Then the two nations, gratified by the result, signed a treaty, agreeing that for a term of years all controversies between them should be submitted to arbitration, and that they would reduce their armies and navies.

The women of the two nations took up the movement for the monument.

A young sculptor, Mateo Alonso, MODELED THE STATUE OF CHRIST, WHICH WAS CAST IN BRONZE PRODUCED FROM OLD CANNON.

It is twenty-six feet in height, and is supported by a gigantic column surmounted by a globe, on which the map of the world is outlined.

In His left hand the Christ holds a cross, rising five feet above the statue.

Below are two tablets.

One gives the history of the monument, and the other says, "Sooner shall those mountains crumble into dust than shall the people of Argentina and of Chili break the peace to which they have pledged themselves at the feet of Christ the Redeemer."

On the very summit of the Andes, and on the boundary line settled with mutual satisfaction and without strife, THE STATUE WAS ERECTED MARCH 13, 1904, A BENEDICTION TO THE NATIONS THAT ERECTED IT, AND A LESSON TO THE WORLD.

The new battleships were sold, and the proceeds turned to peaceful uses.

Regiments have been mustered out, and the men have returned to their productive vocations.

The arsenal of Chili has been converted into a school.

The roads and harbors of both nations have been improved with the money saved from war.

The great transandean railway is tunneling through the mountains and bringing the nations nearer together in time and commercial interests.

Taxes are reduced. The people prosper.

Best of all, the spirit of Christ has shown the world a better way than war.

A RARE TREAT FOR GENEALOGISTS.

Ancestor hunting has come to be about as much of a fad in this free and easy Republic of ours as it ever was amongst the inhabitants of the "effete despotisms of Europe," and to cater to this fancy, congress has authorized the director of the census to publish the names of the heads of families, with accompanying information shown on such schedules of the census of 1796 as are in existence.

The schedule of some of the southern states were destroyed when our

Don't Starve Your Hair

What do you think your doctor would say about feeding your hair with Ayer's Hair Vigor, the new kind? He knows that it feeds, nourishes, strengthens. The hair stops falling out, grows more rapidly, and all dandruff disappears.

British cousins burned the capitol at Washington in 1814, but those of most, or all the states north of the Potomac were saved, and those of New Hampshire, Vermont and Maryland are now in press and will be shortly issued, separately.

The schedule of each state will constitute a separate document of about 150 pages, and will be attractively printed and bound "in especially handsome and durable semi-pamphlet.

There will also be a map of the state as it was in 1796.

With unusual regard for economy, congress did not authorize the free distribution of these documents, but directed their sale at a price which the director of the census has fixed at one dollar for each state, WHICH IS CHEAP ENOUGH FOR A GOOD PAIR OF ANCESTORS.

Those who desire copies should address the director of the census at Washington, inclosing the necessary dollar.

The congressional appropriation is not sufficient to print the schedules of all the states this year, but it is expected that the amount necessary to publish those of the states not named above will be appropriated at the next session.

COMPENSATION FOR POOR CROPS IS FROM MINES

The Wall Street bears who lay extraordinary stress on unfavorable crop conditions in the United States, and who insists that shortage in our staple crops must necessarily prove a decided check to our prosperity, overlook some highly important elements in our business situation that may more than offset losses due to short crops.

There are other individuals, besides farmers, who are factors in making the United States a factor of ever increasing prosperity. Those are the mining interests, which make the earth give up for the benefit of mankind its hidden resources of useful and precious metals.

For instance, the shortage in the winter wheat crop, as estimated by the United States Department of Agriculture, will doubtless not represent in dollars and cents any greater amount of money than will probably be this country's gain for the year 1907 through the enterprising operations of its mining population and mine makers.

The director of the mint, George E. Roberts, estimates that the production of gold in the United States for 1907, owing largely to the great increase in the Nevada output, will amount this year to over \$100,000,000. This alone is compensation, financially speaking for a shortage of 100,000,000 bushels in winter wheat at \$1.00 a bushel, nor must it be overlooked that wheat would not sell at \$1.00 a bushel but more likely at 80 cents or under, were there not this big shortage in the crop.

In a corresponding way the bad luck of the cotton planters may this year be offset by the good luck of the copper miners, for increased production and higher prices for copper in 1907 may be more than an equivalent for loss through shortage in cotton production. The value of copper exports from the United States is increasing marvelously.

Prior to 1858 exports of copper had not even attained the \$1,000,000 mark, and from that time until 1891 the exports ranged in value between \$1,000,000 and \$5,000,000. In 1892 they gained to \$7,300,000, in 1894 to \$19,500,000, in 1897 to \$31,500,000, in 1899 to \$36,000,000. The increased use of electricity throughout the world has been the main factor in the phenomenal gains in the copper export trade.

Another huge source of wealth to the United States is the steel industry, which, during the last nine months, has made a credit item on our side of the international credit balance of about \$132,000,000.

It is interesting to observe from the April statement of the Bureau of Statistics of Washington that the total value of all our exports in April increased \$13,348,359, nearly all of which increase was due to exports of metals and goods manufactured chiefly from metals.

The wealth of the United States gains as a result of the enterprise and labors of its ledge finders and mine makers is of a more enduring and reproducing sort than what it gains from large crops. Commodities like wheat and cotton must be consumed within a reasonable time or they deteriorate and become unfit for use. The people of the country can eat just so much bread from flour and wear just so many articles of dress from cotton, and the more they eat and the more they wear the richer they may temporarily think themselves. But with the useful and precious metals it is different, as whatever is taken from the ground is a kind of wealth that is not only almost imperishable but which can result in production of other sorts of wealth for years to come. The use of gold as a basis for money and for credits generally; the use of steel for railroads and other important industrial purposes; the use of copper for transmitting electrical energy and for many other wealth producing objects are all such as to continually promote and provide for accumulation of national wealth.

The shortage in the wheat and cotton crops for this year may five years from now be almost a forgotten fact, while the gold, steel and copper produced this year may five years from now have yielded perhaps more than a hundredfold returns by their constant use in the business and industry of the country.

—Journal of Finance.

How's This?

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure. F. J. Cheney & Co., Toledo, O. We, the undersigned, have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligations made by him firm. Walding, Kinnan & Marvin, Wholesale Druggists, Toledo, O.

Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Testimonials sent free. Prices, 75 cents per bottle. Sold by all Druggists.

Take Hall's Family Pills for constipation.

Hewitt—Business is business. Jewett—Mine isn't yours.—New York Press.

The Magic No. 3.

Number three is a wonderful mascot for Geo. H. Parris of Cedar Grove, Me., according to a letter which reads: "After suffering much with liver and kidney trouble, and becoming greatly discouraged by the failure to find relief, I tried Electric Bitters, and as a result I am a well man today. The first bottle relieved and three bottles completed the cure." Guaranteed best on earth for stomach, liver and kidney troubles, by J. C. Perry druggist. 50c.

Not Encouraging.

He was to make his first appearance on the stage in "Uncle Tom's Cabin."

Just before the curtain went up he turned to the stage manager. "Are those the bloodhounds howling?" he asked.

The stage manager looked around. "No," he replied, "that's the audience."—Cleveland Plain Dealer.

Success in life is accompanied by increase of enemies. That's why Hollister's Rocky Mountain Tea has initiators; it's a success. 35 cents. Tea or Tablets. Dr. Stone's Drug Store.

JUDGE MURPHY STRICKEN

Veteran Clerk of the Supreme Court Dies

Judge J. J. Murphy dropped dead on the street Wednesday night at Salem, while on his way from his boarding place to the club rooms, where he passed his evenings with his friends. He expired close to the walls of the court house, where he was found dead by Sheriff Culver about 9 o'clock. It is believed that he went to the postoffice, and then started to the Illihee club, and, afflicted with a stroke of paralysis, he rested on the east steps of the court house, and there passed away from mortal life, amid the scenes of his active life in the quiet closing of a summer day. Sheriff Culver and his deputy, Harry Minto, helped remove the remains to the Rigdon undertaking rooms, where they attended them all night.

Deceased was a native of Ireland, and if he had lived until Saturday would have been 75 years old. His childhood was spent in Brooklyn, N. Y., whence he removed to California and in 1860 came to Oregon. He located at Champoux; was a member of the legislature; served two terms as sheriff, and was postal inspector and for 16 years clerk of the supreme court. In 1875 Judge Murphy was married to Mrs. Stephen Church, who, with their only son, Chester, of Portland, survives him. Judge Murphy was a Mason, an Odd Fellow and one of the charter members of the Illihee club.

He always retained some legal practice, and was concerned in some of the most important litigation in the county and state. He also took a prominent part in city affairs, having served in the city council, and as city attorney, and helped draft a number of charters. As a large property owner, he was always vitally interested in matters of taxation and public improvements. In his official duties Judge Murphy was a man of the highest integrity, and is considered to have been the best clerk of the supreme court who ever held that important position. In his social life Judge Murphy had a warm circle of friends. He was a regular attendant at the Illihee club evenings, and will be missed there, as almost no other man was so regular in his attendance. In politics Judge Murphy was a Republican all his life.

Remarkable Rescue.

That truth is stranger than fiction, has once more been demonstrated in the little town of Fedora, Tenn., the residence of C. V. Pepper. He writes: "I was in bed, entirely disabled with hemorrhages of the lungs and throat. Doctors failed to help me, and all hope had fled when I began taking Dr. King's New Discovery. Then instant relief came. The coughing soon ceased; the bleeding diminished rapidly, and in three weeks I was able to go to work." Guaranteed cure for coughs and colds, 50c and \$1.00 at J. C. Perry's drug store. Trial bottle free.

Water on Agency Plains.

A dispatch from Madras, in Crook county, says that water was struck in a well that was being bored on the Agency Plains at 420 feet. The water rose 50 feet, and it is hoped a flowing well will result from deeper boring. The Agency Plain is a beautiful plateau, considerably higher than the surrounding country. The soil is very fertile, and the plain has been a great winter stock range. The total absence of water prevented its settlement until a short time ago, but at present it is all located and produces splendid crops. Water had to be hauled from 3 to 12 miles. The plain is on the east side of the Deschutes river, and about 1500 feet above it.

Don't ! ! !

Don't let your child suffer with that cough when you cure it with Ballard's Horehound Syrup, a sure cure for Coughs, Bronchitis, Influenza, Croup and Pulmonary Diseases. Buy a bottle and try it.

B. B. Laughter, Byhalla, Miss., writes: "I have two children who had croup. I tried many different remedies, but I must say your Horehound Syrup is the best Croup and Cough medicine I ever used." Sold by D. J. Fry.

Thoughtful.

Wife—Tom, I hear a burglar. Husband—Then put your head under the pillow and you won't hear him.—Exchange.

If It's Neuralgia

and those sharp, shooting, agonizing pains drive you almost crazy, take Dr. Miles' Anti-Pain Pills and get relief. They drive out the pain by their soothing effect upon the nerves. When taken as directed they are harmless, and leave no bad after-effects. That's the reason they are so popular with all who use them. Your druggist can tell you what others in your locality think of them.

"I do positively think that Dr. Miles' Anti-Pain Pills are the best medicine ever put upon the market, and without any bad after-effects. I had suffered with neuralgia so that my system would just ache and quiver, and I cannot take opiates; but I can take these tablets, and they always relieve me. No one that suffers with neuralgia need fear to take them as I know they will not form a habit, for they do not take them. Just one in the morning when I feel bad, and I can do my work all day." MRS. W. H. BURKETT, Macon, Ga. Dr. Miles' Anti-Pain Pills are sold by your druggist, who will guarantee that the first package will benefit. If it fails, he will return your money. 25 doses, 25 cents. Never sold in bulk. Miles Medical Co., Elkhart, Ind.

Every Time.

Aunt—Ah, my dear, don't deceive yourself. Fine feathers don't make fine birds. Niece—Perhaps not, but they make jolly nice hats.—Exchange.

Call for Polk County School Bond.

Notice is hereby given that in accordance with section 3389, paragraph 31, of Bellingier and Cotton's Annotated Codes and Statutes of Oregon, I will within thirty (30) days from the date of this notice redeem and pay bond No. 1, of School District No. 29, Polk county, Oregon, issued Feb. 1, 1894, the same being now redeemable and payable. No interest will accrue on said bond after thirty (30) days from the date of this notice.

Dated at Dallas, Polk county, Oregon, Monday, June 17, 1907. J. E. BEEZLEY, County Treasurer.

Reform School Supplies.

Sealed proposals are hereby invited for furnishing the Oregon State Reform School with supplies for the next six months, ending December 31, 1907. Lists, with specifications, will be furnished upon application to the superintendent. All bids must be in by June 26th. All goods must be in strict accordance with samples in original package when possible. N. H. LOONEY, Superintendent.

THE ELEVENTH HOUR

It is not quite that late in the sale of the crockery, glassware and dishes at our store. But they will soon be all gone, as they are being sold below cost, to make room for more groceries.

H. M. BRANSON

Phone 131. 432 State St.
